EDUCATION

University of Minnesota

Bachelor of Science in Computer Science

Sept. 2021 - May 2025

Minneapolis, MN

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, MongoDB, JavaScript, TypeScript, HTML, CSS

Frameworks: React, Node.js, Express.js, Flask

Developer Tools: Unix, Linux, Git, Docker, Google Cloud Platform, PyCharm, IntelliJ, Eclipse, AWS

Libraries: Pandas, NumPy, Matplotlib, PyTorch

Methodologies: Agile, Test-Driven Development

EXPERIENCE

Developer Intern

Nagios Enterprises

Aug. 2025 – Present

St. Paul, MN

- Developing Nagios XI setup wizard to cut configuration time by 40%
- QA testing on 4 Nagios products, reporting 15+ issues to improve stability and UX
- Writing documentation for 1,000+ enterprise users to configure and maintain monitoring systems

Web Developer

Kris' Tacos

May 2024 - Present

Blue Earth, MN

- Developed a responsive React website for a local taco food truck business
- Built 5 core features: homepage, menu, contact form, and location calendar
- Integrated Google Calendar API to automate updates for 10+ weekly stops
- Deployed site, enabling public access and improved customer engagement

Student IT Technician

University of Minnesota

Aug. 2024 - July 2025

Minneapolis, MN

- Provided support on 50+ support tickets weekly using TeamDynamix, maintaining 95% customer satisfaction
- Managed inventory of 200+ devices including laptops, VR headsets, and peripherals
- Supported classroom tech and AV systems across 50+ classrooms alongside full-time IT staff

Enterprise Computing Solutions Intern

Unisys

Jun. 2023 - Aug. 2023

Eagan, MN

- Engineered production-ready Cipher File Utility (CFU) in C, processing 500+ enterprise files with encrypt/decrypt/display capabilities for Fortune 500 clients
- Learned complex OS2200 mainframe architecture through documentation research, becoming proficient on system integration and custom C development
- Delivered mission-critical security tool through 3 Agile sprints with 6-person team, achieving successful production deployment post-internship

PROJECTS

Schedule Builder | *MongoDB, Express.js, React, Node.js, Git, Agile*

- Built a full-stack web application for managing employee work shifts, allowing users to submit availability and generating optimized schedules automatically
- Designed and implemented RESTful APIs with Node.js and Express to handle scheduling logic, ensuring conflict-free shift assignments across multiple users and time slots
- Integrated MongoDB to securely store availability, assignments, and admin overrides, enabling reliable schedule management and updates

Drone Delivery Simulation System | *C++, HTML, CSS, JavaScript, Git*

- Built a C++ simulation handling 100+ robots and 100+ drones with 90% successful delivery rate
- Integrated 8 recharge stations for drones, reducing battery-related failures by 75%
- Implemented timed delivery logic with automatic refunds, achieving 85% on-time delivery
- Applied SOLID design principles across 15+ classes, reducing code complexity by 40%
