EDUCATION

Master of Science, Information Technology

Arizona State University, Tempe, Arizona

August 2023 - May 2025

GPA – 4.00/4.00

Bachelor of Engineering, Information Science and Engineering

Nitte Meenakshi Institute of Technology, Bangalore, India

August 2015 - May 2019

GPA - 3.47/4.00

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, HTML, CSS, SQL, TypeScript, jQuery

Databases: MySQL, SQL, SSMS (SQL Server Management Studio)

Platforms: Docker, GIT, Tableau, Visual Studio, Visual Studio Code, Fiddler, IIS, Azure, AWS, Bamboo, Bitbucket, Active Directory, PSIM, Integrated Studio, Systems and Server Management, VMware, Microsoft Office, Google Workspace, Zoom, Power BI

Frameworks: .Net, OutSystems, CMS, Drupal, Veracode, Splunk

WORK EXPERIENCE

System Engineer | Tata Consultancy Services, Bangalore, India

March 2023 - July 2023

- Managed user access permissions for multiple teams using Active Directory, ensuring correct levels of access for different roles while also assisting with software installations and updates, securing 100% alignment with internal security guidelines

Senior Software Engineer | Novigo Solutions Pvt Ltd, Bangalore, India

October 2022 - January 2023

- Mastered OutSystems through a hands-on approach, independently delivering an Incident Management solution for a Hotel Booking application operating OutSystems, SSM and Integrated Studios, incorporating room reservation features and automated mail via Azure with 90% accuracy.
- Acted as Team Lead, driving the planning, design, and initial development of a custom ticketing system, similar to Jira, to improve internal issue tracking and resolution.

Associate Software Engineer | Mphasis Ltd, Bangalore, India

September 2019 - October 2022

- Refactored a .NET-based legacy CMS for a leading multinational financial corporation, migrating it to Visual Studio while enhancing applications with responsive UI features such as dynamic pop-ups and dropdown menus to boost user interaction.
- Designed and executed unit tests for cross-browser and device compatibility, ensuring high application stability and reducing bugs during QA testing to a remarkable 5%.
- Collaborated with the QA team for performance and automation testing and with deployment during production, alongside contributing customer support to ensure smooth client experience.
- Served as a primary point of contact for CMS-related queries, resolving issues including environment-down scenarios for local and QA testing teams, and trained 15+ new hires and internal team members.
- Acted as secondary scrum master and facilitated agile processes by leading daily scrum meetings and sprint retrospectives, promoting continuous improvement within team.

PROJECTS

Network Traffic Visualization System

December 2023

- Created an innovative network traffic visualization system utilizing **Python** and **Wireshark**, translating raw network data into a clear, actionable visual map via **Google Earth** to facilitate network security analysis by visualizing traffic flows, helping to identify unusual access patterns, potential security breaches, and optimize routing strategies.
- Improved troubleshooting efficiency, enabling administrators and network analysts to pinpoint connectivity issues and performance degradation through visual representations of network traffic. This also enhanced capacity planning for app developers by providing insights into traffic loads, aiding in proactive adjustments and ensuring the network can handle potential scaling needs.

British Airways Data Visualization and Reporting

April 2024

- Developed an interactive British Airways dashboard through **Tableau** to visualize key data points such as location, country ratings, aircraft ratings, cabin staff service, average food beverages, average seat comfort, empowering users to make informed decisions on property selection.
- Implemented interactive controls to ensure that the selected controls display accurate results and incorporating geographic coordinates to exhibit accuracy and usability of my dashboard for travelers and for the public.

AWARDS & RECOGNITION

- Awarded the **Star of the Sprint** for over 6 times at Mphasis for consistently exceeding performance expectations during sprints.
- Recognized by cross-team managers and product owners with appreciation emails for delivering valuable expertise as an unofficial CMS SME, showcasing strong collaboration and knowledge-sharing skills.
