San Francisco Bay Area, CA, US | +1 (469) 688-2326 | rauniyarnikit@gmail.com | [LinkedIn](#)

SUMMARY

Full-stack Software Engineer based in the Bay Area with 4+ years of experience designing scalable applications using React, Node.js, TypeScript, and PostgreSQL. Accomplished in building secure APIs and deploying solutions on AWS within fast-paced startup environments. Holds a Bachelor in Information Technology from Melbourne Polytechnic and is authorized to work in the U.S (Green Card).

SKILLS

- Frontend:** React.js, Next.js, TypeScript, Material UI
- Backend:** Node.js, Python, MongoDB, SQL (MySQL, PostgreSQL), API Integrations, API Designing, Full Stack Development
- Software Fundamentals:** OOP, Data Structures, Algorithms, Functional Programming, System Design
- DevOps & Tools:** CI/CD, Git, GitLab, GitHub, AWS
- Additional Skills:** Scripting, OAuth 2.0, Java, Project Management

WORK EXPERIENCE

Booop

Apr 2022 - Present

Software Engineer

Engineered full stack features by designing technical requirements and robust system plans, aligning with production-grade standards.

- Developed secure APIs and backend logic using Express.js and Node.js, ensuring scalable performance.
- Implemented unit tests and enforced quality standards to maintain high code reliability and production-grade quality.
- Designed and developed database services with MongoDB, focusing on data integrity and efficient API integrations.
- Integrated external APIs such as Stripe, Auth0, Brevo, and Shopify to enhance platform functionality.
- Deployed applications on AWS using Docker, ECR, and Fargate to support scalable, cloud-based, serverless architectures.

BrandoPC Solutions

Mar 2020 - Apr 2022

Full Stack Software Developer

- Built production-grade web applications using React.js, integrating OAuth for secure user authentication.
- Architected backend services with Python (Django) and PostgreSQL, ensuring robust data management and performance.
- Collaborated within a version-controlled environment using Git to maintain code integrity and streamline product shipping.
- Applied agile methodologies to iteratively develop and refine complex products for real-world user scenarios.
- Updated legacy codebases to comply with the latest security practices and industry standards.

EDUCATION

Melbourne Polytechnic

Feb 2019 - Dec 2021

Bachelor of Information Technology (Major: Software Development)

- GPA:** 3.83 CGPA (Out of 4)
- Achievements:** Received 20% merit-based international student scholarship.
- Coursework:** software development, programming coursework

New Horizon College

May 2016 - May 2018

Year 12

- GPA:** 3.71 CGPA (Out of 4)
- Achievements:** Rewarded with 100% merit-based scholarship.
- Coursework:** physics, chemistry, mathematics

PROJECTS

Algorithm

Jun 2023 - Present

- A landing page built in Next.js that allows students to register for classes.
- Integrated with Brevo (Email Server) for subscription.
- Implemented online chatbot, Google Analytics.

Booop Self-Checkout Solution

Apr 2022 - Present

- Architecting API and backend design.
- Implemented OAuth and RBAC policies for user groups.
- Integrated Stripe (Payment Processor), Brevo, database design.

CERTIFICATES

- AWS Certified Cloud Practitioner:** (09/2022 - 09/2025)
- SAS - Melbourne Polytechnic Academic Specialisation in Software Development Analytics:** (02/2022 - Present)
- Elements of Artificial Intelligence:** (06/2018 - Present)
Certification of Exam Completion (Online) by University of Helsinki & Reaktor (Finland)
