

# Niyati Sharma

## Data Engineer

[n65365988@gmail.com](mailto:n65365988@gmail.com) | [8178549011](tel:8178549011) | Austin, TX (Open to Relocate) | <https://www.linkedin.com/in/niyati-sharma-dataengineer/>

### SUMMARY

- Results-oriented Data Engineer with 4+ years of experience designing and implementing large-scale data pipelines, processing 30TB+ daily data while maintaining 99.9% data accuracy and reducing processing costs by 45%.
- Expert in building cloud-based ETL solutions using AWS services and modern data stack, successfully migrating 150+ data workflows to the cloud and improving processing efficiency by 60%.
- Proven track record in implementing data governance and quality frameworks, reducing data inconsistencies by 85% and ensuring compliance with financial industry standards through automated validation pipelines.
- Strong background in data warehouse architecture and dimensional modeling, leading to successful implementation of enterprise data marts that reduced reporting time by 65%.
- Advanced proficiency in developing automated data quality monitoring systems, detecting anomalies with 95% accuracy and reducing incident response time by 75%.
- Exceptional collaborator with experience in cross-functional teams, translating business requirements into technical solutions while maintaining data documentation with 98% accuracy.

### EDUCATION

**Master’s Degree in Information Systems** | University of Texas at Arlington - USA  
**Bachelor’s Degree in Computer Science and Engineering** | Jawaharlal Nehru technology University, India

### SKILLS

- Programming Languages:** Python (NumPy, Pandas, Matplotlib, SciPy), SQL, Java, Scala, R (ggplot2)
- Data Processing & Pipelines:** ETL/ELT, Apache Spark, Apache Airflow, Kafka, AWS Glue
- Cloud Platforms:** AWS (EMR, Redshift, S3, Lambda), Azure, GCP, Databricks
- Databases:** SQL, NoSQL (MongoDB, Cassandra)
- Big Data Technologies:** Hadoop, Hive, Pig
- Data Engineering Tools:** Apache Kafka, Apache NiFi, Apache Beam, Luigi
- Data Modeling:** Dimensional Modeling, Star/Snowflake Schemas
- Data Governance:** Data Quality Management, Metadata Management, Data Lineage using Apache Atlas
- Visualization Tools:** Tableau, Power BI, Matplotlib, Seaborn
- Machine Learning:** Scikit-learn, TensorFlow, PyTorch
- Soft Skills:** Problem-solving, Leadership, Collaboration, Documentation, Communication.

### EXPERIENCE

- PNC Financials, TX | Data Engineer**

**September 2022 – Current**
- Architected and implemented end-to-end data pipelines using AWS Glue and Apache Airflow, processing 50TB+ of daily financial data with 99.99% reliability while reducing processing costs by 55% through optimized resource utilization.
  - Designed and deployed a real-time market data processing platform using Apache Kafka and Kinesis, handling 500K+ events per second with latency under 50ms through partition optimization and consumer group scaling.
  - Led the migration of a legacy data warehouse to Snowflake and Databricks, achieving a 70% increase in query performance and 45% cost reduction by leveraging automated scaling and query optimization.
  - Developed automated data lineage and documentation using Apache Atlas for regulatory compliance, reducing compliance reporting time by 75%.
  - Created data tools and visualizations using Tableau and Power BI to provide actionable insights, improving operational efficiency by 40%.
  - Partnered with cross-functional teams to design and maintain scalable data models using Star Schema and Snowflake Schema, enhancing data accessibility and reducing query latency.

- DataOne, India | Data Engineer**

**January 2020 – June 2021**
- Built scalable ETL pipelines using Python and SQL to process 10TB+ monthly data with 99% accuracy, reducing data errors through automated validation checks.
  - Developed predictive analytics models using scikit-learn with 85% accuracy, contributing to a 40% reduction in forecast deviation.
  - Designed and implemented interactive dashboards using Tableau and Power BI for real-time reporting, cutting decision-making time by 70%.
  - Automated data cleaning and preprocessing using Apache Airflow, reducing data processing time by 65% and increasing data reliability.
  - Conducted root cause analysis using SQL and Python, identifying bottlenecks and optimizing queries by 60%.

### CERTIFICATIONS

**AWS Certified Solutions Architect - CID: K7P73RSC9F441P5X**  
**AWS Cloud Practitioner**  
**Cisco Network Academy CLA: C programming**
