Work Authorization : **US CITIZEN**

EDUCATION

Rowan University, Glassboro, NJ

Aug 2017 – Dec 2021

Bachelor of Science in Computer Information Technology (**Certification in Databases**) GPA: 3.87/4.00

SKILLS

- **Programming Languages:** Python, R, **SQL, DAX** (*Data Analysis Expressions*)
- **Databases:** **Microsoft SQL Server**, MySQL, PostgreSQL, Oracle
- **Tools & skills:** Microsoft Power BI, Tableau, **Git**, Git bash, **GitLab**, GitHub
- **AWS Cloud Technologies:** **Amazon RedShift, AWS Data Pipeline, AWS RDS, AWS Lambda**
- **Frameworks/Libraries:** Spark, PySpark, NumPy, Pandas, scikit-learn, SciPy, Plotly
- **Certification:** IBM Data Science Professional Certificate
- **Services:** SSMS, **SSIS ETL, SSRS Reporting, SSAS Tabular, SSAS Multi-Dim**
- **Other skills:** **OLAP Data Warehouse, OLTP RDBMS, ETL Package Design**, Tabular Data Modeling, Dashboard Design, Scorecard Reports, ADW , PowerBI Automate
- **Other tools:** **Provenir, DOMO, SAS**

EXPERIENCE

State of New Jersey - ITO

Feb 2024 – June 2025

Power Bi Developer / Senior Data Analyst

- Provide expertise in **Power BI Service** and **Power BI Automate** to ensure optimal performance and user experience.
- **Develop and maintain data models** in Power BI to support complex analytical requirements.
- Utilize Mash-Up Language and **DAX** in Power BI to create advanced data transformations and calculations.
- Hands-on experience with **SAP Business Objects, Power BI**, and **Tableau** for report development.
- Strong proficiency in **cloud platforms** like **AWS, Google Cloud, or Azure** for data integration and reporting.
- Proficient in **SQL, T-SQL**, and other query languages for data extraction and manipulation.
- Experience with **data modeling, ETL processes**, and **cloud data warehousing**.
- Solid understanding of **data visualization best practices** and dashboard design principles.
- Experience in implementing **Row-Level Security (RLS)** to secure data access for different user groups.
- Familiarity with **Python, R**, and other data analysis tools is a plus.
- Strong analytical, problem-solving, and communication skills.
- Ability to work independently and collaboratively within a team
- **Manage database and SQL tasks to ensure data integrity and availability.**
- **Monitor and optimize the performance of Power BI reports and dashboards.**
- Stay updated with the latest advancements in Power BI and related technologies to drive continuous improvement.
- Have **excellent problem-solving skills** and **attention to detail**.
- Designed and optimized Power BI data models to support complex analytical requirements for financial reporting.
- Developed and maintained **advanced DAX calculations for performance-efficient Power BI dashboards.**
- **Implemented Row-Level Security (RLS)** to ensure secure data access based on user roles.
- Led **end-to-end ETL processes using SSIS and Power BI Report Builder** for generating paginated reports.
- Conducted performance tuning on existing SSRS and Power BI reports, reducing load times by 30%.
- Collaborated with stakeholders to gather requirements, translating them into technical solutions **using Business Objects, Power BI, and Tableau.**

Tata Consultancy Service - AbbVie Biopharmaceutical

Jan 2022 – Feb 2024

Data Analyst / Tableau Developer

- Spearheaded the **design, development, and maintenance of a Data Warehouse** using **SSMS**, ensuring seamless integration of Production, Development, and 3rd party data.
- Leveraged **Snowflake** for cloud-based maintenance and **Provenir** for **decision modeling**, facilitating real-time analytics and strategic decision-making.
- Used different **Redgate tools & adapters** for advanced SQL tasks.
- Employed **Python** and **R** for extensive **data profiling, analysis, and predictive modeling** using libraries like pandas.
- Collaborated in maintaining cloud Data Warehouses using platforms like Snowflake and **AWS**.
- Designed and implemented ETL pipelines using **SSIS for XML and JSON**-formatted financial data and managed **ETL** tasks in Azure, with a special focus on customer information.
- Ensured optimal data quality and accuracy of **Test, Dev, and Risk Monitor Environment** in **PGAdmin** before transitioning to SSMS-based Data Warehouse designs.
- Managed data transitions and backups between MySQL, Provenir, and MS SQL Server.
- Crafted and maintained **BI reports** and dashboards using **DOMO** for financial visualizations, **ETL pipeline designs**, and **daily business evaluations**.
- Utilized **Azure services** such as Blob Storage, Data Lake, and Power BI for cloud migration, management, and visualization tasks.
- **Possess strong communication and collaboration abilities.**
- Administered **No-SQL data using MongoDB**, ensuring optimized structures and retrievals.
- Managed tickets across departments using **Jira**, meeting diverse **data needs**, and ensuring operational efficiency.
- Employed **Apache Active MQ** for **server monitoring, identifying issues, and maintaining smooth business operations**.
- Regularly participated in brainstorming sessions, offering insights, and devising strategies for enhanced profitability and business operations.

IBM

Senior Data Analysis

May 2021- Dec 2021

- Developed customized **BI dashboards and reports** to meet user needs and requirements. Develop in-depth analytical reports using **SSRS Report Designer / Power BI Report Builder, Power BI Desktop, Tableau dashboards**, interactive visualizations for company executive teams, board meetings, strategy marketing analysis etc.
- Developed and implemented new **data integration processes** for more efficient data management and improved data quality.
- Proficient in leveraging **Azure cloud services for data migration, ingestion, and live data streaming**, with expertise in **PolyBase** and dedicated SQL and serverless pools. Skilled in **statistical analysis report generation**, optimizing data warehouse performance, and **query optimization**. Experienced in **creating containers in Azure cloud data storage** and implementing data labeling practices.
- Developed and maintained **ETL (extract, transform, load) processes** to integrate data from various sources into the data warehouse.
- Conducted thorough testing of **data integration packages** to ensure data accuracy and completeness.
- Worked with the development team to troubleshoot data integration issues.
- **Show proficiency in database management and SQL.**
- **Exhibit domain knowledge in Strategic Sourcing and Consumer Goods Risk Management.**
- Write complex **T-SQL** scripts, stored procedures, functions, and triggers for pulling data from multiple sources.
- Development of **SSIS packages** for various inbound/outbound data, data cleansing, data massaging, large volume ORACLE **OLTP** system integration with **SQL Data Warehouse OLAP** system, and **ETLs** from SharePoint portals.
- Participated in system upgrades and migrations to ensure minimal downtime and maximum system availability. Participated in **UAT test plan report analysis and evaluation**.
- Actively reviewed and updated scripts to optimize performance and adhere to best practices.

Santander Bank

June 2019 – Dec 2019

Jr Data Analyst / Business Analyst

- Developed data models aligned with business goals, and effectively communicated technical concepts to nontechnical team members.

- Provided consultation to various teams within the organization and optimized existing **data pipelines** through critical evaluation. Collaborated with cross-functional teams to ensure data accuracy, consistency, and accessibility, while maintaining ethical practices around data privacy and security.
- Configured and managed **Hadoop 2.x clusters**. Developed Hadoop jobs for **parallel processing**. Optimized cluster performance.
- Created **Hive queries** for **data extraction and processing**. Developed Hive scripts for automation. Used **HQ** for complex SQL-like queries.
- Used Sqoop for data transfer between Hadoop and databases. Configured **Sqoop jobs** for data import/export. Conducted performance tuning. Developed Spark applications for distributed computing. Created and optimized **RDDs for data storage and processing**.
- Conducted HDFS operations, such as managing directories and file permissions. Used HDFS command-line tools for file system management. Worked with **HDFS for distributed data processing**.
- **Have a track record of delivering high-quality solutions on time and within budget.**
- **Be adaptable to changing business requirements and technological advancements.**
- Conducted troubleshooting and problem resolution on CentOS Linux-based clusters. Managed Linux-based cluster infrastructure, including monitoring and maintenance. Worked with HDFS for distributed data processing on Cloudera and CentOS Linux.
- Created complex **SQL** queries to extract, transform, and load data from multiple sources into the data warehouse. Conducted performance tuning of SQL queries to optimize system performance. Used SQL Server Management Studio to manage and maintain databases.
- Actively identified and proposed improvements to existing data and **BI processes**. Participated in cross-functional teams to develop new data and **BI solutions**. Conducted training sessions to promote the adoption of new data and **BI tools** and processes.
