Summary

Detail-oriented Data Analyst with over 4 years of experience in data extraction, transformation, analysis, and visualization. Proficient in SQL, Python, R, and BI tools to deliver actionable insights and support data-driven decision-making. Skilled in statistical analysis, data validation, and collaborating with cross-functional teams. Adept at handling large datasets, improving data workflows, and creating interactive dashboards to enhance business strategies across various industries.

Technical Skills

- **Programming & Scripting:** SQL (CTEs, Window Functions, Subqueries), Python (Pandas, NumPy, Dask, Vaex, Great Expectations, Openpyxl), R (k-means clustering, statistical analysis)
- **Data Manipulation & Cleaning:** Data ETL, validation, automation, and preprocessing using Python, SQL, and Excel
- **Data Visualization & Reporting:** Power BI (DAX, drill-through dashboards), Tableau (dashboards, Prep, parameter controls, LOD calculations), Excel (pivot tables, advanced formulas)
- **Databases & Platforms:** Amazon Redshift, PostgreSQL, Azure SQL Database
- **Data Analysis Techniques:** Cohort analysis, time-series analysis, EDA, RFM analysis, statistical modeling, A/B testing
- **Tools & Methodologies:** Agile collaboration, version control basics, data quality assurance, workflow optimization, dashboard development
- **Soft Skills:** Strong problem-solving, effective communication, teamwork, stakeholder management, and business insight interpretation

Professional Experience

Data Analyst, Chime

10/2024 – 03/2025 | Remote, USA

- Worked on Customer Transaction Behavior Analysis to identify spending patterns and seasonal trends, improving insight accuracy by 25%, team up with cross-functional teams using Agile to align data tactics with Chime's goal of enhancing member financial health.
- Utilized SQL and ETL techniques to extract and transform 100% of transaction data from Amazon Redshift and PostgreSQL, increasing data processing efficiency by 30% and enabling robust analysis of Chime's member spending behavior.
- Leveraged Python libraries Pandas, NumPy, Dask, and Vaex to process and manipulate over 1 million transaction records, optimizing workflow speed by 40% and supporting scalable, accurate data analysis for Chime's growing user base.
- Conducted cohort and time-series analyses detecting spending anomalies with 95% accuracy, delivering insights that helped personalize Chime's financial products and increased member engagement rates by 15%.
- Performed data validation using Excel pivot tables and Python Great Expectations, reducing data errors by 20% and ensuring 99% data integrity before conducting transaction behavior analysis.
- Developed Power BI dashboards with advanced drill-through and DAX formulas, enabling 100% of marketing and product teams to visualize transaction insights, improving data-driven decision-making speed by 35%.

Data Analyst, Citi

09/2021 – 07/2023 | Chennai, India

- Collaborated with cross-functional teams to gather requirements and analyzed Citi Chennai's customer data, segmenting over 85% of the customer base by demographics, transaction behavior, and product usage to drive personalized banking solutions
- Extracted data from Citi's Azure SQL Database using advanced SQL methods such as CTEs and Window Functions, efficiently processing 90% of transactional data from multiple product lines to enable comprehensive customer profiling.
- Performed exploratory data analysis including RFM (Recency, Frequency, Monetary) metrics to uncover patterns within 75% of high-value customers, helping prioritize segments for retention campaigns and product upselling initiatives.
- Utilized Python libraries Pandas, NumPy, and Openpyxl for efficient data cleaning, transformation, and Excel automation, processing over 80% of raw data into structured formats ready for clustering and stakeholder reporting.
- Applied R's k-means clustering to segment 70% of the customer dataset into meaningful groups, aligning clusters with Citi's business goals and enabling tailored marketing strategies with measurable uplift in engagement.
- Executed rigorous data validation using Excel and Tableau Prep for 95% data accuracy, and settled interactive Tableau dashboards with parameter controls and LOD calculations, aiding Citi's marketing team to explore insights and improve decision-making speed.

Jr. Data Analyst, Omega Healthcare Management Services

08/2020 – 08/2021 | Chennai, India

- Directed the "Revenue Optimization & Claims Accuracy" by gathering, cleaning, and preprocessing healthcare billing data using Python (Pandas, NumPy), resulting in a 15% improvement in claims processing efficiency.
- Utilized advanced SQL (including CTEs, window functions, and subqueries) to extract and analyze large-scale EHR and billing data, identifying trends in claim denials and reimbursement patterns across specialties.
- Performed statistical analysis in R and Excel to evaluate key performance indicators such as denial rates, days in A/R, and payer performance, contributing to a 10% improvement in reimbursement accuracy.
- Designed and deployed interactive Tableau dashboards to visualize denial reasons, claim turnaround times, and provider performance, enhancing operational transparency and supporting a 20% increase in stakeholder engagement.
- Ran A/B testing initiatives to assess the impact of new billing workflows and claim submission strategies, optimizing resource allocation and improving claim acceptance rates.

Education

Pace University – Seidenberg School of Computer Science and Information Systems, New York, NY, USA

Master of Science (MS) – Concentration: Data Science (GPA: 3.86 / 4.00)

09/2023 - 05/2025

SRM Institute of Science and Technology, Chennai, India

Bachelor of Technology (B.Tech) – Concentration: Electronics and Communication Engineering (ECE) (GPA: 3.3 / 4.0)

08/2017 - 08/2021
