Profile Summary

Aspiring Data Analyst skilled in SQL, Excel (pivot tables, charts), Python, Power BI/Tableau. Experienced in gathering, cleaning, and analyzing data to generate actionable insights and dashboards. IBM-certified with a background in Chemistry and strong problem-solving, data storytelling, and communication skills.

Work Experience

Machine Learning Intern (Remote)

Aug 2024 - Sept 2024

Prodigy Infotech

- Worked on customer segmentation and prediction models using real-world datasets.
- Learned the full ML pipeline: data cleaning, exploratory data analysis (EDA), feature engineering, and model evaluation.
- Gained hands-on skills in Python, scikit-learn, and basic ETL workflows to support data-driven recommendations.

Skills

- **Programming & Tools:** Python, SQL, Excel (Pivot Tables, Charts), Power BI, Tableau, Git
- **Data Cleaning & Quality:** Data validation, preprocessing, anomaly detection, data profiling
- **Analysis & Modeling:** Exploratory data analysis (EDA), insight generation, regression, classification, clustering
- **Visualization & Reporting:** Dashboards, KPI metrics, data storytelling, visual reporting for business intelligence
- **Soft Skills:** Problem-solving, attention to detail, communication, teamwork, time management

Projects

Sales Insights – Brick & mortar business [Tableau | SQL]

[\[Github Link\]](#)

- Extracted and analyzed regional sales trends and underperforming products using SQL.
- Built an interactive Tableau dashboard to monitor KPIs such as revenue, units sold, and growth.
- Enabled data-driven planning that forecasted a potential 7% revenue increase.

Revenue Insights in Hospitality Domain [PowerBI | Excel]

[\[Github Link\]](#)

- Built a Power BI dashboard to visualize booking trends, cancellations, and revenue across digital channels.
- Leveraged Excel for initial data cleaning and transformation, and implemented measures to improve occupancy insights.
- Simulated real-world reporting scenarios, enabling a forecasted 20% revenue recovery.

Customer Segmentation Using K-means Clustering [Python | PowerBI]

[\[Github Link\]](#)

- Segmented retail customers into 5 customer groups based on purchasing behavior using K-Means clustering.
- Performed exploratory data analysis, data visualization and K-Means clustering for customer segmentation.
- Delivered insights through an interactive Power BI dashboard, supporting data-driven decision-making.

Customer Churn Prediction – IBM Dataset [Python/ML]

[\[Github Link\]](#)

- Predicted customer churn for an e-commerce platform to help reduce attrition and improve retention strategies.
- Evaluated multiple classifiers to identify the best-performing model.
- Enhanced churn prediction accuracy to 80% by leveraging data preprocessing, feature engineering, and model tuning.

Spotify Music Recommendation System

[\[Github Link\]](#)

- Built a music recommendation system using K-Nearest Neighbors (KNN) to suggest similar songs based on features.
- Performed data cleaning and exploratory data analysis (EDA) using Python to prepare and understand the dataset.
- Deployed the project using Streamlit and Flask, allowing users to get a simple web interface.

Education

B.Sc. in Chemistry

Aug 2018 - July 2021

Minor in Mathematics, Maitreyi College, Delhi University, Delhi, GPA: 8.4/10

M.Sc. in Chemistry

Sep 2021 - Aug 2024

Hansraj College, Delhi University, Delhi, GPA: 6.68/10

Certifications

IBM Data Science Professional Certificate

[\[Link\]](#)

Kaggle Competitor – Participating in Data Science & ML challenges (e.g., Backpack Prediction)
