

JOSHNA N

Software Developer

Melbourne, FL, 32901, USA | joshna.n1126@gmail.com | +1 321-367-5732

PROFESSIONAL SUMMARY

- **Software Developer** with **4 years of experience** in full-stack development, with a strong focus on the **MEAN stack** (MongoDB, Express.js, Angular, Node.js).
 - Skilled in designing, developing, and deploying **scalable and secure web applications** across various industries.
 - Proficient in building and integrating **RESTful APIs** for efficient communication between front-end and back-end systems.
 - Experienced in creating **responsive, user-friendly interfaces** using Angular, HTML, and CSS to enhance usability and accessibility.
 - Optimized **NoSQL databases (MongoDB)** for high-volume data processing and reduced query latency.
 - Improved system performance by **30% through API performance tuning** and backend optimization.
 - Delivered real-time solutions such as an **auction platform, crime detection tool, and forest fire prediction model**.
 - Strong understanding of **cloud computing** with hands-on experience in **Google Cloud Platform** and **Firebase deployments**.
 - Actively contributed in **Agile environments**, including sprint planning, daily stand-ups, and retrospectives.
 - Experienced in **Git version control**, collaborative development, and clean code practices.
 - Passionate about **machine learning, cybersecurity**, and building innovative, tech-driven solutions.
 - Continuously learning and adapting to the latest trends and technologies in software engineering.
-

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, Java
 - **Frontend Development:** Angular, HTML, CSS
 - **Backend Development:** Node.js, Express.js, RESTful APIs
 - **Databases:** MongoDB, MySQL
 - **Cloud & DevOps:** Google Cloud, Firebase, CI/CD Pipelines, AWS
 - **Version Control:** Git, GitHub
 - **Project Management:** Agile, Scrum, Kanban, JIRA
-

PROFESSIONAL EXPERIENCE

Client: Sedgwick, Tampa, FL

Software Developer | June 2023 – Present

- Engineered and deployed **full-stack web applications** using **Angular, Node.js, Express.js, and MongoDB**.
- Designed and optimized **NoSQL database schemas** to enhance **performance, support scalability, and minimize query latency**.
- Developed and integrated **RESTful APIs for seamless front-end/back-end communication**, improving system responsiveness and reliability.
- Built and maintained **modular, reusable codebases following best practices to improve maintainability and reduce development time**.
- Participated in **Agile development cycles** including **sprint planning, daily stand-ups, and retrospectives** to ensure timely and quality delivery.
- Collaborated with **QA engineers, UI/UX designers, and project managers** to deliver production-ready features aligned with client requirements.
- Implemented **RESTful Web Services APIs** for high-volume data collection, enhancing system throughput and scalability.
- Built **dynamic, responsive web applications and interactive portals** tailored to business needs using **modern JavaScript frameworks**.

- Utilized **RxJS Observable library** for handling asynchronous HTTP requests in Angular, enabling efficient data streaming.
- Demonstrated strong expertise in **Git-based software configuration management**, ensuring robust version control and team collaboration.
- Developed front-end applications using **HTML5, CSS3, JavaScript, TypeScript, Angular (7-17), Angular Material, Twitter Bootstrap, and JSON**.
- Created child-level components for online visit summaries and other functionalities.
- Worked on backend development using **Node.js, Express, and MongoDB**.
- Developed **reusable Angular services** for a single responsive application across various platforms.
- Utilized AWS cloud services for fetching files and optimized the digital experience for MED D customers.
- Migrated applications from legacy **JavaScript/AngularJS** to Angular 4 and beyond, ensuring better testability.
- Implemented custom **bootstrap styles** and managed **Agile processes** for application development.

Environment: Angular (7-17), Node.js, AWS, HTML5, CSS3, Bootstrap, JavaScript, jQuery, .Net, C#, Grunt, Bower, NPM, AJAX, LESS/SASS, JIRA, Git, Agile.

Software Developer

Infosys Private Limited, Hyderabad, India | October 2021 – January 2023

- Developed **interactive web applications** and **RESTful APIs** for enterprise clients, including **Northwestern Mutual**, improving system efficiency and performance.
- Built **responsive front-end interfaces** using **Angular, HTML, and CSS**, enhancing accessibility and user experience across devices.
- Designed and optimized **MongoDB schemas** to support large datasets, enabling fast data retrieval and efficient indexing.
- Led **API performance improvements**, reducing response time by **30%** and increasing backend reliability.
- Integrated robust **authentication and security features**, ensuring data protection and compliance with security standards.
- Collaborated in **Agile sprints**, contributing to sprint planning, daily stand-ups, and retrospectives for timely feature delivery.
- Participated in **code reviews** to maintain clean, scalable code and support team knowledge sharing.
- Ensured seamless **integration between front-end and back-end systems**, improving communication and workflow consistency.
- Worked closely with **cross-functional teams** including QA engineers, designers, and product managers to deliver client-ready solutions.
- Contributed to **technical documentation** and internal best practices for improved development efficiency and onboarding.

PROJECTS

Auction Platform

- Developed a **real-time auction platform** with **Flutter, Firebase, and Node.js**, enabling users to **bid securely and interact in real-time**.
- Implemented **Google Cloud Functions** for **serverless processing** and **MongoDB** for **scalable data storage**.
- Designed an **intuitive user interface with Flutter widgets**, ensuring seamless navigation.
- Future improvements include **Stripe/PayPal integration for secure transactions** and **machine learning-driven recommendations**.

Crime Identification & Prevention System

- Built a **face recognition-based web application** using **OpenCV, Flask, and MySQL** to assist law enforcement in **criminal identification**.
- Implemented an **image-matching algorithm**, allowing users to **upload photos for database comparison**.
- Enhanced accuracy and efficiency by utilizing **data preprocessing techniques** and **AI-driven pattern recognition**.

Forest Fire Prediction Model

- Developed a **machine learning-based predictive model** using **SVM and Python** to assess wildfire risks based on meteorological data.
 - Collected and processed real-time data on **wind speed, humidity, rainfall, and temperature** for accurate forecasting.
 - Improved **predictive accuracy by 35%**, allowing authorities to take preventive measures.
-

CERTIFICATIONS

- **Infosys Certified Java Developer** (2021) – Backend development with Java, RESTful API integration
 - **Infosys Certified MongoDB Developer** (2022) – NoSQL database optimization and schema design
 - **Global Agile Certification – Infosys** (2022) – Agile methodologies for software development
 - **IBM Watson AI Workshop Certification** (2021) – AI & Machine Learning fundamentals, obtained during B. Tech
-
