SUMMARY

MS in Computer Science graduate with internship and academic project experience across AI, Web development, and Mobile applications. Skilled in OCR, API integration, and scalable application development with a strong foundation in Software Engineering and modern tech stacks.

CERTIFICATION

Python: — [Data Structures & Algorithms with LeetCode Exercises](#) - Udemy, Completed 07/2025

SKILLS

Programming languages and Web Technologies: - Python, Java, C/C++, JavaScript, HTML, CSS, React.js, Web3.js

Databases: - MongoDB, DynamoDB, PostgreSQL

Tools and platforms: - Docker, Jenkins, Git, Postman, Selenium, Android, Photoshop, Illustrator, Figma, Canva

Soft Skills: - Problem-Solving, Creativity, Leadership, Interpersonal Skills, Time Management, Self-Motivated, Hardworking

EXPERIENCE

Software Engineering Intern - PamTen Inc - NJ, USA

07/2025 - Present

- Collaborating on the development of an AI-enabled Staffing Portal, focusing on an AI-powered ATS Resume Builder module that automates the conversion of unformatted resumes into standardized, recruiter-friendly templates.
- Implementing features for resume parsing, quality metric evaluation, and structured formatting, using OCR techniques and AI-driven validation rules.
- Contributing to workflow automation for hiring stages, including candidate pipeline visualization, interview scheduling, and real-time status tracking with integrated notifications. Assisting in the delivery of core components such as resume formatting algorithms, standardized output templates, and automated tracking tools to improve recruiter efficiency and reduce manual effort.

Mobile Application Development Intern - Prolatech Private Limited - Bangalore, INDIA

12/2022 - 06/2023

- Collaborated with iOS and Android developers to design and deploy mobile apps to the App Store and Google Play.
- Translated requirements into functional features, optimized UI/UX with front-end teams, and reduced bug reports by 20% through testing and debugging. Participated in UI/UX reviews to ensure usability and design alignment.

EDUCATION

Luddy School of Informatics, Computing and Engineering - Bloomington, USA

08/2023 - 05/2025

Master of Science in Computer Science | CGPA: 3.5/4.0

- RELEVANT COURSEWORK: Applied Machine Learning, Elements of AI, Data Mining, Advanced Database Concepts, Computer Networks, HCI Design Theory, Design Strategy, Information Architecture, Human-computer interaction, Applied Algorithms, Engineering Cloud computing.

Dayananda Sagar College of Engineering - Bangalore, India

08/2019 - 06/2023

Bachelor of Engineering in Information Science and Engineering | CGPA: 9.0/10.0

- RELEVANT COURSEWORK: DBMS, DSA, Operating Systems, Cybersecurity, AI and ML, Software Engineering, Design and Analysis of Algorithms, DevOps, Object-Oriented Programming (OOP) with C++, Finite Automata and Formal Languages.

PROJECTS

Cognitive State and Classification using EEG Data (2024)

- Distinguished between mental stress and rest using EEG data. Assessed the performance of various models using raw EEG and extracted features.

Investigating Predictive Maintenance (2023)

- Identified and predicted potential failures in machine tools. Used the A1412020 Predictive Maintenance Dataset with models such as Logistic Regression, SVC Classification, KNN Classification, and Random Forest Classifier.

SkillX - Skill Verification System (2023)

- Used an AI image recognition model to verify candidate images. Led a team of four and spearheaded the creation of design documentation.
- Built the front end using React.js and Web3.js and Ethereum-compatible smart contracts using Solidity, to be deployed on the Polygon network.

All-in-One Home Automator (2022)

- Engineered an Arduino-based home automation system for reliable device communication, ensuring that no messages were lost or delayed.
- Developed source code using Arduino IDE and efficiently integrated hardware and software components.

"StyleWalks" Ecommerce Shopping Website (2021)

- Created an e-commerce website titled "StyleWalks", to sell footwear, using the MERN stack and DevOps tools for development.
- Developed the user interface for product and shopping pages, using Docker for deployment.
