

Nithin Reddy Komatireddy

Java Full Stack Developer

OK | +1 (572)-208-2843 | Nithinreddy6140@gmail.com | [LinkedIn](#)

SUMMARY

Java Full Stack Developer with 3+ years of experience in developing, and maintaining high-performance web applications across the full software development lifecycle. Proficient in Java, Spring Boot, and modern front-end frameworks such as Angular and React, with a strong foundation in RESTful API design, microservices architecture, and relational databases. Adept at translating complex business requirements into scalable technical solutions, collaborating in Agile teams, and delivering robust software with an emphasis on code quality, performance, and maintainability. Demonstrates a consistent track record of contributing to mission-critical projects, optimizing system efficiency, and elevating user experience through thoughtful engineering.

SKILLS

Programming Languages: Java (8/11/17), JavaScript, TypeScript, SQL, HTML5, CSS3, Bash
Backend Technologies: Spring Boot, Spring MVC, Spring Security, JPA, RESTful APIs, Microservices, SOAP Web Services
Frontend Technologies: Angular (v2+), React.js, Redux, Bootstrap, Material UI, jQuery, AJAX, JSON, JSP/Servlets
Database Technologies: MySQL, PostgreSQL, Oracle DB, MongoDB, Redis, JDBC, PL/SQL, Stored Procedures,
Cloud & DevOps Tools: AWS (EC2, S3, RDS, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, GitHub, GitLab, Maven, Gradle, Terraform
Testing & Debugging: JUnit, Mockito, Selenium, Postman, Swagger, Log4j, SonarQube
Development Tools & IDEs: IntelliJ IDEA, Eclipse, Visual Studio Code, Postman, Fiddler, Jira, Confluence, Bitbucket
Development Practices: Agile & Scrum Methodologies, Test-Driven Development (TDD), Behavior-Driven Development (BDD), Continuous Integration/Deployment (CI/CD), SDLC, Version Control, Code Review, Clean Code Principles, Design Patterns
Soft Skills: Problem Solving, Logical Thinking, Critical Thinking, Communication, Adaptability, Time Management, Cross-Functional Collaboration, Conflict Resolution, Feedback Handling

EXPERIENCE

Java Full Stack Developer, Charles Schwab | OK **Jul 2024 – Present**

- Designed and implemented 12+ microservices using Java 11, Spring Boot, and Spring Cloud to support real-time trade execution, improving system modularity and reducing deployment rollbacks.
- Integrated authentication workflows using Spring Security and OAuth2, supporting secure access for over 500,000 active users and ensuring FINRA and SEC compliance.
- Automated containerized deployments using Docker and Jenkins, cutting manual deployment time by 80% and reducing environment inconsistencies across dev, staging, and production.
- Developed Swagger-documented RESTful APIs for account summary, transaction history, and trade confirmations, supporting over 150,000 API calls per day with <200ms average response time.
- Utilized AWS Lambda and S3 to implement a real-time document upload service, reducing latency by 22% for end users submitting sensitive compliance documents.
- Integrated system health dashboards using Spring Actuator and CloudWatch metrics to proactively detect and resolve 95% of errors before they reached production.
- Implemented test automation using JUnit and Mockito, achieving 92% unit test coverage and reducing bug regression rate.
- Worked in a Scrum team with two-week sprints and participated in daily stand-ups, sprint planning, and code reviews, contributing to 30+ feature releases in under 12 months.

Java Full Stack Developer, Mphasis | India **Jan 2022 – Jul 2023**

- Engineered over 10 RESTful APIs using Spring Boot for a digital loan origination platform, enabling 100K+ users to apply and track loans with real-time updates.
- Developed reusable UI components in Angular 11 for back-office operations portal, reducing UI development time for new screens by 45% and boosting efficiency of customer support agents.
- Implemented Redis for caching user session data and frequently accessed queries, reducing backend response times by 28% and improving SLA compliance.
- Built CI/CD pipelines using GitLab CI, Docker, and AWS EC2 for deploying services with zero-downtime updates across QA and production environments.
- Wrote stored procedures and PL/SQL scripts for customer onboarding, reducing manual intervention and data duplication.
- Managed API documentation using Swagger and integrated it with Postman collections for QA and stakeholder testing, decreasing onboarding time for new developers.
- Identified and fixed over 40 production-level bugs by analyzing logs using Log4j and setting up alerts in SonarQube for static code violations.
- Actively participated in sprint planning, retrospectives, and backlog grooming, contributing to consistent delivery of sprint goals across 20+ sprints.

Java Developer, Boost FinCrop Group | India **Jun 2020 – Dec 2021**

- Developed back-end modules using Java, Spring MVC, and Oracle DB for regulatory and tax filing reports used by 100+ mid-sized financial institutions.
- Enhanced the report generation engine to use batch processing and JDBC optimization, improving large dataset processing speed by 35% and reducing memory usage.
- Designed interactive reporting dashboards using JSP, AJAX, and JavaScript, reducing access time by 2.5 seconds per request.
- Created and maintained over 100 stored procedures and database triggers to enforce financial rules and data validations for compliance workflows.
- Wrote 200+ unit test cases with JUnit, covering all major modules and increasing testing coverage within 6 months.
- Participated in SDLC activities including requirements gathering, design reviews, code walkthroughs, and QA hand-offs, ensuring alignment with tax compliance standards.
- Performed log analysis and debugging for production support tickets, resolving 90% of incidents within SLA and maintaining <2% defect leakage rate.
- Used Git for source control and maintained release branches, managing over 12 production deployments with rollback-ready plans.

EDUCATION

Masters of Computer Science **Aug 2023 – Dec 2024**

Oklahoma Christian University

Bachelors of computer Science **Aug 2018 – May 2022**

Keshav Memorial Institute of Technology
