Summary

Business Analyst with 4+ years of experience in optimizing business processes and enhancing operational efficiency. Expertise in requirements gathering, stakeholder engagement, and process modelling to drive strategic decision-making. Proficient in SQL and Python for data analysis, and skilled in using Power BI and Tableau for effective data visualization. Experienced in implementing cloud solutions with Microsoft Azure and AWS, improving data accessibility and collaboration. Adept in Agile methodologies, risk assessments, and data governance, ensuring compliance while delivering actionable insights that align with business goals.

Skills

- Methodologies:** SDLC, Agile/Scrum, Waterfall
- Documentation:** Business Requirement Documents (BRD), Functional Requirement Documents (FRD), User Stories, Process Flow Diagrams, Use Cases
- Management Tools:** MS Project, JIRA, Confluence
- Data Analysis Tools:** SQL, Power BI, Tableau, Qlik, Python
- Business Analysis Techniques:** Cost-Benefit Analysis, GAP Analysis, Risk Assessment, SWOT Analysis
- Cloud Technologies:** Microsoft Azure, AWS (Amazon Web Services)
- Data Handling:** Data Mapping, ETL processes, OLAP, OLTP, Data Governance
- Reporting Tools:** MS Office Suite (Excel, Word, PowerPoint), Tableau, Power BI
- Technical Skills:** Data Warehousing, Data Modelling, Query Optimization, Database Management Systems (DBMS)
- Operating Systems:** Windows, Linux

Experience

Elevance Health, USA	Jan 2024 – Present
Business Analyst	
- Collaborated with internal stakeholders and healthcare teams to gather and document business requirements through facilitated workshops and interviews, producing comprehensive BRDs and FRDs that align with health insurance services and regulatory compliance. - Developed complex SQL queries to support ETL processes for patient data and claims analytics, improving accuracy in healthcare reporting by 25% and enabling real-time performance tracking. - Created dynamic, interactive Power BI dashboards to visualize key metrics like patient outcomes, cost efficiencies, and member satisfaction, providing actionable insights to leadership and healthcare teams. - Automated data retrieval and preprocessing tasks using Python (Pandas, NumPy), reducing manual intervention in healthcare reporting by 40% and streamlining operations for more efficient reporting workflows. - Utilized Microsoft Azure for storing and processing large datasets, enhancing data accessibility and collaboration between cross-functional teams, including actuarial and clinical departments. - Conducted comprehensive risk assessments using SWOT and PESTLE analysis methodologies, identifying operational vulnerabilities and recommending strategies that mitigated risk exposure by 15%. - Assisted in User Acceptance Testing (UAT) to ensure that system functionalities aligned with business requirements, leading to a 20% decrease in post-launch defects. - Deployed Jira for comprehensive project tracking, improving issue resolution speed by 20% and reducing project delays by 25%, resulting in a 10% increase in client satisfaction. - Devised and managed integrated marketing efforts, enhancing customer engagement by 20% and achieving 12% growth in online traffic and sales.	
Mphasis, India	June 2020 – Aug 2022
Business Analyst	
- Led requirements-gathering sessions with banking stakeholders, producing detailed documentation that supported the development of a Banking Management System (BMS), enhancing operational efficiency by 40%. - Analyzed large structured and unstructured datasets, using SQL and Python, to derive insights for the design and integration of a Customer Relationship Management (CRM) system, resulting in a 15% increase in customer retention. - Employed advanced Excel techniques, including pivot tables and macros, for financial modelling and forecasting, providing management with actionable insights that resulted in a 30% increase in revenue. - Translated complex business requirements into actionable technical solutions, cutting time-to-market by 12% and enhancing project efficiency. - Directed in-depth system evaluations, identifying, and resolving bottlenecks that improved system efficiency by 15%, leading to a 10% decrease in downtime incidents. - Implemented Waterfall methodology to streamline project progression, reducing development phases by 10%. - Conducted performance metrics analysis to evaluate the success of implemented systems, utilizing Tableau for KPI tracking and operational performance evaluation. - Fostered effective communication and collaboration through JIRA and Confluence, aligning project objectives and timelines, which contributed to a 20% reduction in project delays. - Created detailed documentation including FRD, BRD, SRS, and RAD, ensuring clear and precise project requirements.	

Education

Master of Science in Business Intelligence and Analytics	May 2024
Stevens Institute of Technology, NJ
