

SUMMARY

Results-driven Business Analyst with 3+ years of experience in driving business efficiency through data-driven insights and process optimization. Proven success in enhancing reporting accuracy by 30%, streamlining workflows by 20% through **GAP and impact analyses**, and ensuring 99% defect-free releases with **comprehensive UAT execution**. Skilled in creating detailed **BRD, FRD, and SRS documents**, improving documentation accuracy, and collaborating with cross-functional teams to deliver successful project outcomes. Adept at identifying process inefficiencies, improving operational performance, and supporting data-driven decision-making. Strong problem-solving skills with a focus on delivering high-quality results, improving productivity, and driving business growth.

TECHNCIAL SKILLS

Documentation:	FRD, BRD, SRS
Project Management Tools:	MS Project, MS Excel, MS SharePoint
Visualization Tools:	Tableau, Power BI
Analysis Skills:	Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
Tracking/Other Skills:	Jira, Microsoft Visio, HP Quality Center, JAD, Rational Clear Quest, RTM, UAT, Confluence, Figma
Soft Skills:	Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication
Methodologies:	SDLC, Agile/Scrum, Waterfall
Operating System:	Windows, Linux

PROFESSIONAL EXPERIENCE

UnitedHealth Group, WI, USA | Business Analyst

Aug 2024 - Current

- Enhanced operational efficiency by 30% by creating **interactive Power BI dashboards**, providing real-time insights into **patient care metrics, treatment outcomes, and resource utilization**, enabling data-driven decision-making.
- Reduced project delivery time by 20% by conducting **comprehensive cost-benefit and impact analyses**, identifying process bottlenecks, and recommending optimizations that streamlined workflows.
- Achieved a 99% defect-free release by implementing a **standardized UAT framework**, including detailed test plans, comprehensive test case execution, and effective defect tracking, ensuring software quality.
- Automated manual reporting processes, reducing effort by 35% by integrating **Excel macros with Power BI dashboards**, improving data accuracy and saving over 15 hours of manual work weekly.
- Accelerated development cycles by 25% by creating detailed **BRD, FRD, and SRS documents**, effectively translating business requirements into functional specifications, improving developer productivity.
- Improved cross-team collaboration by optimizing **Jira workflows**, setting up automated sprint boards, and maintaining detailed **Confluence documentation**, enhancing project transparency.

UnitedHealth Group, WI, USA | Business Analyst Intern

Jan 2024 – May 2024

- Improved executive decision-making by 40% by designing and deploying **Power BI dashboards** that visualized critical KPIs, such as **patient outcomes, financial performance, and resource allocation**.
- Enhanced productivity by 15% by identifying and resolving inefficiencies through **GAP and SWOT analyses**, streamlining business processes.
- Achieved a 97% acceptance rate in **UAT testing** by executing detailed test plans, identifying defects early, and collaborating with development teams for timely resolution.
- Reduced documentation errors by 20% by creating detailed **process flow diagrams** using **Microsoft Visio**, improving clarity and accuracy in technical documentation.
- Improved data consistency by automating data extraction and cleaning processes using **Excel functions and SQL**, enhancing data quality for reporting.

Citius Tech, India | Business Analyst

Feb 2021 – Aug 2022

- Boosted reporting accuracy by 30% by developing and maintaining **Tableau dashboards** that tracked **patient outcomes, financial metrics, and operational performance**, enabling data-driven decisions.
- Reduced project risks by 25% through detailed **impact assessments and risk analysis**, identifying potential issues early and implementing effective mitigation strategies.
- Increased sprint efficiency by 20% by streamlining **backlog management and sprint planning** using **Jira and Confluence**, improving task prioritization and delivery speed.
- Improved data reliability by 35% by automating **Excel-based reporting**, reducing manual errors and enhancing consistency across reports.
- Ensured 95% successful release rates by driving **UAT execution**, including test planning, execution, and defect resolution, ensuring high-quality deliverables.

Bright Mind Technologies, India | Business Analyst

Mar 2020 - Jan 2021

- Increased reporting efficiency by 45% by developing **Power BI dashboards** to visualize **financial performance, customer behaviour, and operational KPIs**, enabling data-driven decision-making.
- Improved operational efficiency by 20% through **GAP and risk analyses**, identifying process inefficiencies and recommending targeted improvements.
- Achieved 98% user acceptance by executing thorough **UAT cycles**, identifying defects early, and collaborating with developers to implement timely fixes.
- Enhanced data accuracy by 30% by automating **data cleaning and transformation** using **Excel and SQL**, reducing inconsistencies in reporting.
- Streamlined business processes by creating **Microsoft Visio flowcharts**, enhancing stakeholder understanding of complex workflows and improving documentation quality.

EDUCATION

Masters in Computer science | Concordia university-Milwaukee, Wisconsin, USA

May 2024

Bachelor in Statistics, Computer Science, Mathematics | St. Pious X Degree & PG College for Women, Hyderabad, India

Sep 2021
