

NISHANTH HANMANTHUREDDYGARI

Owings Mills, MD | +1 (475) 223-6080 | nishanthreddy00@gmail.com | [LinkedIn](#)

PROFILE SUMMARY

Highly skilled and results-driven Senior Data Engineer with 4+ years of extensive expertise in designing, implementing, and optimizing scalable ETL/ELT pipelines and large-scale data workflows. Proven ability to build and maintain robust data infrastructure, including data lakes, warehouses, and real-time streaming pipelines, within cloud environments (AWS, Azure, GCP). Proficient in data modelling, orchestration, and troubleshooting complex data systems to ensure high performance, reliability, and data integrity. Committed to establishing data governance best practices and developing automated solutions for operational efficiency.

RELEVANT SKILLS

Programming Languages: Python, SQL

Data Engineering & ETL: Apache Spark, PySpark, Databricks, Informatica, Snowflake, Teradata, Azure Data Factory, ETL/ELT Pipelines, SSMS

Big Data & Streaming: Apache Kafka, Spark Streaming, Data Modelling, Hadoop, Scala, Hive, Query Optimization

Cloud Platforms: AWS, Azure, Google Cloud Platform

DevOps & Automation: Docker, GitHub, CI/CD, Control-M

Data Visualization: Matplotlib, Seaborn, Plotly, Streamlit

PROFESSIONAL EXPERIENCE

Data Science Intern | Sports Media Inc, USA | **Jul 2025 – Present**

- Conducted market research and trend analysis on complex datasets to deliver actionable insights for strategic business intelligence projects.
- Utilized Google Analytics to analyse web traffic and user behaviour, identifying key trends to optimize digital marketing strategies.
- Provided data-driven analysis on social media campaigns to improve performance and increase fan engagement.
- Created interactive dashboards to track KPIs, enabling data-informed refinement of digital marketing campaigns.
- Managed data integrity by collecting, cleaning, and organizing datasets to support robust analytics.

Data Engineer | Wells Fargo, USA | **May 2024 – Jun 2025**

- Spearheaded 100+ ETL workflow automation via Azure Data Factory/Python, streamlining 15+ data feeds into Snowflake (Azure Blob Storage), reducing processing time by 40% & manual effort by 60%.
- Ensured data quality for 500K+ weekly records (Azure Databricks) & identified 20+ ingestion failures (Azure Monitor), boosting accuracy by 35% & reducing downtime by 50%.
- Designed & implemented 12+ real-time pipelines (Azure Stream Analytics into Snowflake), developing 5 scalable data models for 10TB+ from 8+ sources into Azure Synapse Analytics, increasing accessibility by 35%.
- Optimized Snowflake & Azure Synapse query performance, resolving 10+ critical production issues monthly, improving reliability by 30%.

Data Engineer | Infosys Ltd, India | **Jul 2021 – Jul 2023**

- Led data migrations of over 500TB from legacy IDW/Hive/Hadoop to Snowflake using Informatica PowerCenter and custom scripts, achieving 99.9% data integrity.
- Executed large-scale historical data loads, integrating 500+TB across Snowflake and Teradata using SSMS and Hadoop for efficient consolidation.
- Developed 1,000+ optimized SQL queries in Snowflake and Teradata for Informatica ETL, reducing processing time by 30%.
- Monitored 2,000+ daily data processing jobs via Control-M (Informatica/Snowflake), resolving 95% of failures within SLA.
- Resolved 200+ critical production incidents across Snowflake, Hadoop, and Teradata data pipelines, achieving a 98% resolution rate within 4 hours.

Data Engineer, | Wipro, India | **Jun 2020 – Jun 2021**

- Successfully migrated 1.2 petabytes of data from IDW to Snowflake and Snowflake to Google Cloud Platform (GCP), achieving 99.9% data integrity.
- Integrated data across Snowflake and Teradata platforms, improving data accessibility and reducing query response times by 35%.
- Developed and optimized 900+ SQL queries for ETL processes, streamlining data extraction and transformation.
- Addressed 180+ production incidents and defects, achieving a 98% resolution rate within SLA timeframes, ensuring minimal system downtime and consistent data availability for clients

PROJECTS

Baltimore City Crime Data Pipeline | *Python, SQL, Data Processing, ETL, Data Warehousing*

- Engineered a scalable ETL pipeline processing 500,000+ records from the Baltimore Police Department (2017–2022), enabling structured storage and efficient querying.
- Designed data ingestion workflows with Python and SQL, ensuring 99.9% data integrity while optimizing storage formats.
- Developed geospatial data processing workflows, integrating crime records with external datasets to enhance reporting accuracy by 95%.
- Automated data validation and transformation, reducing data inconsistencies by 40% and improving analytics efficiency.

Real-Time Voting Data Pipeline | *Apache Kafka, Spark Streaming, PostgreSQL, Docker, Control-M*

- Architected a real-time event-driven data pipeline, processing 1.5M+ voter records using Apache Kafka and Spark Streaming, ensuring <2s latency for election monitoring.
- Designed a fault-tolerant data ingestion framework, improving system uptime to 99.9% and ensuring consistent data availability.
- Integrated PostgreSQL for structured data storage, optimizing query performance and reducing response times by 75%.

Healthcare Data Pipeline & Processing System | *ETL, Data Governance, SQL, Informatica, Snowflake*

- Engineered an end-to-end ETL pipeline for processing 10,000+ daily patient feedback records, ensuring HIPAA-compliant data handling.
- Implemented data validation and transformation pipelines using Informatica, ensuring 99.9% accuracy in extracted healthcare insights.

Financial Risk Data Processing & Reporting | *SQL, Data Modelling, ETL, Streamlit, Snowflake*

- Developed a real-time financial data ingestion & processing system, handling \$50M+ in assets while ensuring secure & efficient data flow.
- Created data models for structured financial data storage, optimizing portfolio risk analysis and reducing data retrieval latency by 70%.
- Designed automated ETL workflows, ensuring real-time data refresh and 85% reduction in manual intervention.
- Built an interactive data visualization dashboard for real-time financial risk monitoring, leveraging structured datasets.

ACHIEVEMENTS & AWARDS

- Best Employee of the Year at Infosys for outstanding contributions to data engineering projects, optimizing workflows, and enhancing system efficiency.
- Led Promethean-2k19 Workshops, increasing local tech company participation by 50% and expanding student networking opportunities in technology careers through hands-on training and industry collaborations.

EDUCATION

Master’s in Data Science | **University of Maryland, Baltimore County (UMBC), Baltimore, MD** | (GPA: 3.81/4.0) | **May 2025**
Bachelor of Technology in Computer Science | **B.V. Raju Institute of Technology (BVRIT), Hyderabad, India** | (GPA: 3.33/4.0) | **Jun 2021**

CERTIFICATION

- Academy Accreditation – Databricks Lakehouse Fundamentals
- Snowflake Snowpro Core Certification
- Databricks Data Engineer Associate Certification
