PROFESSIONAL SUMMARY

Aspiring Business Analyst with a Master's in Business Analytics and hands-on experience in data analysis and process optimization. Through my experience at Mercedes-Benz, I collaborated with cross-functional teams to ensure business goals aligned with software releases, leading to improved user experience and reduced defects. Motivated by the challenge of identifying opportunities for operational improvement, I am passionate about using data to drive strategic decisions that foster growth and enhance business performance.

EDUCATION

Master of Science in Business Analytics	GPA:4/4
East Texas A&M University	Aug 2023-Dec 2024
The National Institute of Engineering, Mysore, India	GPA:3.46/4
Bachelor of Technology in Information Science Engineering	July 2016-May 2020

SKILLS

- **Programming Languages:** Python, SQL, Java, R Programming, C++, C.
- **Tools and Technologies:** Microsoft Office, Advanced MS Excel (VLOOKUP, Pivot tables, and Macros), Data Visualization Tools (Power BI, Tableau), GitHub, Git, PowerPoints, Jira, Kanban, Azure DevOps, AWS, Visio
- **Coursework:** Decision Modelling, CRM, ML.
- **Soft skills:** Innovative thinking, Collaborative problem-solving, Strong planning, and organization skills.
- **Methodologies:** Agile and Waterfall

CERTIFICATIONS

[Product Management: An Introduction by IBM](#)
[PSM 1 Certification by Scrum.org](#)
[AZ-900 - Microsoft Azure Fundamentals from Microsoft.](#)
SQL for Data Analysis by LinkedIn
Tableau Essential Training by LinkedIn

PROFESSIONAL EXPERIENCE

Mercedes-Benz Research and Development <i>Business Analyst (QA Focused)</i>	Oct 2020 – Sep 2022
---	---------------------

- Coordinated the **quality assurance** process for the UI of the Onboard Logic Unit (OLU), collaborating with cross-functional teams to ensure the device met 100% of business and functional requirements, resulting in improved user experience.
- Worked closely with stakeholders to define **testing objectives** and design **test plans** aligned with **business goals**, ensuring that software releases met client expectations and reducing post-release defects by 20%.
- Identified and raised **critical issues** that impacted business outcomes, collaborating with development teams to resolve 95% of bugs before production releases, improving software quality.
- Documented and tracked **Test Scenarios**, **Test Cases**, and **Defect Reports**, ensuring **alignment with business requirements** and **functional specifications**, leading to enhanced clarity for all team members.
- Actively participated in System Integration Testing (**SIT**), working with other touchpoints to validate the overall functionality of the OLU device, achieving seamless integration with an 80% reduction in integration issues.
- Managed the **Test Requirements** process, ensuring all changes and new releases were thoroughly documented and aligned with business needs, improving testing accuracy by 15%.
- Created a **User Guide** for the IoT device, working with internal stakeholders to ensure the document reflected **business requirements** and was clear for end-users, leading to a 30% improvement in user adoption.

- Designed, developed, and deployed a web-based platform using **JavaScript, React, Node.js, and PostgreSQL**, improving employee team-building participation by 20%.
- Utilized **PostgreSQL** for **relational database management**, handling user profiles, activity logs, and participation data efficiently.
- Assisted in proposed system design using the ESB platform, following Agile development methodology for iterative and collaborative project delivery.
- Coordinated periodic reviews, tracked action items, and ensured 100% resolution of issues by preparing MOMs and monitoring progress.
- Managed project milestones using **Jira**, ensuring on-time delivery and adherence to project timelines.

ACADEMIC PROJECTS

Employee Attrition Analysis and Retention Strategy

- Conducted statistical analysis to identify key predictors of employee attrition and proposed retention strategies, reducing turnover risk by 15%
- Analyzed employee data, focusing on factors like age, income, department, and job satisfaction, to derive actionable insights
- Utilized statistical methods, including **hypothesis testing, multilinear regression analysis, and logistic regression**, to identify significant predictors of attrition in **Excel**.
- Developed and recommended retention strategies, including employee development programs, work-life balance initiatives, and recognition programs.
- Recommended **future initiatives**, including longitudinal studies, qualitative research, **predictive modeling**, and implementing continuous feedback mechanisms, leading to a 20% improvement in process efficiency and alignment with business objectives.

Analyzing Wellness Trends

- Designed and implemented a **data warehouse** to replace Salesforce for Mindbody, optimizing data storage and analysis capabilities.
- Identified bottlenecks in the booking process by analyzing maximum checkout times for delays, class popularity, and booking Patterns, leading to a **20% reduction** in overbooking and a **15% improvement** in customer experience.
- Created **fact measures** to analyze trends and provide actionable recommendations to increase sales by streamlining the checkout Process to reduce delays, adjust class schedules and staffing for peak demand, and personalize class suggestions and targeted promotions, resulting in a 10% increase in sales
- Developed interactive data visualizations using **Tableau** to present key findings and insights, improving data-driven decision-making.
- Presented project results, leading to a 25% improvement in the speed and accuracy of decision-making by stakeholders through enhanced understanding of data trends and operational insights.

Sales dashboard for Walmart

- Designed and implemented a **Power BI** dashboard to analyze key sales metrics, including total sales, profit, and product performance, enabling data-driven decision-making and improving reporting efficiency by 20%.
- Imported and cleaned large datasets, created calculated columns, and used **Power Query** Editor to prepare data for analysis, ensuring accuracy and consistency.
- Built custom KPIs for profit, profit percentage, and sales trends, providing actionable insights into Walmart's sales performance.
- Used slicers, card visuals, and charts to create an interactive dashboard, allowing filtering by year, month, sales type, and payment mode for targeted analysis, enhancing user engagement by 20%.

Go Drive – Vehicle Rental System

- Designed and developed a **MySQL** database for an online vehicle rental system.
- Implemented a reservation feature allowing customers to pre-book vehicles with pickup details.
- Created queries to manage bookings, check availability, and track cancellations.
- Optimized database performance in MySQL using indexing and stored procedures for faster queries.

Eligible to work in the U.S. under F1 OPT (Optional Practical Training).
