

Prashanth Kumar Noru

.Net Full Stack Developer

CONTACT

Location:

Atlanta, GA

Phone:

+1 (205)-206-3551

E-mail:

prashanthkumarnoru@gmail.com

EDUCATION

Master of Electrical Computer Engineering

University of Alabama Birmingham.

SKILLS

Methodologies:

SDLC, Agile, Waterfall

Programing Languages:

C#, C, Java, Core Python

.Net Technologies: ASP.Net, Microsoft Azure, ADO.Net, Web services, Web API, RESTful API, JAVA, Android Mobile Development, Web Apps.

Containers and Orchestration:

Octopus Deploy, Bitbucket, Jenkins, Kubernetes, DevOps

Frameworks/Libraries: .Net 6, ASP.Net 4.7/5.0, ASP.Net Core, MVC, Web Forms, Entity Framework, SignalR, .Net MAUI.

Web Technologies: Webservices (RESTful, SOAP, WCF), HTML, CSS, Bootstrap, JavaScript, JQuery, ReactJs, AngularJs, XML, JSON, Encryption, SharePoint, Internet protocols, , Oracle CRM OnDemand

IDE's: Visual Studio

2019-2024, Microsoft SQL Server Management, Eclipse, Android Studio.

Databases: SQL Server, Oracle, NoSQL, MongoDB

Version Control Tools:

Git, GitHub, Jira.

OS: Windows, Linux.

Cloud: AWS, Oracle Cloud, Azure, GCP.

Certifications: Microsoft Azure Developer Associate - 204

SUMMARY

- 4+ years of experience as a .NET Full Stack Developer, proficient in SDLC phases including design, coding, testing, and deployment of enterprise-level applications.
- Expertise in front-end development using HTML5, CSS3, JavaScript, Angular, ReactJS, and Bootstrap, delivering responsive and interactive web applications.
- Strong server-side skills in C#, ASP.NET Core, MVC, Entity Framework, and ADO.NET for building scalable, secure, and performance-driven applications.
- Experienced in managing databases with SQL Server, Oracle, and MongoDB, writing efficient PL/SQL queries, stored procedures, and triggers.
- Hands-on experience with cloud platforms (Azure, AWS), including deploying applications, managing storage, and configuring CI/CD pipelines for automated software delivery.
- Proficient in Agile and Scrum methodologies with a track record of delivering projects on time while ensuring high-quality software solutions.

EXPERIENCE

Cigna Health Care, US | April 2023 - Current | .Net Full Stack Developer

- Architected a quality dashboard web application using ASP.NET MVC 5, C# 9.0, ODP.Net 19.10, AJAX, React.js 17, and jQuery 3.6, reducing Excel-based processes by 70% across 3 modules.
- Enhanced UI with SB Admin Bootstrap, jQuery Data Tables 1.10, and React.js 17, decreasing data entry errors by 40% across over 1 million records.
- Deployed applications on Azure with CI/CD pipelines, improving deployment speed by 40%.
- Leveraged Kubernetes 1.18 for container orchestration, enhancing application scalability.
- Automated deployments with Octopus Deploy 2020.6 and managed CI/CD pipelines with Jenkins 2.289 and GitLab 14, boosting code integration efficiency by 35%.
- Utilized Microsoft SQL Server and Entity Framework 6.2 for managing and optimizing data across critical business operations, improving data retrieval efficiency by 30%.
- Made use of JSON for efficient data integration and handling, ensuring seamless data exchange between front-end and back-end systems by 76%.
- Developed SOAP and RESTful Web Services to improve data interchange efficiency by 30% across six integrated systems and exploited Fiddler 5.0 for debugging and optimizing HTTP requests.
- Applied Windows authentication, role-based authorization to boost security by 35%.
- Led migration from TFS to Azure DevOps (ADO) for streamlined version control and project management, utilizing Git for strengthened source code management and collaboration.

Accenture Solutions Pvt Ltd, India | Jan 2022 – Dec 2022 | Software Engineer

- Designed a Patient Feedback web application using ASP.NET MVC 5, C# 9.0, ODP.Net 19.10, AJAX, and jQuery 3.6, enhancing user interaction and satisfaction by 40%.
- Created and carried out interactive ASP.NET MVC views with jQuery 3.6, AJAX, Bootstrap 4, and React.js 17, increasing user engagement by 25%.
- Optimized HTTP requests and page load times across 100+ user interfaces by up to 50%, using AJAX and jQuery, which refined overall application performance.
- Adopted ODP.Net 19.10 for efficient communication with Oracle databases and integrated MongoDB for NoSQL data handling, enhancing data processing by 35%.
- Coordinated database components with Oracle TOAD 14.2, including packages, storage, tables, and PL/SQL joins for 3 critical modules.
- Functioned JSON for compact, efficient data interchange and easy parsing between systems.
- Automated deployments with Octopus Deploy 2020.6 and organized CI/CD with Jenkins 2.289 and GitLab 14, increasing integration efficiency by 35%.
- Enforced security with Windows authentication, role-based authorization, and JUnit 5, reducing unauthorized access by 50% and achieving 99% defect-free microservices and consumed JIRA for project management and SharePoint for documentation and collaboration.

Aktrix Technologies, India | Jun 2020 – Dec 2021 | Jr .Net Developer

- Established a web application using ASP.NET MVC 5, C# 7.3, ODP.Net 19.10, AJAX, jQuery 3.3, and React.js, reducing data management by 40% & improved user satisfaction for 2 project units.
- Enhanced UI with Bootstrap 4.0, optimizing user experience and increasing engagement.
- Introduced XML for data exchange and configuration, reducing redundancy by 20% and analyzed data with SQL Server, ADO.Net Entity Framework 6.2, LINQ, and Oracle TOAD 13.0.
- Deployed on AWS with CI/CD pipelines, speeding up deployments by 40%; used Kubernetes 1.18 and Octopus Deploy 2020.6 for automation.
- Implemented Windows authentication, role-based authorization, and JUnit 4.12 for testing, reducing unauthorized access and deployment, executed projects with JIRA and SharePoint.
