EDUCATION

- **University of California, Riverside** Riverside, CA
Bachelor of Business Administration & Information Systems Oct 2020 - Jun 2024
 - Relevant Coursework: Information Technology Management (**Python**), Statistics, Decision Analysis and Management Science (Excel Modeling), Database Modeling and Management (**Tableau, Power BI, SQL**), Public Health and Systems, Introduction to Nutrition, Introduction to Genomics and Bioinformatics (**R**), Neuroscience and Cognitive Function, Programming with R, Data-Driven Mathematical Modeling

SKILLS & INTERESTS

- **Skills:** Data Analysis (R, Python, SQL, SAS), DataOps, Data Visualization (Matplotlib, Power BI, Looker, Tableau), Data Pipelines, Model Building, CRM (Salesforce), Wireframing, Jira, Asana, UI/UX Design, Figma, Microsoft Office Suite
- **Interests:** Healthcare Technology, Nutrition, Sports Analytics, Data Visualization Storytelling, Behavioral Economics, Audio Science

EXPERIENCE

- **ResMed** San Diego, CA
Pharmaceutical Product Manager Intern June 2024 - April 2025
 - Led the development of data-driven features for ResMed and Brightree software, conducting user research, A/B testing and managing Jira sprints; enhancing automation and reporting.
 - Facilitated the MVP of a machine learning solution predicting sleep disorders (COPD, sleep apnea), cleaned and performed analysis on large datasets using SQL and Excel from 50,000+ patient records, producing actionable healthcare insights.
 - Collaborated with clinical and data engineering teams to validate and develop random forest models, improving sleep prediction accuracy and patient care outcomes.
 - Managed the migration of ResMed databases to Data World utilizing SQL, Snowflake, and Excel and creating ER diagrams for internal documentation.
 - Created dynamic dashboards using Power BI and performance reports to track user behaviour and operational efficiency of automated ASAP reporting features.
- **Microsoft** Redmond, WA
Product Manager Intern Jun 2023 - Sep 2023
 - Owned the AI Copilot feature within Microsoft Teams from concept to launch; engaged directly with customers to align product specifications with user needs.
 - Built and maintained a Power BI dashboard to track critical KPIs, uncovering data trends and customer pain points for product iteration.
 - Conducted JavaScript testing to enhance the AI Copilot's natural language processing and ability to analyze data from API calls, reducing error rate by 24 percent and improving performance in user testing.
 - Performed competitive analysis and led the research of user personas to identify user behavior and create an intuitive UI to integrate the AI Copilot.
- **RippleMatch** Los Angeles, CA
Product Marketing Intern Feb 2022 - Jun 2022
 - Applied AI-based models to existing user data to develop growth strategies which enhanced customer retention by 40% and boosted acquisition by 15%, optimizing user onboarding through predictive user behavior models.
 - Leveraged growth strategies to increase customer retention by factor of 1.4 and grow the user base by 125 users.
 - Assessed performance metrics and wrote requirements for cross-functional teams to create progress reports which boosted efficiency and helped design new growth strategies.

PROJECTS

- **Covid-19 Data Exploration and Visualization** SQL, Tableau
 - Leveraged SQL to analyze and structure COVID-19 datasets from OWID, uncovering critical insights into infection, death, and vaccination rates to support public health awareness.
 - Applied advanced SQL functions, including window functions, joins, and CTE queries, to aggregate and compare population and vaccination data, highlighting priority areas for intervention.
 - Prepared and transformed data within SQL by converting data types and creating views, optimizing datasets for effective visualization in Tableau.
