Houston, TX | nitishsai950@gmail.com | (713)-298-2248 | [Linkedin](#) | [Github](#)

EDUCATION

- **University of Houston, Houston, TX** May 2025
Master's in Computer Science
- **Osmania University, Hyderabad, TG** May 2023
BE in Computer Science & Engineering

SKILLS

- **Programming Languages & Operating Systems:** Python, Go, Java, Shell Scripting, Linux, Ubuntu.
- **Cloud & Database Systems:** AWS (EKS, ECS, EC2, RDS, S3, Lambda), MySQL, PostgreSQL, MongoDB, NoSQL.
- **Operating Systems & Networking:** Linux(Ubuntu), Windows, HTTP, TLS, TCP/IP, DNS, DHCP.
- **DevOps:** Jenkins, Terraform, Ansible, Prometheus, Grafana, Docker, Github Actions, Kubernetes, Jira, Confluence.

EXPERIENCE

Software Developemnt Engineer Intern – Advanced Micro Devices Inc. (AMD), Santa Clara, CA Jan 2025 – May 2025

- Enhanced the classification tool to onboard discovered devices into a **PostgreSQL** database, improving **asset visibility by 30%** and **documentation accuracy by 85%**.
- Maintained **CI/CD** pipelines with **GitHub Actions**, automating builds & deployments.
- Deployed classification microservices in **Kubernetes** clusters, supporting scalable, zero-downtime rollouts.
- Implemented **Prometheus and Grafana dashboards** for real-time hardware monitoring, reducing **MTTD** & enabling proactive intervention during validation cycles.
- Prevented **\$800K+** in capital expenses by surfacing and reallocating idle devices for use in **compatibility testing**.

IT Systems Administrator – University of Houston, Houston, TX

Sep 2024 – Dec 2024

- Maintained over **30+ critical servers**, ensuring **95% uptime** for key departmental applications while automating system monitoring and maintenance tasks.
- Optimized IT support workflows, resolving **150+ tickets** and troubleshooting infrastructure issues, leading to a **30% faster resolution time** and a **20% increase in system stability**.

Software Developemnt Engineer Intern – Advanced Micro Devices Inc. (AMD), Santa Clara, CA May 2024 – Aug 2024

- Built a **Linux-based Hardware Device Classification tool** using **Python & Go** as a **Backend** service to automate server inventory & classification workflows, reducing **manual effort by 70%** & ensuring **95% tracking accuracy**.
- Integrated **REST APIs (Redfish and IPMI)** to classify **2,000+ devices** with **99% precision**, enabling streamlined tracking across subnets for AI infrastructure validation.
- Conducted **unit and integration testing, debugging** complex issues to ensure reliability and performance across classification workflows.
- Orchestrated automated workflows, incorporating **JIRA ticketing and Slack-based alerts**, which accelerated **incident response by 40%** and boosted **ticket resolution rates by 25%**.
- Implemented **Git-based version control** with rollback & change tracking, ensuring code quality through peer reviews.

DevOps Engineer – Suntek Corp Solutions Pvt. Ltd., Hyderabad, TG

May 2022 – Jun 2023

- Containerized the core learning platform using **Docker** and deployed on **AWS ECS**, improving **system scalability by 60%** and **reducing downtime by 40%** during high-traffic periods.
- Built **CI/CD** pipelines with **GitLab CI** & used **Terraform** for infrastructure automation, cutting config errors by 80%.
- Optimized cloud resource utilization and ensured high availability through **IaC-driven deployments**, reducing **infrastructure costs by 25%** and maintaining **>99.5% uptime across production services**.

PROJECTS

DevSecOps: Deploying a Secure Netflix Clone

Dec 2024

- Built a high-performance **CI/CD** pipeline using **Jenkins**, reducing **deployment latency by 40%** and fortifying **application security by 30%** while deploying a Netflix Clone on **AWS EC2**.
- Integrated **SonarQube, OWASP Dependency-Check, and Trivy**, eliminating **95% of security vulnerabilities and code quality issues before production deployment**.
- Containerized the application using **Docker**, published images to **DockerHub**, and deployed **Prometheus-Grafana monitoring**, achieving **92% uptime** and cutting **Mean Time to Detect (MTTD) by 60%**.
- Embedded **SMTP-based real-time alerts** into the pipeline, ensuring instant notifications on build status, security threats, and deployment updates.

ACHIEVEMENTS

- Received **highest performance rating at AMD** for optimizing workflows, driving cross-functional collaboration, delivering high-impact projects, and ensuring timely execution.
