

NITHIN MOTE

DATA ANALYST

+1(470)-417-6968 | nithin.mote96@gmail.com | [Linkedin](#) | Atlanta, GA

SUMMARY

Results-driven Data Analyst with 5+ years of experience in healthcare and financial analytics, leveraging SQL, Python, R, and cloud platforms to deliver scalable insights. Proven expertise in ETL pipelines, predictive modeling, and anomaly detection, driving measurable impact such as 22% fraud reduction, 18% better forecasting accuracy, and 50% faster reporting cycles. Adept at building AI-powered dashboards, integrating NLP for unstructured data, and optimizing Snowflake & Redshift data warehouses to support compliance with HIPAA and financial regulations.

EXPERIENCE

Humana, USA | Data Analyst

Jan 2025 Current

- Designed HIPAA-compliant ETL workflows in AWS Redshift & Snowflake, scaling reporting pipelines across multiple healthcare programs and reducing manual data integration effort by 45%.
- Built predictive models on pharmacy utilization datasets using Python & scikit-learn, improving forecast accuracy by 18% and reducing unnecessary inventory spend.
- Conducted time-series forecasting of patient visits, optimizing staff allocation and reducing average wait times by 20% in high-volume facilities.
- Worked with Flask and Fast API to build real-time AI/ML model APIs
- Leveraged Databricks + Delta Lake on AWS for real-time claims data pipelines, ensuring executives had up-to-the-minute insights into operational decisions.
- Developed AI-driven anomaly detection in Power BI dashboards, improving fraud detection efficiency by 28% in claims analysis.
- Automated reporting processes with parameterized SQL stored procedures and window functions, cutting generation time from 3+ hours to <15 minutes.
- Streamlined ETL automation using dbt + Airflow, increasing pipeline reliability and processing efficiency by 35% across Snowflake and BigQuery environments.
- Collaborated with Medicaid compliance teams to ensure data pipelines adhered to regulatory standards, mitigating compliance risks and enabling faster audits.
- Mentored junior analysts in SQL optimization and BI dashboard design, raising team reporting efficiency by 25%.

Capefox Technologies, India | Data Analyst

May 2018 - Jul 2023

- Engineered real-time anomaly detection scripts in SQL that flagged suspicious financial transactions, reducing fraud-related losses by 22%.
- Automated daily financial reporting workflows with Python scripts & Excel macros, cutting manual effort by 50% and accelerating month-end close by 2 days.
- Built ETL pipelines in Azure SQL & Snowflake to unify trading, payments, and client portfolio data, increasing reporting accuracy by 40%.
- Applied NLP techniques to parse unstructured financial reports and analyst notes, improving research productivity and supporting investment strategies.
- Implemented Row-Level Security (RLS) in Power BI, tailoring dashboard access to specific user groups while maintaining data security.
- Created executive dashboards in Tableau & Power BI tracking portfolio performance, credit risk, and liquidity KPIs, enabling faster response to market volatility.
- Optimized SQL queries for trading dashboards, reducing execution time by 35% and ensuring real-time market data availability.
- Partnered with DevOps teams to modernize BI reporting infrastructure on Azure, reducing infrastructure costs by 18%.
- Supported Agile sprints for new financial analytics products, ensuring business requirements were translated into data pipelines and visualizations effectively.
- Led data quality initiatives across multiple financial systems, reducing data discrepancies by 30% and strengthening trust in reporting outputs.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Java, DAX

Data Tools & Platforms: Tableau, Power BI, Databricks, Spark SQL, SAP, Snowflake

ETL Tools: SSIS, Informatica, Talend, Azure Data Factory, Power Automate Alteryx, Tableau Prep, Looker, SAP Data intelligence, CDS views

Machine Learning: Scikit-Learn, NumPy, Pandas, Regression Analysis, Predictive Modeling

Data Visualization: Tableau, Power BI, Dataiku, Excel (VBA Macros, Power Query)

Cloud Platforms: Azure (Data Factory, SQL Database, Blob Storage), AWS, SAP ANALYTICS CLOUD, salesforce

Data Warehousing: SQL Server, Snowflake, Databricks, Delta Lake, SAP Datasphere, SAP BW/4HANA

Advanced Excel: Data Modeling, Pivot Tables, VBA Macros, Power Query

EDUCATION

St. Francis College, New York, USA

Master of Science, Information Technology and Administrative Management

Coursework: Business Analytics | Database Management System | Fundamentals of Data Science | Data Modeling | Data Warehousing | Data Mining | Big Data Management | Information Visualization | Data Automation

CERTIFICATIONS

AWS Certified Data Engineer - Associate

Microsoft Certified: Azure Data Engineer Associate
