PROFESSIONAL EXPERIENCE

Casa Visco Finer Foods

Software Developer

Schenectady, NY

July 2024 - July 2025

- Built **Spring Boot REST APIs** to replace manual order-entry workflows, reducing processing time by **75%** (from 8+ hours/week to 2 hours/week) and eliminating **90%** of data-entry errors.
- Developed a **React** dashboard for real-time inventory tracking across 100+ SKUs, increasing stock visibility and helping the operations team reduce stockouts by **30%**.
- Automated weekly sales reports (previously compiled in Excel) via **AWS Lambda + S3 + CloudFront**, cutting report-generation time from **4 hours** to under **5 minutes**.
- Designed and deployed backend and frontend applications on **AWS EC2 and S3**, and reduced hosting costs by **20%** through right-sizing instances.
- Implemented **CI/CD pipelines** with GitHub Actions to AWS CodeDeploy.
- Collaborated with business stakeholders to translate requirements into product features, contributing to a **15%** uptick in repeat orders through improved order-tracking transparency.

RAID, Artificial Intelligence and Data Science Lab

Graduate Research Assistant - Web Development Team

Arlington, TX

Jan 2023 – May 2023

- Revamped the university's reimbursement portal front end using **React**, integrating seamlessly with a **Java Spring Boot** backend to automate expense claim approvals, resulting in a **30% reduction in processing time**.
- Integrated **Python, PostgreSQL**, and **RESTful APIs** with the **React** frontend to streamline data handling, **improving retrieval speed by 40%** and increasing the finance team's **operational efficiency by 25%**.
- Improved system scalability and reporting** by deploying **microservices on AWS with Docker and Kubernetes**, leading to a **30% increase in performance** and **20% faster report generation**.

PROJECTS

<https://github.com/NithinGopal64>

Scalable React & Spring Boot E-Commerce Website

- Developed a responsive, high-performance e-commerce platform using **React.js** and **Spring Boot**, featuring an **interactive product carousel, real-time filtering, sorting, and pagination**, and reduced product load time by 45% and improved search efficiency by 35%.
- Integrated Razorpay** for secure online payments, implemented **JWT-based authentication**, built a seamless cart and checkout experience, and **ensured 100% secure transactions** and **reduced checkout latency by 40%**.
- Applied **React hooks**, functional components, and **React Router** for dynamic navigation, enhancing maintainability and page responsiveness.

Airbnb-Inspired Platform with Booking Management

- Developed a full-stack Airbnb-style platform using **React**, **Spring Boot 3**, and **PostgreSQL**, enabling real-time **booking management for travelers** and **reservation control for landlords**, **reducing booking processing time by 50%**.
- Used **React Router v6** to implement smooth client-side routing and managed complex booking and filter states using **React Context API**.
- Utilized **Tailwind CSS** to create a responsive, mobile-first design system that automatically adapts layouts to screen sizes, and created custom hooks to abstract logic for **API calls and authentication**.

TECHNICAL SKILLS

Programming Languages:

Python, Java, JavaScript (ES6+), TypeScript, HTML 5, CSS,

Application development:

Spring Boot, Spring Security, Spring AOP, Spring IOC, React.js, Redux, React Router

Database:

Oracle SQL, MySQL, SQLite, MongoDB, PostgreSQL.

Frameworks and Libraries:

Pandas, NumPy, Sci-kit, Matplotlib, Open CV, Django, Flask, Postman.

Cloud Services:

CI/CD pipeline on AWS, Azure, IAM, Apache Kafka, Kubernetes, Docker, Terraform.

EDUCATION

University of Texas at Arlington, Arlington, TX

August 2022 - May 2024

Master of Science in Computer Science

CGPA – 3.5

Related courses: Cloud Computing, Machine Learning, Data Mining, Distributed Systems, Advanced Software Engineering, Numerical Methods

SSN College of Engineering, Kalavakkam, India

July 2018 - May 2022

BTech in Information Technology

CGPA – 8.4
