

NITYA SRI MATTA | DATA REPORTER

New Jersey, USA | (862) 215-4083 | nityasrimatta@gmail.com | [LinkedIn](#)

SUMMARY

Data-Driven Storyteller and Analyst with 3+ years of experience in data engineering, applied data science, and civil engineering analytics, skilled in uncovering actionable insights from complex datasets across sports, economics, real estate, and demographics. Proficient in **Python, R, SQL, and Excel**, with hands-on expertise in data wrangling, visualization, statistical modeling, and reproducible analysis. Experienced in building **scalable data workflows**, delivering **audience-focused dashboards** and **compelling data narratives**, and leveraging **cloud, big data, and engineering software ecosystems** to integrate and analyze diverse data sources. Adept at collaborating with cross-functional teams to **translate business requirements into actionable insights** that drive data-informed decision-making and strategic outcomes.

PROFESSIONAL EXPERIENCE

IBM – Data Analyst | New York, USA

Jan 2024 - Present

- Planned and optimized ETL pipelines using PySpark, Airflow, and Apache Spark, cutting batch processing time by 36% and supporting 2TB of data daily.
- Built and managed AWS S3-based data lake and Redshift warehouse, enabling 20+ analytics dashboards for product, finance, and R&D teams.
- Enforced SQL transformations and query optimization, improving query execution speed by 28% and reducing report generation time from hours to minutes.
- Automated data quality checks (integrity, duplicates, missing values) in pipelines, increasing data accuracy by 25% and reducing failed jobs by 40%.
- Enhanced CI/CD workflows for data pipelines using Docker, Kubernetes, and MLflow, ensuring 99.9% uptime across staging and production environments.
- Partnered with cross-functional teams to deliver 5 new enterprise-grade pipelines, accelerating data availability and improving decision-making speed by 30%.

IBM– Junior Data Reporting Analyst | Remote,USA

Jun 2024 - Dec 2024

- **Promoted within 6 months** due to strong performance and measurable impact on data reporting efficiency and quality.
- Led reporting on **business and compensation datasets**, analyzing **2TB+ of daily data** to uncover patterns in revenue, contracts, and performance metrics.
- Built and maintained **audience-focused dashboards** in Tableau, Datawrapper, and Illustrator, simplifying complex trends for business stakeholders and leadership.
- Wrote and documented **reproducible Python + SQL workflows**, ensuring transparency, version control, and collaboration across teams.
- Partnered with editors, analysts, and data engineers to deliver **data-backed insights** under tight deadlines, reducing reporting turnaround time by **30%**.
- Automated **data validation and quality checks**, boosting reporting accuracy and reducing manual effort by **25%**.
- Trained colleagues on **data visualization best practices** and **data literacy**, elevating analytical capabilities across departments.

United IT Global– Data Engineer Intern | Houston,TX

May 2024 - Dec 2024

- Developed and deployed scalable ETL workflows with Spark and AWS Glue, reducing data preparation time by 50% and processing 1.5TB+ daily logs for client systems.
- Built data pipelines into AWS S3 and BigQuery, enabling real-time analytics dashboards for supply chain and operations teams, cutting reporting cycles from weekly → daily.
- Executed SQL- and NoSQL-based solutions (PostgreSQL, MongoDB), ensuring high availability and performance across OLTP/OLAP systems.
- Enhanced data monitoring with automated scripts, reducing data discrepancies by 22% and improving SLA compliance.
- Collaborated with client stakeholders to convert 6 PoCs into full-scale deployments, driving 20% revenue growth from recurring analytics contracts.

SoulPage IT solutions – Data Engineer (Intern) | Hyderabad, India

Jan 2021 - Jul 2023

- Automated data ingestion and labelling workflows in Python, improving annotation throughput by 33% across 100K+ images and text records.
- Created Power BI dashboards to track ETL pipeline health and refresh rates, saving 15+ hours/month of manual data validation.
- Improved SQL-based aggregation scripts to support recommendation engine development, reducing data pre-processing time by 25%.
- Researched data-efficient techniques for handling sparse datasets, improving pipeline accuracy by 12% in small-sample scenarios.

TECHNICAL SKILLS

- **Programming & Scripting:** Python (Pandas, NumPy, PySpark), R, SQL, Bash
- **Data Engineering & Big Data:** Apache Spark, PySpark, Hadoop, Kafka, Airflow, AWS Glue, AWS Lambda, AWS Redshift
- **Databases & Data Modeling:** PostgreSQL, MySQL, NoSQL (MongoDB), BigQuery, OLTP & OLAP modeling, query optimization
- **Cloud Platforms:** AWS (S3, Glue, Lambda, Redshift, EC2), GCP (BigQuery, Dataflow)

- **Data Visualization & BI Tools:** Power BI, Tableau, Streamlit, matplotlib, seaborn
- **MLOps & CI/CD:** Git, GitHub Actions, Docker, MLflow, Jenkins
- **Geospatial & APIs:** ArcGIS APIs, REST APIs, MLS (Multiple Listing Service) integration
- **Other Tools & Technologies:** Excel (advanced), SHAP, ETL automation, Web Scraping

EDUCATIONS

Master of Science Major in Data Science (STEM) New Jersey Institute of Technology GPA – 3.74/4	Aug 2023 - Dec 2024
Bachelor of Engineering Civil Engineering Vasavi College of Engineering GPA – 8.33/10	Jul 2018 - May 2022
