

Nishant Phatak

MS in Computer Science

Santa Clara, CA || +1- 973-817-6064 || phataknishant1@gmail.com || [LinkedIn](#)

ASPIRING SOFTWARE ENGINEER

Skillset: **Software Development Lifecycle** || **Front End Development** || **Backend Development** || **Database Management** || **Data Structure** || **Object Oriented Programming** || **Test-Driven Development** || **UI/UX Design** || **REST API Development (Fast API)** || **Troubleshooting** || **Software Integration** || **Security & Authentication**

EDUCATIONAL CREDENTIALS

MS in Computer Science ▶ New Jersey Institute of Technology
B. Engineering. (Computer Engineering) ▶ Mumbai University

May 2024
July 2022

WORK EXPERIENCE

Software Engineer ▶ Intuit, Mountain View, CA Jun. 2025 – Present

- Contributed to Intuit's Commerce Platform, the core system powering products like **TurboTax** and **Credit Karma**, focused on personalized financial experiences, subscription management, and compliance.
- Developed scalable backend services using **Java (Spring Boot)** and **Python (FastAPI)** to support critical workflows like cart operations, order history, entitlement validation, and pricing logic.
- Built and exposed secure **RESTful APIs** handling millions of transactions daily, enabling personalized product recommendations, credit offerings, and tax add-ons with strict adherence to compliance and security standards.
- Integrated with **ML-driven** services for behavioral insights and decision automation, collaborating with data science teams to surface real-time risk signals and credit/tax eligibility.
- Built dynamic frontend interfaces with **React, TypeScript, HTML, and CSS**, integrating securely with backend APIs to visualize model decisions and streamline human-in-the-loop moderation workflows.
- Built and maintained robust CI/CD pipelines using **GitLab** with integrated security checks, secrets management, rollback strategies, and automated **testing (Pytest, Postman)** to ensure secure and resilient deployments for high-volume systems.

Web Developer ▶ New Jersey Institute of Technology, Newark, New Jersey Sep. 2022 – May. 2024

- Improved digital engagement by utilizing **Drupal CMS** and delivering 15+ new features through effective collaboration with designers and stakeholders, boosting user engagement.
- Engineered modern web interfaces with **React.js, HTML, CSS, JavaScript** elevating user satisfaction.
- Established rigorous testing protocols to ensure cross-browser compatibility and functionality, maintaining a high standard of quality for all web projects. Implemented state management using **Convex** to handle real-time data updates and user interactions.
- Developed and deployed robust security protocols, including **SSL encryption** and regular security audits, to protect sensitive student information and data resulting in zero breaches during tenure.

VOLUNTEERING EXPERIENCE

Software Web Developer ▶ Bright Mind Enrichment and Schooling, Newark, New Jersey Aug. 2024 – May. 2025

- Spearheaded the development of **StreetCare**, a React-based civic engagement platform designed to help underserved communities report street hazards and request public service support.
- Architected intelligent backend logic in **Python**, integrating a lightweight **ML model** to prioritize reports based on severity and frequency, resulting in a 40% faster triage time by school staff.
- Fostered agile teamwork with designers and education coordinators, delivering **15+ digital features** and streamlining deployment workflows using **Git** and **CI tools**.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C#, PHP, HTML, CSS, SQL

Frameworks & Libraries: Django, Flask, Spring Boot, Spring Cloud, React.js, Next.js, jQuery, Bootstrap

AI & Machine Learning: TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, OpenAI API

Databases: SQL Server, MySQL, SQLite, Oracle, PostgreSQL, MongoDB

Cloud Services: AWS (EC2, S3, API Gateway), Kubernetes

Tools & Methodologies: Git, GitHub, Visual Studio Code, Jupyter Notebook, PyCharm, Agile, Waterfall, SDLC, Junit, Mockito, Apache Kafka, BitBucket, Drupal CMS, AJAX, XML

Operating Systems: Windows, Linux

CERTIFICATIONS

AI Developer (IBM), Python (GOOGLE), AI (ACCENTURE), Python & Web Development (ISO).
