

NITHESH KUMAR REDDY CHITYALA

Denton, Texas | +1 314-217-7631 | chityalanithesh@gmail.com | [LinkedIn](#)

SUMMARY

Data Engineer with **3+ years** building scalable **ETL pipelines**, **stream processing**, and **cloud-native data solutions** across financial services and energy sectors. Highly proficient in **Python**, **Spark**, **PySpark**, **Kafka**, and **AWS**, **Azure**, **GCP** platforms. Skilled in processing **90M+ daily records**, reducing **cloud costs** by 30%, enabling **GDPR**, **HIPAA**, **SOX compliance**, and developing **data quality and reliability frameworks** that ensure robust and audit-ready pipelines. Strong collaborator able to translate complex **business requirements** into optimized **data architecture** and **automated workflows** that accelerate decision-making.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL (T-SQL, PL/SQL), PySpark, Scala, Bash, DAX

ETL & Cloud Platforms: Azure Data Factory, SSIS, Synapse, Databricks, Apache Airflow, dbt, AWS Glue, GCP Dataflow, Prefect, Luigi

Data Warehousing & Modeling: Snowflake, Delta Lake, Star Schema, Dimensional Modeling, NoSQL (MongoDB, DynamoDB, Cosmos DB), Hadoop, Hive, Presto/Trino

Streaming & Messaging: Kafka, Spark Streaming, Flink, AWS Kinesis, GCP Pub/Sub, Salesforce Data Cloud APIs

Reporting & Visualization: Power BI (DAX, Power Query), Tableau, Looker, Grafana, Azure Analysis Services

Governance & Compliance: Data Governance, GDPR, HIPAA, SOX, Great Expectations, PyTest, Collibra, Alation

DevOps & CI/CD: Azure DevOps, Jenkins, GitHub Actions, Terraform, Docker, Kubernetes, Ansible, CI/CD Pipelines

Monitoring & Logging: Azure Monitor, AWS CloudWatch, Prometheus, ELK/Elastic Stack, Splunk

Methodologies & Tools: Agile, Scrum, JIRA, Confluence, Stakeholder Communication, Cross-Functional Collaboration

Analytics & Machine Learning: ML Pipelines, Scikit-learn, TensorFlow, DataOps, MLOps, BigQuery ML

PROFESSIONAL EXPERIENCE

Data Engineer | BNY Mellon | USA

April 2025 – Present

- Engineered **Spark** and **Databricks** pipelines processing **90M+ daily transactions**, accelerating report readiness by 8 hours weekly.
- Automated **PySpark** and **dbt** workflows with **Airflow** and **Azure Data Factory**, stabilizing 12 dashboards with 100% data quality checks.
- Provisioned **AWS Glue** via **Terraform** in **Jenkins CI/CD**, reducing batch runtimes by 40 minutes; maintained 100% SLA for 25+ services.
- Developed **Python** anomaly detection integrated with **Azure Monitor** and **CloudWatch**, reducing downtime by 90% and detection time to under 5 minutes.
- Collaborated with 7+ cross-functional teams for **stakeholder communication** and translating **business needs**, achieving zero audit revisions under **GDPR**, **HIPAA**, and **SOX**.
- Optimized **data pipelines** and **queries**, reducing **cloud costs** by 30% and increasing **query speed** by 25%.
- Spearheaded enterprise-grade **data governance frameworks**, boosting **audit readiness** and **reporting reliability**.
- Enhanced **Azure Synapse** query performance by 25% for **financial analytics**, enabling on-demand executive reporting.
- Led migration of legacy reporting systems to **cloud data lakes**, boosting **scalability** and **cutting maintenance costs by 25%**.

Data Engineer | Adani Group | India

April 2020 – December 2022

- Built **Databricks** and **PySpark ETL pipelines** processing **80M+ daily records**; batch latency dropped by 45 minutes.
- Optimized **Azure Data Factory**, **Airflow**, and **dbt** workflows, cutting nightly runtimes by 2 hours.
- Developed **Jenkins CI/CD** with **GitHub Actions** and **Terraform**, maintaining 120+ days of perfect SLA uptime.
- Delivered **Tableau** and **Power BI** dashboards from **Snowflake** and **Delta Lake**, surfacing 18+ KPIs and saving analysts 10+ hours weekly.
- Tuned **PostgreSQL** and **SAP HANA** queries supporting 12 dashboards, reducing query times by 20 seconds, and led **ERP data integration/migration** efforts.
- Documented 150+ pages of **workflows** and **data dictionaries**, accelerating onboarding by 2 weeks and enhancing **audit preparedness**.
- Standardized **KPIs** across enterprise data, eliminating 80+ duplicates and improving **reporting consistency**.
- Led **cross-functional teams** to harmonize **data models** and enforce **compliance policies**.
- Automated data lineage tracking using **Apache Atlas**, improving traceability and compliance monitoring enterprise-wide.
- Conducted **training workshops** for analysts and **junior engineers**, increasing self-service tool adoption and boosting productivity by **30%**.

PROJECTS

- Designed and managed global streaming pipelines using **Spark** and **Kafka**, delivering near real-time analytics across multiple **cloud platforms**. Achieved 99.9% uptime, accelerated dashboard refresh by 40%, saving \$300K annually, and enabled seamless scalability.
- Developed automated data quality frameworks with **Great Expectations** and **PyTest**, reducing validation errors by 98% and enabling real-time fraud detection support. Integrated with **Airflow** pipelines and **Azure Monitor**, improving compliance reporting.

EDUCATION

Master of Science in Information Systems | USA

Saint Louis University

January 2023 – December 2024

Bachelor of Technology in Electronics and Communication Engineering | India

Madanapalle Institute of Technology & Science

July 2018 – June 2021

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate (DP-203)
- AWS Certified Data Engineer – Associate (DEA-C01) – Amazon Web Services & SnowPro Core Certification
