

Nishi Patel

nishiptyl09@gmail.com | (740)-803-9488 | [LinkedIn](#)

SUMMARY

- **5 years** of experience in **software analysis, design, development and integration** of **object-oriented applications** and **web-based applications** using **Java/J2EE**.
- Proficient in UI design and exposure to developing web applications using **Angular, React, JavaScript, TypeScript, jQuery, HTML5, CSS, NodeJS**.
- Used **Node.js, React.js**, and **Vue.js** framework for developing **Single Page Applications (SPA)**.
- Proficient in developing **SOAP** and **RESTful web services** using the **Spring Framework** to enable seamless system integration.
- Implemented serverless architectures using **AWS Lambda** and **API Gateway**, reducing operational overhead and improving scalability.
- Configured and managed **CI/CD pipelines** with **AWS CodePipeline, CodeBuild, and CodeDeploy** for automated deployment processes.
- Used **Docker** container for eliminating a source of friction between development and operations.
- Proficient with SQL databases like **Oracle, MySQL, PostgreSQL** and knowledge in **NoSQL** databases like **MongoDB, DynamoDB**.
- Hands on experience with version control and configuration management tools like **Git**.

TECHNICAL SKILLS

Languages	Java, Python, C, C++
Java Technologies	Java, J2EE, XML Parsers, JDBC, Spring Framework, Java Bean, JMS, Web Services (REST, SOAP)
Web Technologies	Angular, React.js, Node.js, HTML5, CSS3, JavaScript, TypeScript, Asp.net, jQuery, PHP, XML
Cloud Technologies	AWS, Kubernetes, Red Hat OpenShift
Servers	Apache Tomcat, Oracle WebLogic Server
Databases	MySQL, PostgreSQL, MongoDB, DynamoDB
Methodologies	Agile
Version Control	Git, SVN, CVS
Testing	Junit, Jenkins, and Apache Camel
Other tools	Visual Studio, IntelliJ, Eclipse, Ansible, Docker

PROFESSIONAL EXPERIENCE

Delta Airlines, Atlanta, GA
Full Stack Java Developer

Oct 2022 - Current

- Developed responsive and interactive web applications using **Angular 14, TypeScript, HTML5, CSS3** ensuring seamless user experiences across devices as part of the **Payments team**.
- Led on-premises migration to **AWS**, designing and executing with **DynamoDB** for scalable database solutions.
- Built dynamic **Single Page Applications (SPAs)** by leveraging **Angular's** two-way data binding, dependency injection, and **RxJS** for reactive programming.

- Used **Node.js** for doing non-blocking design operations for server-side code.
- Developed and optimized data processing pipelines using **Python** and **Spark**, improving performance and scalability.
- Used **Swagger UI** registered micro services, monitored service health check from Spring Boot admin console.
- Strong understanding of supporting **JSON** based **RESTful web-services**, integrating with the front-end.
- Implemented **jQuery** to develop the widgets and to perform the client-side validations, UI centric Ajax behavior.
- Developed implementation logic using **Core Java** and **J2EE**.
- Involved in implementing **DAO** layers using **JPA standards** and **Hibernate API** interfaces.
- Wrote **SQL** queries, stored procedures, triggers, views, and enhanced performance with explain plans.
- Deployed **Spring Boot** based micro services into **Docker** containers using **Amazon EC2** container services.
- Used **AWS Cloud watch** in alerting, maintaining and monitoring of production and corporate servers/storage.
- Utilized **AWS Lambda** platform to upload data into **AWS S3 buckets** and to trigger more Lambda functions (Including **EC2**, **MongoDB** focusing on high-availability, fault tolerance, and auto-scaling).
- Utilized **CloudWatch** and **Dynatrace** for monitoring application logs, identifying performance issues, and troubleshooting in real-time, ensuring smooth operations and quick resolution of errors.
- Used **JMeter** as the load testing tool to test the performance of the overall service and **Splunk**, **Dynatrace** tool to trace the server logs while running the performance test with heavy load.
- Used **JIRA** to assign, track, report and audit the issues in the application.
- Use **Jenkins** with **Maven** to compile and build Microservices code and configure build triggers.
- Collaborated code with other developers using **GitHub** web-based repository. Worked on **Git** for version control.

Centene Corporation, Missouri, US

Aug 2021 – Oct 2022

Full Stack Developer

- Developed a **Java/J2EE** based web application with a complete **spring suite**, implementing **spring MVC** and other **spring modules**.
- Implemented **requirement analysis**, **design**, **development**, and **test management**. Performed **feasibility analysis** and applied long term strategies. Cost estimation of the project was generated.
- Administered the full lifecycle of software development and followed **Agile** methodology with **100%** on time delivery.
- Participated in **Scrum** related activities and daily scrum meetings.
- Built **web services** using **Spring WS framework** and web service clients injected through **DAO layer**.
- Used a **Microservice** architecture, with **Spring Boot** based services interacting through a combination of **REST** and **Apache Kafka** message brokers.
- Working on **RESTful** web services, exclusively consuming **REST API** with **Asynchronous behavior** and tested the API's using **Postman**.
- Involved in developing **UI** using **HTML5**, **CSS3**, **JavaScript**, **jQuery**, **Bootstrap**, **AJAX** and **Angular**.
- Created reusable service components for use across multiple modules using **Angular**. Selectors, Events, AJAX, and Dom Manipulation components were used in **Angular 4/6** directives, filters, and services.
- Created **Docker** images/container and integrated with **Spring Boot**.
- Implemented a **Single Page Web Applications (SPA)** and **Multi Page Web Application** based front end for displaying user requests like fetching, inserting, updating, deleting user records history using **JavaScript** and **Angular**.
- Used **Java 8** features like **Lambda**, **Stream API**, and functional interface.
- Deployed **Node.js** application on **AWS** and implemented **CI/CD** pipelines for smooth deployment.
- Used **AWS Cloud watch** in alerting, maintaining, and monitoring of production and corporate servers/storage.
- **AWS Lambda** was used for Serverless implementations, with functions triggered when database tables were updated. Lambdas was used in conjunction with **SNS** and **S3** to generate multiple data formats from a single source.
- Worked with **NoSQL Database** named **MongoDB** to store claims data to do data analysis helpful for the organization to monitor and analyze the claims trend.
- Used **Jenkins** with **Maven** to Compile & Build **Microservices**, code and configure **Build Triggers**.
- Worked on functional **Automation Testing** using **Selenium Web Driver** and **Selenium Remote control**.

- Focused on **Test Driven Development (TDD)** thereby creating detailed **JUnit** tests for every single piece of functionality before writing the functionality.
- Collaborated with developers using **GitHub** for code management and **Git** for version control.

Zensar Technologies, IN

Sep 2020 – June 2021

UI Developer

- Designed and implemented robust web applications using **ASP.NET MVC**, which ensures scalability.
- Designed and implemented **RESTful APIs** using **Spring Web**, enabling seamless communication between services.
- Built responsive UI pages using **HTML5**, **Angular 6**, **Bootstrap**, **CSS3**, **JavaScript**, **jQuery**, and **Node.js**.
- Created reusable, modular components and implemented state management using **NgRx** for improved application scalability.
- Created and maintained design systems in **Figma**, ensuring consistency in typography, color schemes, and component usage across projects.
- Built reusable components with **React Hooks** and **Context API**, streamlining the codebase and enhancing state management for Zensar Technologies' client dashboard.
- Configured and maintained the **Spring Application Framework's IOC container**.
- Built and consumed **RESTful APIs** using **ASP.NET Core**, which enabled integration with third-party systems.
- Implemented the **MVC architecture using Struts framework**.
- Utilized **Spring Data JPA** and Hibernate to streamline database operations, optimize queries, and manage complex entity relationships for customer data platforms.
- Converted the **HTML** Pages to **JSF** Tag Specific Pages.
- Creating the message from the uploaded information and transaction data and sending this information using **SOAP**.
- **Maven** was used as a build tool and **SVN** as a version control tool.

Cito Info Tech, IN

May 2019 - Nov 2019

Web Developer Intern

- Completed full responsive designs of over **30 web pages** to enhance visuals, improve navigation, boost search engine rankings, and increase site traffic by **30%** by creating user-friendly visuals and features with technologies such as **HTML5**, **CSS**, and **JavaScript**, **Bootstrap** and **Angular**.
- Developed scalable backend solutions using **Node.js**, handling complex server-side logic and **RESTful API** integrations.
- Collaborated on APIs and managed software workflow using **Scrum** methodology increasing task success rate by **25%**.
- Supported the implementation of modern CSS frameworks like **Bootstrap** and **Tailwind CSS** for visually appealing and responsive layouts.
- Participated in system design and prepared **UML diagrams** and Class diagrams for **DTO objects and actions**.
- Used **Spring Framework** for the implementation of the application.
- Wrote script for **AJAX** implementations on the website.
- Conducted **user testing** and provided feedback for UI/UX enhancements to improve application usability.
- Worked alongside developers to manage code using **GitHub** and utilized **Git** for version control.

EDUCATION

Master of Engineering in Computer Science

GPA: 3.58

University of Cincinnati, Cincinnati, OH, United States

Bachelor of Technology in Information Technology

GPA: 3.9

Charotar University of Science & Technology, Gujarat, India

Relevant Coursework: Data structure and Algorithm, Design and Analysis of Algorithms, Python Programming, Java Programming, Software Engineering, Advanced web technologies, Computer Networks, Database Management System
