WORK EXPERIENCE

Kantar Group, Bengaluru, India: *Business Analyst (Client: MAZDA, USA)*

Sept 2021 – Dec 2023

- Reporting to stakeholders at weekly monthly data using Deep dive, Ad-hoc QA reports at multiple granular levels and contributed extensive support to meet needs of clients
- Ensured deliverables met expectations in terms of scope, speed, cost accuracy, and quality from initial phase till final project delivery
- Analyzed and validated customer feedback data utilizing Facebook, salesforce, Twitter, YouTube sources and improved the customer acquisition by 30% using Ad-hoc and PDCA quality checks
- Utilized Excel, Microsoft Power BI, and SQL for generating weekly, monthly, and quarterly reports, and dashboards to develop a business insight for better decision making which helped improve the efficiency by 50%
- Assisted in building ETL automated operation to manage large volumes of data to reduce runtime by 40%
- Created a flow Pipeline and administered a relational database for one of the largest Japanese automobile manufacturers situated in United States, as well as KPI'S to analyze brand value and brand recognition in the worldwide market
- Handled data from 5 different sources at various levels by working cross functionally, demonstrating end-to-end management from ideas to final delivery
- Completed a data warehousing project using AWS (Amazon Redshift) and Python by fully streamlining and automating integrating talend with SQL server which impacted the process by 60%

SKILLS

Data Analytics Software: My SQL, Advanced Excel, Talend, Amazon Redshift, Microsoft Power BI, Tableau

Interpersonal Skills: Competent, Innovative, Time Management, Collaborative, Teamwork, Project Management, Analytical skills

Hobbies: Photography, Videography, Content Creation, Badminton, Volleyball

PROJECTS

Hotel Database Management System

Dec 2023 – May 2024

- Built a centralized database for Hotel Hub, making it easier to manage reservations, payments, customer details, and other key hotel operations.
- Improved the booking process by adding features for dining and transportation reservations, and made it possible to book directly through the website and mobile app.
- Ensured hotels always had the supplies they needed by managing inventory and working with suppliers, which helped keep operations running smoothly.
- Created complex SQL queries to pull important data, helping the team understand room availability, customer feedback, revenue, and event details.
- Enhanced tracking of payments, invoices, guest reviews, and event schedules, leading to better service quality and transparency.

ETL driven Manufacturing Performance Analysis

Jan 2023 – Aug 2023

- Determined KPIs; Performed ETL using Python and MS SQL and created Data source flow diagrams for the EOL process
- Developed analytical graphs using Tableau and created a dashboard for the manufacturing engineering team Used Python, Recurrent Neural Networks, Multilayer Attention mechanism to get desired outputs
- Recommended improvements and provided improvement strategies to management, accelerating production flow by 36%

Exploratory Data analysis to predict COVID-19 Hospitalizations using Mobility Data

July 2021 – April 2022

- Developed Predictive Models using machine learning methods Carried out Exploratory data analysis using KNN, Lasso, Ridge, Linear Regression, and Decision Trees
- Validated with the help of LOOCV, K-fold, and Validation set approach and achieved Test RSME of 2325

Sleep Apnea Detection Using Neural Networks

July 2020 – April 2021

- Created a neural network to detect presence of Sleep Apnea using ECG and Respiratory signals
- Contributed a ReactJS based user interface with fire base as back end to perform inferences on the signal and publish the results
- Used Python, Recurrent Neural Networks, Multilayer Attention mechanism to get desired outputs
- Trained a model that detects sleep apnea with appreciable results which serves as a indicator/preliminary test to the patient weather or not to consult a doctor

EDUCATION

Northern Illinois University, Dekalb, Illinois, USA [CGPA: 3.6/4]

Jan 2024 - Present

MS in Management and Information Systems

Specialization: Business Analytics

Amrita Vishwa Vidyapeetham, Coimbatore, India [CGPA: 3.3/4]

Aug 2017 – June 2021

Bachelor of Technology in Electronics and Communication Engineering

Specialization: Electronics & Data Analysis

ACHIEVEMENTS

Photographer at Amrita University Photography Club

Aug 2018 – May 2021

- Engaged actively in various university events and technical festivals, capturing numerous high-quality photographs for university documentation
- Photographed a variety of sports events both on and off campus
- Recipient of the best photographer Award from university, conferred by the college Dean

Technical head in National Service Scheme (NSS)

Aug 2018 – May 2021

- Organized social events and rallies on campus to promote environmental and economic consciousness's
