Education

Masters in Engineering Science Data Science,
State University of New York at Buffalo

Aug 2023 – Jan 2025 | Buffalo, NY

Relevant Coursework: Machine Learning & Predictive Modeling, Data Mining & Statistical Inference, Deep Learning, EDA, Big Data Processing with Spark & Hadoop, Database Management, Data Visualization, Applied Linear Algebra, Advanced Python .

BSc – Statistics, Mathematics, and Computer Science,
St. Francis Degree College

2020 – 2023 | Hyderabad, India

Relevant Coursework: Probability & Statistics, Linear Algebra, Calculus, Statistical Inference, Real Analysis, Discrete Mathematics, Operation Research, Python, Numerical Methods, R Programming.

Experience

Junior Data Scientist Intern, Code Connect Inc

03/2025 – present | Herndon, VA

- Built ML models for patient risk prediction using dimensionality reduction techniques on multimodal healthcare data.
- Performed survival analysis, SHAP, and LIME interpretability techniques to explain model results.
- Created dashboards in Power BI/Tableau for clinical insight delivery; ROC-AUC exceeded 85%.
- Designed Python-based ETL pipelines for data wrangling and accelerated model lifecycle by 20%.

AI/ML Intern (Remote), Core Defender AI

08/2024 – 01/2025 | Portland, OR

- Developed and deployed LLM-based chatbots using Claude 3.5 and LangChain.
- Designed Retrieval-Augmented Generation (RAG) pipelines for enterprise document QA.
- Improved internal automation workflows using AI-driven insights.

Data Analyst Intern, Renova

01/2023 – 08/2023 | India

- Conducted SQL-based performance analysis and built Tableau dashboards for healthcare staffing optimization.
- Automated recurring Excel-based reports and KPIs for decision support.
- Identified cost-saving opportunities via trend analysis and operational insights.

Projects

Lung Cancer Prediction with AWS SageMaker

- Built XGBoost regression model to predict tumor size; improved accuracy by 35% with feature engineering.
- Performed data profiling, transformation, and model tuning in a cloud environment.

Product Recommendation Engine

- Processed customer behavior data using Python and SQL to power collaborative filtering.
- Visualized product trends and customer segments via Tableau dashboards.

Crime Data Engineering & Analytics Project

- Engineered a custom Python + SQL logic system for ingesting and querying city crime datasets
- Conducted geospatial and temporal analysis for predictive modeling and public safety planning.

Handwritten Digit Recognition MNIST

- Built a neural network classifier with 95%+ accuracy using TensorFlow and Keras.
- Implemented hyperparameter tuning, cross-validation, and performance metrics tracking.

Skills

Languages: Python, SQL, R, MATLAB, Bash

ML/DL Frameworks: Scikit-learn, PyTorch, TensorFlow, Keras

Data Tools: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel

Cloud & DevOps: AWS (EC2, Lambda, S3, SageMaker, RDS, Bedrock), Azure, Docker, Kubernetes, Terraform

Databases: PostgreSQL, MySQL, Snowflake, MongoDB

Workflow & Versioning: Git, GitLab, Airflow, CI/CD, REST APIs

Concepts: EDA, Feature Engineering, Model Tuning, Hyperparameter Optimization, Anomaly Detection, Fraud Analytics, Clustering, Classification, Forecasting, Data Cleaning
