SUMMARY

Data Analyst and Big Data Analyst with 3+ years of experience in ETL development, big data pipelines, and cloud data platforms. Skilled in Python, SQL, and tools such as Azure Data Factory, Spark, and Snowflake to build scalable data solutions. Proficient in Power BI and Tableau for delivering actionable insights, KPI tracking, and business reporting. Strong background in database optimization and workflow automation to improve efficiency and data-driven decision-making.

TECHNICAL SKILLS

- **Programming & Scripting:** Python (Pandas, NumPy, Scikit-learn), R, Advanced SQL
- **Big Data & Data Engineering:** Azure Data Factory, Apache Spark, Kafka, Airflow, ETL Development,
- **Data Warehousing & Cloud Tools:** Snowflake, Amazon Redshift, Azure Synapse, Azure Blob Storage, AWS Glue, Databricks
- **Data Visualization & BI Tools:** Power BI, Tableau, Data Visualization, Statistics
- **Databases & Development:** PostgreSQL, MySQL, MongoDB, SQL Server, PL/SQL, Stored Procedures, Triggers, Indexing, Performance Tuning, Data Normalization, Database Design

PROFESSIONAL EXPERIENCE

CitiGroup, USA

July 2025 – Present

Data Analyst (Contract)

- Supported data integration and ETL workflows in Python, SQL, and Snowflake, preparing clean datasets for analysis.
- Assisted in building interactive Tableau dashboards and reports to monitor KPIs and service performance for Production Management.
- Gained practical experience with Agile/Scrum methodologies using JIRA and GitHub for project tracking and delivery.
- Documented data pipelines, workflow processes, and business rules, improving transparency and handover efficiency.
- Collaborated with cross-functional teams to define reporting requirements and deliver actionable insights.

Drexel Hill Smiles, USA

June 2024 – Dec 2024

Data Analyst

- Developed a real-time analytics solution using Python and MySQL to extract, clean, and transform clinical data, and built a Power BI dashboard to track daily operations, production metrics, and insurance contributions to revenue.
- Enabled data-driven decision making by providing dynamic quarterly, monthly, and yearly insights, automating data updates, and ensuring accurate performance reporting.
- Applied Python scripting for data preprocessing, calculation of key KPIs, and automation of repetitive reporting tasks, improving workflow efficiency and accuracy.
- Visualized actionable insights for stakeholders, enhancing operational transparency and supporting strategic planning for clinic management.

Rysun Labs, Ahmedabad, India

August 2019 – July 2023

Big Data Analyst

- Designed, developed, and managed 25+ scalable ETL pipelines in Azure Data Factory, integrating Blob storage, SQL DB, and REST APIs into Azure Synapse for downstream analytics.
- Automated data validation, transformation, and quality checks using Data Flows and stored procedures, ensuring accurate, analysis-ready datasets.
- Partnered with BI teams to deliver dashboards and KPI reports in Power BI, enabling faster business insights from trusted, clean data.
- Collaborated with development teams to ensure smooth integration of backend systems with APIs and frontend applications.
- Improved database performance through indexing, query optimization, and performance tuning to ensure faster data retrieval.
- Implemented data pipelines to extract, transform, and load (ETL) JSON and API-driven datasets into MongoDB for real-time analytics.

EDUCATION

Temple University, The Fox School of Business, Philadelphia, PA

Master of Science, Business Analytics, Graduated

May 2025

Gujarat Technical University, Ahmedabad, Gujarat, India

Bachelor of Engineering, Computer Science Concentration,

May 2019
