SUMMARY

Full Stack Developer with 3+ years of experience in designing and delivering high-performance web applications using Java Spring, AngularJS, and AWS. Proven expertise in optimizing application performance, enhancing user experiences, and increasing customer satisfaction through innovative development and collaboration with cross-functional teams.

PROFESSIONAL EXPERIENCE

Program Analyst, Cognizant | Hyderabad, India

Apr 2021 - Mar 2022

Skills – Java, Angular, Typescript, AWS (Lambda, S3, EC2, DynamoDB), Docker, Git, RESTful API's, SQL, JUnit, Agile.

- Architected and implemented scalable retail technology solutions, boosting customer satisfaction by 20% through better synchronization of physical and virtual inventory counts.
- Engineered and launched React JS front-end applications, improving inventory accuracy by 30% and elevating customer satisfaction scores for Amazon Physical Stores.
- Optimized system performance for high-traffic scenarios, ensuring 99.9% uptime during peak retail periods.
- Led cross-functional team collaborations, achieving a 95% project success rate while adhering to Agile methodologies.
- Developed cloud-native solutions using AWS (Lambda, S3, EC2), reducing cold start issues by 60% and infrastructure costs by 40%, while maintaining high availability.
- Maximized performance monitoring strategies, reducing server response times by 30% and decreasing system downtime by 25%, boosting operational efficiency by 35%.

Software Engineer Intern, Level App | Hyderabad, India

Jan 2019 - Feb 2021

Skills – Java, Spring, Angular, HTML, CSS, jQuery, Maven, Git, PostgreSQL, JSON, RESTful API's.

- Maintained a learning platform with Java, Spring, and AngularJS, improving user engagement by 25%.
- Crafted responsive web interfaces with HTML5 and jQuery, improving load speeds by 30% and boosting user satisfaction by 15%.
- Established design documentation and user flow discussions framework, reducing development cycle time by 25% and enhancing deliverable quality.
- Managed source code repositories on GitHub, enabling version control, effective collaboration, and structured pull request reviews.
- Spearheaded weekly client demonstrations, driving a 95% client satisfaction rate through transparent communication.
- Utilized AWS Data Pipeline, T-SQL, Spark SQL, and AWS Glue to Extract, Transform, and Load data into AWS Data Storage services like Amazon S3, RDS, Redshift.
- Automated the setup of distributed data systems using Terraform for AWS services, including Redshift, S3, and EC2, ensuring high performance and data consistency for the new interactive dashboard.

PROJECTS

Study Buddy Collaborative Study and Note-Sharing Platform | Spring Boot, Angular, MySQL, MongoDB

Aug 2024

- Programmed an online study buddy application using Java, Angular, Spring Boot, MySQL, MongoDB
- Implemented a secure authentication system using JWT to manage user sessions and enhance security for the application
- Designed a responsive Angular-based UI with HTML, CSS, and Bootstrap, ensuring a seamless user experience across devices.
- Developed a responsive front-end interface for the product catalog using Angular, incorporating features like lazy loading, Routing and reactive forms to enhance user experience and performance
- Created RESTful APIs for the courses catalog, facilitating seamless communication between the front end and back end, and improving data accessibility for users and admin.
- Deployed production-ready infrastructure including auto-scaling groups, load balancers, RDS instances, and CloudWatch alarms across multiple availability zones.
- Established GitHub Actions to trigger merger requests and motorized workflows with checks of the Unit tests
- Deployed the frontend on AWS S3 and the backend on EC2, ensuring optimal performance and availability for end users.

Predictive Analytics Using Google Cloud | PySpark, SQOOP, Python, Big Query.

May 2023

- Deployed a machine learning model on GCP with PySpark, achieving 90% accuracy in predicting COVID- 19 mortality risk.
- Optimized data pipelines using Big Query and Spark, reducing processing time by 50% and ensuring 99.9% uptime.
- Leveraged GCP tools to analyze real-time data, improving resource allocation by 40%.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, HTML, CSS, Python, Go, C, C++
- **Frameworks:** Spring Boot, Angular, React, Mockito, Flask
- **Testing Tools & Cloud Services:** Postman, Selenium, TestNG, Junit, AWS, GCP, Azure, Google BigQuery
- **Databases:** Oracle, PostgreSQL, MongoDB, SQL Server, MySQL
- **Tools :** Tableau, Power BI, Jenkins, SAS, Docker, Kubernetes, Power BI, GitHub, Jira, JUnit, Postman, Maven, Bitbucket.
- **Other Skills:** Data Structures & Algorithms, CI/CD Pipelines, Design Patterns, Relational Database, UI/UX Design, Object Oriented Programming, Software Development Life Cycle, Software Testing, Debugging, Agile Methodologies, MS Office

EDUCATION

Master's in computer science – California State University Fullerton

Jan 2023 - Dec 2024

Bachelor's in computer science – Gokaraju Rangaraju Institute of Engineering and Technology

Aug 2017 - Jul 2021
