EDUCATION

DUKE UNIVERSITY, The Fuqua School of Business M.S. in Quantitative Management: Business Analytics, Marketing Track Data Science Coursework: Data Science for Business, Decision Analytics & Modeling, Data Visualization, Data Infrastructure Domain Coursework: Digital Marketing, Customer Relationship Management, Market Intelligence, Pricing	Durham, NC May 2025
BITS PILANI, HYDERABAD B.E. (Hons) Electronics and Communication Engineering Elective Courses: Principles of Management, Marketing Research, Principles of Economics, International Business	Hyderabad, India May 2023

EXPERIENCE

BRIGHTCHAMPS, Marketing Department EdTech focused on personalized learning for children through coding and STEM Associate Product Manager Intern - Collaborated with 25+ instructors across departments to identify engagement gaps; proposed and implemented five+ classroom experience enhancements, improving live student-teacher interaction scores by 30%. - Analyzed engagement data to inform three+ content and format iterations, increasing student engagement metrics by 20%.	Bangalore, India Jul – Dec 2022
KINARA AI, acquired by NXP AI startup focused on efficient silicon and software for on-device applications. Data Science Intern Trained neural networks for edge applications.	Hyderabad, India May – Aug 2021
POWERGRID CORPORATION Central public sector enterprise managing power transmission and the Indian national grid Intern Examined workflows in power distribution and transmission systems, presenting insights report.	Nagpur, India May – Aug 2020

SELECTED PROJECTS

Athena Game Capstone (Python, R) Segmented customers using factor analysis and K-means, modeled willingness to pay with Gabor-Granger pricing, and identified optimal price points and key segments.
Improving Retail Performance via Analytics (Tableau, Excel, SQL) Analyzed profit trends, flagging a 27% online drop in English-speaking countries; built dashboards to track retention and average order value (AOV).
Emotion Classification with Deep Learning (Python, PyTorch, TinyBERT, SQL) Built and compared baseline and MLP models for classifying 400K+ tweets by emotion using transformer-extracted features. Led data preprocessing with TinyBERT and applied regularization and early stopping, improving test accuracy by 6%. Insights supported sentiment-based targeting and automated customer support.
Forecasting Demand for MasterCraft Boats: Duke University Capstone (Python, R, Tableau, SQL) Led data engineering and modeling on team of five to forecast ski/wake boat demand three months ahead. Built national- and county-level models using economic and search data; applied K-means clustering for county segmentation. Presented insights to MasterCraft's marketing and sales teams to inform planning and strategy.

TECHNICAL CAPABILITIES

Programming Languages & Tools: Python, R, SQL, Tableau, Advanced Excel
Business: Consumer Analytics, Market Research, Problem Solving, Communication, Project Management, Data Analysis, Strategic Planning, Product Development, Leadership, Presentation Skills, Agile Methodologies

ADDITIONAL INFORMATION

Athletics: Organized secondary and college-level track meets, competing in and winning multiple events.
Swimming: Secured district-level medal in freestyle event.
Drums: Passed Grade Six with Merit from Trinity College London; performed at multiple school events.
Carnatic Vocal: Trained for nine years; performed in cultural festivals and competitions.
