I am a graduate in Informatics from Sekolah Tinggi Teknologi Cipasung, actively involved in campus organizations and activities. I have a strong interest in Artificial Intelligence, demonstrated through my internship experience and projects in data mining, data science, machine learning, and ui/ux. I am eager to learn new things, creative, innovative, disciplined, responsible, and able to work well in a team.

EDUCATION

Informatic, Sekolah Tinggi Teknologi Cipasung

Sept 2020 – Sept 2024

Current GPA: 3,18/4.00

WORKING EXPERIENCES

Admin Marketplace - Full Time | Bhubu Reload

August 2023 – Oct 2023

- Managing and maintaining marketplace accounts, including uploading products with engaging descriptions and photos, as well as ensuring prices and stock are always up-to-date.
- Handling incoming orders, ensuring smooth packaging and shipping processes, and promptly responding to customer inquiries or complaints professionally.
- Increased Bhubu Reload online sales by 20% through product optimization strategies and responsive customer engagement.

Content Writer - Internship | PT Wahana Televisi Tasikmalaya

July 2023 – August 2023

- Developed culinary news scripts for Mister Bebek by researching and referencing videos from Radar TV Tasik's YouTube channel, with a view count of 189.
- Created detailed content briefs for Instagram posts on Radar TV Tasik, optimizing engagement and consistency.
- Authored and uploaded articles to Radar TV Tasik's website, ensuring timely and relevant content for the audience and crafted compelling and creative content tailored to platform and audience goals, enhancing overall user experience.

Artificial Intelligence & Data Analysis | PT. Orbit Ventura Indonesia

August 2022 – Jan 2023

- Selected as one of over 270 students from a pool of more than 3,700 candidates to study and apply knowledge and skills in Artificial Intelligence over a period of 5+ months.
- Studied the foundations of Artificial Intelligence (AI), including algorithms, machine learning, and AI domains such as Natural Language Processing (NLP), Computer Vision, and Data Science, as well as the application of AI in daily life and various industries.
- Actively engaged in a group project with students from other universities, working on a skin cancer detection application.

Administration Staff - Full Time | Smk Riyadlul Tauhid

Mar 2020 – Okt 2022

- Managing school administrative documents, including filing student data, correspondence, and reports.
- Organizing and maintaining the schedule of school activities, meetings, and other important events.
- Recording and updating attendance data, student grades, and school financial records.
- Assisting the administrative needs of students, teachers, and parents, and addressing inquiries or requests for information related to school administration.
- Coordinating with other staff to ensure smooth school operations and assisting in the preparation of official documents.

ORGANIZATIONAL EXPERIENCES

Inspiration Tutor | Gerakan Mengajar Desa

May 2022 – Present

- Served as an inspirational tutor, motivating and encouraging students in rural areas through the Gerakan Mengajar Desa program.

- Developed and implemented creative and effective teaching methods to enhance students' understanding of various subjects.
- Collaborated with fellow tutors and local communities to design educational activities that cater to students' needs and their environment.

Delegasi Belize | International Model United Nations Associations (IMUUNA) (*Online*) August 2022

- Represented Belize as a delegate in the International Model United Nations Associations (IMUUNA) conference, engaging in discussions on global issues and diplomacy and researched and analyzed Belize's positions on various topics, preparing position papers and speeches to effectively advocate for the country's interests.
- Collaborated with other delegates to negotiate resolutions and engage in constructive debates, enhancing skills in diplomacy and conflict resolution and developed a deep understanding of international relations, the UN's role, and the importance of multilateral cooperation in addressing global challenges.
- Improved public speaking and critical thinking skills through participation in committee sessions and delivering arguments in front of peers.

Head of Community Service Division | Himpunan Mahasiswa Informatika Jan 2022 – May 2022

- Led the Community Service Division of the Himpunan Mahasiswa Informatika at STT Cipasung, planning and implementing outreach programs that directly impact the local community.
- Conducted social activities with the community to enhance welfare and social awareness, such as community service events and fundraising activities.
- Managed an informatics study club aimed at improving students' knowledge and skills in the field of information technology.
- Implemented the Go To School program at several schools to provide education and motivation to students about the importance of education and technology.

PROJECT

Skin-Cancer | PT. Orbit Ventura Indonesia Des 2023 – Jan 2023

- I successfully developed an AI application for skin cancer detection using HTML, CSS, JavaScript, and Python, where I served as both data modeler and UI designer. I was responsible for building an accurate detection model with Python and ensuring a user-friendly interface with HTML, CSS, and JavaScript.
- Combining precise data modeling with an intuitive interface design, this application provides an optimal and relevant user experience to support digital medical needs, reflecting my ability to develop innovative and effective AI-based solutions.

Catatan Perjalanan (UI/UX) | Sekolah Tinggi Teknologi Cipasung July 2022

- Designed a UI/UX for a travel journal application aimed at documenting daily activities and essential needs
- The app was specifically created for pandemic travel tracking, allowing users to log key details, including time, visited locations, and body temperature, to support health monitoring.

Analyzing Student Dropout | Sekolah Tinggi Teknologi Cipasung Oct 2024

- Experienced in performing data processing, including data cleansing and transformation, using Microsoft Excel to prepare datasets for analysis.
- Utilized RapidMiner to apply Naive Bayes and Decision Tree C4.5 algorithms, achieving an accuracy of 88.46% and 82.53% respectively, demonstrating strong data analysis and predictive modeling skills.

SKILLS & OTHER EXPERIENCE

Soft Skill: creative, innovative, disciplined, responsible, and able to work well in a team.

Hard Skill: python, microsoft excel , data analyst, Artificial intelligenci, ui/ux

Language: Indonesia, English

Award/Activities: IGN Campus Ambassador by International Global Network

Certification: Artificial Intelligence - Python by Orbit Future Academy
