

NITHYA P

(913) 915-4684 | nithyapnpx@gmail.com

PROFILE SUMMARY:

Experienced Business Analyst with a strong background in healthcare, specializing in business requirements analysis and documentation. Successfully prepared Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) for data transfer processes and HIPAA compliance projects. Proven ability to act as a liaison between clients and SMEs to standardize product requirements. Eager to leverage expertise in business analysis to drive efficiency and innovation in the target role.

TECHNICAL SKILLS:

- **Methodologies:** Waterfall, Agile Scrum, Kanban, Hybrid (Waterfall-Agile), RUP (Rational Unified Process), SDLC, Change Management
- **Project Management Tools:** JIRA, MS Project Professional, Azure DevOps, SharePoint, Tableau, Rally, MS Teams, Slack
- **Documentation Tools:** MS Office Suite, SharePoint, Confluence, MS Access, MS Excel, Google Drive, BRD/FRD Documentation
- **Business & Process Modeling Tools:** MS Visio, Adobe Photoshop, Adobe XD, Lucid chart, Wireframes, Balsamiq, Use Case
- **Testing Tools:** HP Load Runner, SoapUI, POSTMAN, Selenium, Swagger, User Acceptance Testing (UAT), Regression Testing
- **Databases:** MYSQL, Microsoft SQL server, Oracle, PL/SQL/ ETL Processes, Source-to-Target Mapping, Power BI
- **Web Technologies:** XML, JSON, HTML & CSS
- **Healthcare:** EDI Transactions, HIPAA 4010/5010 Compliance, ICD-9/10, Medicare, Medicaid, Claims Processing, Enrollment

WORK EXPERIENCE:

Kaiser Permanente

Jan 2024 - Present

Business Analyst

Kansas

- Prepared Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) for the data transfer process from UCM to third-party vendors.
- Prepared Business Requirement Documents (BRDs) and Functional Requirement Documents (FRDs) for the data transfer process from UCM to third-party vendors.
- Applied RUP methodology workflows, artifacts, and activities to manage the lifecycle from inspection to transition phase; defined and maintained test cases for EDI transactions.
- Documented business and functional requirements for HIPAA 4010 and HIPAA 5010 transactions while testing ICD-9 and ICD-10 claims; performed troubleshooting using CPT4, ICD-9, and ICD-10 codes.
- Acted as liaison between external clients and SMEs to produce standardized product requirement documents (URS/FRS/Use Cases), ensuring clear communication and alignment.
- Interacted with Claims, Payments, and Enrollment teams to analyze and document related business processes, improving operational efficiency.
- Conducted stakeholder analysis and applied diverse elicitation methodologies to gather requirements, delivering high-level business documentation that improved alignment and clarity.
- Created UML diagrams (Use Cases, Sequence, State, Activity) to model business processes and workflows.
- Analyzed and documented Medicaid EDI transaction issues during HIPAA 5010 implementation, ensuring compliance and smooth version transition.
- Oversaw daily operations including mail functions, TPA activities, EDI processing, reporting, and data analytics development in Power BI to improve accuracy and decision-making.
- Designed and developed interactive Power BI dashboards to track claims processing KPIs, HIPAA compliance metrics, and enrollment data, enabling leadership to monitor trends in real time.
- Automated Power BI data refresh pipelines connected to SQL Server and healthcare data sources, reducing manual reporting efforts by 40%.
- Collaborated with developers working on React.js-based reporting tools, providing requirements, performing front-end testing, and documenting defects in Jira.
- Partnered with UI/UX designers to review React.js prototypes, ensuring business rules and healthcare compliance standards were incorporated into front-end design.
- Supported cross-functional testing by executing JavaScript-based test cases for claims and enrollment portals, documenting outcomes in Jira for developer follow-up.
- Collaborated with developers to validate REST API integrations between React front-end and SQL Server back-end, helping ensure accurate data flow and user functionality.
- Assisted QA teams in validating JavaScript-driven UI components for internal healthcare applications, ensuring alignment with requirements and improving user experience.
- Participated in JAD sessions to analyze requirements, feasibility, and risks, improving stakeholder satisfaction.
- Worked in SDLC environments for both Agile Scrum and Waterfall methodologies; applied agile tools and ceremonies to develop and test functionality for the PBM Pharmacy Benefit module.
- Built a secure Excel front-end application with user authentication linked to SQL Server data, streamlining secure access.
- Conducted functionality, integration, regression, and UAT testing, providing QA teams with insights for effective defect tracking

Fortis Healthcare

Jan 2023 - May 2023

Junior Business Analyst

India

- Collaborated with business analysts, developers, leads, and customer SMEs using Agile Scrum to enhance project outcomes,

improving delivery timelines and stakeholder satisfaction.

- Automated and deployed standardized periodic reports using Power BI, reducing manual reporting efforts by 40% and providing stakeholders with interactive dashboards for real-time performance tracking.
- Designed and maintained Power BI dashboards to visualize Medicare, Medicaid, and Coordination of Benefits claim metrics, enabling KPI monitoring and executive-level decision-making.
- Created Medicare, Medicaid, and Coordination of Benefits claims during testing, ensuring compliance with healthcare standards and regulatory requirements.
- Prepared Business Requirement Documents (BRD) and System Requirement Documents (SRD), ensuring clarity and alignment between technical teams and business stakeholders.
- Ensured full HIPAA compliance lifecycle from gap analysis to testing for Medicaid Claims processing, improving data security and meeting regulatory adherence requirements.
- Introduced, trained, and implemented Agile Scrum methodologies to improve departmental and project efficiency, increasing team throughput by 25%.
- Participated in project planning sessions with team members for requirement analysis and made recommendations, leading to better scope definition and reduced change requests.
- Involved in creating data flow diagrams and process flow diagrams using MS Visio for the Claim Adjudication module, improving communication between teams.
- Worked with providers and Medicaid entities to validate EDI transaction sets (834, 835, 837, 820, 270, 271) and web portal submissions, ensuring accurate claim processing.
- Utilized JIRA to develop and track agile epics, stories, and tasks, improving transparency and backlog prioritization.
- Designed mock-ups and prototypes to provide a clear visual understanding of intended designs for stakeholders.
- Understood and documented business processes including Sales, Group Renewals, Eligibility, and Enrollment workflows, optimizing efficiency through targeted recommendations.
- Gathered, analyzed, and validated requirements from clients, translating them into detailed specifications for development teams.
- Created and maintained SQL scripts for back-end testing on Oracle databases, ensuring data integrity and accuracy during processing.
- Developed and maintained pipeline reports using advanced Excel formulas (VLOOKUP, Conditional Formatting), enhancing analytical capabilities for operational teams.
- Wrote complex SQL queries to assist in UAT and data validation, reducing data-related defects by 30%.
- Performed source-to-target mapping documentation and handed off to the development team, facilitating seamless development cycles.
- Facilitated Scrum ceremonies including grooming, sprint planning, retrospectives, and daily stand-ups, improving cross-team alignment and project delivery speed.
- Created UML artifacts (Use Cases, Activity Diagrams, Sequence Diagrams) to improve stakeholder understanding of system workflows.
- Facilitated communication between development, support, and product owner teams, ensuring timely issue resolution.
- Managed projects through Team Foundation Server (TFS), enhancing project tracking and version control efficiency.
- Collaborated with cross-functional teams and PMO to standardize processes, increasing project consistency and reducing rework.
- Created claims in the application using XML and verified processing status after batch jobs, ensuring accurate claim adjudication.

Adee Hygiene industries

Mar 2021 - Oct 2022

Business Analyst

India

- Analyzed large operational and sales datasets using SQL and Excel to extract actionable insights, leading to improved production efficiency and cost optimization.
- Built and maintained weekly and monthly reports and developed performance dashboards to track KPIs for operations, inventory, and sales.
- Conducted root cause analysis on operational data, identifying trends, bottlenecks, and improvement opportunities; proposed solutions adopted by management.
- Cleaned and validated raw data using Excel (VLOOKUP, IF statements, PivotTables) and SQL scripts to ensure data accuracy and integrity in reporting.
- Collaborated with cross-functional teams (Sales, Production, Finance) to define reporting requirements and deliver actionable, data-driven insights.
- Developed Business Requirement Documents (BRDs) and Functional Requirement Documents (FRDs) to translate stakeholder needs into technical solutions.
- Supported ETL processes, including source-to-target mapping, data transformation, and SQL-based validation to enhance reporting workflows and data accuracy.
- Created mockups and wireframes for dashboards using MS Visio and Balsamiq, improving visualization and stakeholder feedback during development.
- Designed and deployed Power BI dashboards and automated reporting solutions, enhancing decision-making and overall process efficiency.
- Facilitated Joint Application Development (JAD) sessions with business users and IT teams to gather requirements and validate data models.
- Assisted QA team with test case execution and defect logging in Jira; validated front-end and API data outputs to support release cycles.
- Managed tasks, user stories, and report requests using Jira and Azure DevOps, ensuring timely and organized project delivery..
- Developed front-end components using React.js and JavaScript for internal dashboards and reporting interfaces, improving usability

and accessibility.

- Completed coursework and project deliverables using React.js and JavaScript, gaining hands-on experience in UI development, API integration, and data visualization.
- Collaborated with QA and developers on testing React-based applications, documenting defects in Jira and supporting sprint progress updates.
- Applied JavaScript fundamentals (DOM manipulation, event handling, validation) in reporting solutions to enhance functionality and user experience.
- Utilized SQL, MySQL, MS SQL Server, Power BI, Excel, MS Visio, and other tools, with additional exposure to JavaScript, React, and API testing concepts, to streamline data analysis, reporting, and visualization processes, improving overall workflow efficiency.
