

Nikith Vodapally

Data Analyst

USA | +1 (571) 910-1858 | sainikithvodapally7@gmail.com | [LinkedIn](#)

Professional Summary

Data Analyst around 4 years of experience in leveraging data to improve decision-making, optimize processes, and enhance business performance. Proficient in Python, SQL, Power BI, Tableau, BigQuery, and advanced analytical techniques, with strong expertise in building automated dashboards, performing statistical analysis, and developing scalable data solutions. Experienced in ETL pipelines, data warehousing, data quality management, and implementing analytical frameworks that drive measurable impact. Adept at working with cross-functional teams, translating complex data into clear insights, and delivering high-quality analytical outputs that support strategic and operational goals.

Professional Experience

Data Analyst | SoFi, USA

Jun 2024 – Present

- Built and automated 15+ interactive dashboards tracking operational KPIs, reducing manual reporting by 40% and enabling leadership to make faster, data-driven decisions.
- Conducted deep-dive and variance analyses that uncovered 3 major process bottlenecks, improving operational efficiency by 18% across customer-support workflows.
- Collaborated with Product & Engineering to define data instrumentation requirements, increasing event-tracking accuracy by 30%, resulting in cleaner and more reliable analytics.
- Developed self-service data tools used by 150+ cross-functional stakeholders, reducing ad-hoc data requests by 35%.
- Cleaned, transformed, and structured large datasets (banking, lending, transactions) to support fraud & compliance teams—helping reduce false-positive alerts by 12%.
- Partnered with Risk and Ops teams to deliver insights that improved loan approval turnaround time by 15% and enhanced customer satisfaction scores in targeted segments.

Data Analyst | Clarivate, India

Aug 2020 – Nov 2022

- Executed end-to-end data ingestion and validation of 500k+ research, pharma, and IP records, improving dataset accuracy by 25% for downstream analytics teams.
- Performed EDA and quality analysis that identified 7 recurring data anomalies, reducing data-processing errors by 30% and improving reliability of client-facing insights.
- Designed and optimized data integration pipelines that cut processing time by 20%, increasing efficiency for content enrichment operations.
- Delivered well-structured analytical reports and documentation used by global clients across pharma & life sciences, leading to a 10% increase in report adoption.
- Collaborated with domain experts and product managers to refine data requirements, improving metadata completeness by 22% and supporting consistency across Clarivate's product suite.
- Led data-governance and taxonomy standardization initiatives that reduced duplication issues by 35%, improving overall dataset consistency and searchability.

Skills

- Data Analysis:** SQL, Python (Pandas, NumPy), Exploratory Data Analysis (EDA), Statistical Analysis, Data Wrangling, Data Cleaning, Trend Analysis, Root-Cause Analysis, KPI Development
- Business Intelligence & Visualization:** Power BI, Tableau, Looker Studio, Dashboard Development, Reporting Automation, Data Storytelling
- Data Engineering & Databases:** ETL/ELT Processes, Data Pipelines, Data Warehousing, Snowflake, Redshift/BigQuery (optional), Data Modeling, Metadata Management, Data Quality Validation
- Data Integration & ETL Tools:** SSIS, SSRS, SSAS, Informatica, Python (ETL libraries)
- Cloud & Big Data Technologies:** Google BigQuery, AWS, GCP, Hadoop
- Data Quality & Governance:** Data Cleansing, Data Integrity, Data Mapping, Data Standardization, Quality Assurance
- Tools & Platforms:** Excel (Advanced), Jira, Confluence, Git, APIs, JSON/XML Data Handling
- Professional Skills:** Stakeholder Management, Requirements Gathering, Cross-Functional Collaboration, Process Optimization, Problem Solving, Documentation, Attention to Detail

Education

Master in Business Analytics

Jan 2023 – May 2024

University of New Haven – New Haven, CT, USA

Bachelor of Technology in Electronics and communication Engineering

AUG 2017 – Aug 2022

PRIST University, Thanjavur, India

Project

Demand Forecasting & Capacity Planning

- Overview:** Developed advanced Python-based models to enhance capacity planning and demand forecasting, directly aligning with strategic business objectives.
- Key Achievements:** Enhanced forecasting accuracy by **15%** using machine learning models (NumPy, Scikit-learn) and automated reporting workflows, reducing manual effort by **20%**, enabling faster decision-making and improved resource allocation.

Exploratory Data Analysis for Product Optimization

- Overview:** Conducted in-depth exploratory data analysis (EDA) on large, imbalanced datasets to uncover actionable insights for product improvement and business strategy.
- Key Achievements:** Uncovered key trends through EDA, driving a 30% improvement in product implementation, and created impactful Tableau visualizations that boosted data-driven decision-making by 40% among stakeholders.
