

NISHANT MIYANI

miyani@usc.edu | (213) 812-4363 |  nishantmiyani |  Nishant1782 | Los Angeles, CA - 90007.

EDUCATION

University of Southern California, Los Angeles, CA.

Aug 2024-May 2026

Master of Science - Computer Science

GPA: 3.75/4.00

Coursework: Analysis of Algorithms, Database Systems, Machine Learning, Web Technologies

Charotar University of Science and Technology, Gujarat, India.

Sept 2020-May 2024

Bachelor of Technology - Information Technology

GPA: 3.82/4.00

Coursework: Data Structures, Full-Stack Development, Cryptography and Network Security

TECHNICAL SKILLS

Core Competencies: Cloud Service Development, Backend Development, Data Science, Web Development, Web Security, Algorithm Design, Android Development, iOS Development, Database Management, Web Services, Cloud Infrastructure (distributed storage), Integration Testing, CI/CD, Microservices, Shell Scripting

Languages/Frameworks: Python, JAVA, C++, C#, JavaScript, Ruby, HTML, CSS, NodeJs, ReactJs, Django, Flask, PHP, Solidity, Typescript, Spring Boot, AngularJs, VueJs, NextJs, Pandas, Matplotlib, Numpy, .NET Core, TensorFlow, PyTorch, Scikit-Learn, Keras, Swift, Perl, Hive, Kotlin, Rust, Go, R, Jira, Flutter, Dart, Spark

Tools/Platforms: Docker, Tableau, PowerBI, Jenkins, Ansible, Kubernetes, GCP, GIT(version control), Oracle, MySQL, SQL, Azure, Maven, Hadoop, Kafka, Gradle, Redux, jQuery, Operating Systems, UNIX, Linux, UBUNTU, Powershell, MongoDB, Groovy, WireShark, Pytest, Visual Studio, Postman, DevOps, AJAX, MVC, Postgres, REST API, ETL

WORK EXPERIENCE

Software Development Engineer Intern.

May 2025-Aug 2025

Amazon Web Services (AWS), San Francisco Bay Area, CA, USA

- Implemented an EKS Cluster Level Throttling mechanism on the Elastic Map Reduce control plane for the team Elastic Map Reduce on Elastic Kubernetes Service (EMR on EKS) to support EKS cluster health.
- Performed integration testing and load testing to replicate existing XXL customers of EMR on EKS including Salesforce and Netflix.

Software Developer.

Jan 2024-May 2024

DioneApps, Surat, Gujarat, India.

- Collaborated with 4 member's team and made a fully functional application aimed at facilitating restaurant reservations and managing booking details.
- Applied modular principles to break down the application into reusable components, improving scalability by 6%.

Research Assistant.

Apr 2023-Jun 2023

Charotar University of Science and Technology, Anand, Gujarat, India.

- Reviewed and analyzed over 20+ academic papers to understand the benefits and flaws of existing time banking solutions.
- Proposed a new time-banking solution that demonstrated a 7% improvement in efficiency compared to existing models.

Machine Learning Intern.

Apr 2022-Jun 2022

Amnux Infotechnologies, Ahmedabad, Gujarat, India.

- Leveraged the power of Python and its libraries to create and train 8 machine learning models.
- Trained models that demonstrated a high accuracy rate of 97.5% were further used for critical health-related applications, including detecting skin cancer and diabetes.

PROJECTS

Glutton Resto Application (ReactNative, Google Firebase, Authentication)

- Came up with 3 distinct applications catering to different user roles. Employed Google Firebase as the backend database solution, enabling real-time data synchronization and efficient data management for all 3 modules of the project.
- Book tables, write reviews, add photos, verify reservations via QR code scanning for user convenience tested with 500+ entries in database.

Student Management System (Java, SpringBoot ReactJS, MongoDB)

- Created a website used to manage student-related data. Implemented data for student information storage with help of MongoDB (NoSQL), enabling quick access of more than 5000 queries at a time.
- Functionalities includes student's all personal information such as courses, fees, schedules, mentors and many more.

Stock Hub (NodeJS, ReactJS, Flask, MongoDB, Java)

- Developed a high-performing Stock Trading Application using agile development method across three platforms: a web-based SPA with HTML, CSS, and JavaScript with Flask; React with Node.js for front-end; and an Android app, employing a micro services architecture and deployed on Google Cloud Platform (GCP).

Money Manager (Python, NumPy, SciPy, pandas, scikit-learn, Keras, PyTorch)

- Formulates detailed records for better financial management experimented with a family of 10 members.
- A future prediction model that is 95% accurate leveraging machine learning has been coded and will be added soon. This feature will forecast financial trends and aid in planning.

CERTIFICATIONS, COURSES AND INTERESTS

- Google Cloud Computing** | Google Cloud Educational Badges (12 Badges).
- Kerala Blockchain Academy** | Certified in Blockchain Fundamentals, Ethereum Fundamentals and Hyperledger Fundamentals.
- DataCamp** | Data Analysis and Visualization 30 days BootCamp Completion
