SUMMARY

Data-driven Business Analyst with 3+ years of experience designing scalable analytics solutions and delivering operational insights in ambiguous environments. Proven ability to build data models, automate reporting workflows using SQL/Python/Excel VBA, and create interactive dashboards using Tableau and Power BI. Strong collaborator known for maintaining high analytical rigor and aligning data products with strategic business needs.

TECHNICAL SKILLS

- **Data & BI Tools:** Tableau, Power BI, Looker, Excel (Advanced functions, Power Query, VBA Macros), DAX, Git/GitHub
- **Programming & Automation:** Python (Pandas, NumPy), SQL (PostgreSQL, SQL Server), Excel VBA, Airflow, SSIS
- **Cloud & Storage:** Familiar with AWS (Redshift, S3), GCP, Azure basics
- **Data Modeling & Pipelines:** Star/Snowflake Schema Design, ER Modeling, A/B Testing, ETL Design
- **Certifications:** Google Business Intelligence (2025), Tableau Data Analyst (2025)

PROFESSIONAL EXPERIENCE

University of Houston-Clear Lake | Houston, TX | January 2025-Present

Research Data Analyst

- Developed Tableau dashboards visualizing 10+ operational KPIs used in resource planning across 5 departments; contributed to a 25% boost in planning efficiency.
- Automated cross-departmental data processing using Python and Excel VBA, saving ~20 hours/month in manual updates.
- Refactored and indexed 100+ SQL queries across faculty data marts, improving performance by up to 30% and enabling near real-time analysis.
- Led data governance initiatives including access control, audit logs, and lineage documentation, cutting escalations by half.

University of Houston-Clear Lake | Houston, TX | March 2023-December 2024

Graduate Analyst

- Engineered Power BI dashboards with advanced DAX, driving real-time accreditation tracking for 500+ faculty research submissions.
- Developed and managed a SQL Server data warehouse; automated ETL via SSIS pipelines from 8+ systems, improving reporting speed by 40%.
- Established secure, role-based reporting access and standardized analytics workflows across 4 departments, enhancing compliance and scalability.
- Collaborated with academic leaders to translate 20+ business questions into actionable KPIs, accelerating data-informed decisions.

Infosys Limited | Pune, India | May 2021-December 2022

Software Developer

- Built a HIPAA-compliant microservice for processing 50K+ healthcare claims/day using Java Spring Boot with 99.9% uptime.
- Tuned SQL and indexing logic for Medicare claims workflows, reducing ETL latency by 2 days and accelerating financial close processes.
- Created automated regression scripts (Selenium + Python) for QA pipelines, reducing manual testing efforts by 35%.
- Integrated QR scanning in mobile apps (React Native), increasing claims submission efficiency and user engagement by 15%.
- Collaborated with cross-functional teams (QA, DevOps, Product) under tight compliance and SLA constraints.

PROJECTS

Document Processing Automation | Google Cloud | 2025

Implemented Google Document AI to classify academic PDFs with 85% accuracy, reducing manual processing time by 60%

Job Market Analytics Pipeline | Python, PostgreSQL | 2024

Created ETL pipeline extracting 500-1,000 daily job postings with data quality validation for university career services

EDUCATION

University of Houston-Clear Lake | Houston, TX | December 2024

Master's in Management Information Systems | **Relevant Coursework:** Data Warehousing, Cloud Analytics, Advanced SQL

Gujarat University | Gujarat, India | October 2020

Bachelor's in Computer Applications
