

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing and scaling distributed systems, enterprise-grade APIs, and cloud-native applications. Strong backend expertise in Java (Spring Boot), with versatility across Python (Flask/Django) and JavaScript (React, Angular, Node.js).

Proven success in microservices, event-driven pipelines (Kafka, Redis), and high-throughput API design, delivering measurable improvements in latency, scalability, and uptime. Skilled in cloud platforms (AWS, GCP, Azure), container orchestration (Kubernetes, Docker), and CI/CD automation, enabling zero-downtime deployments for large-scale applications.

Experienced in applied machine learning, including NLP pipelines, neural networks, and MLOps deployment, combining software engineering expertise with data-driven innovation.

TECHNICAL SKILLS

Languages : Java, Python, JavaScript (ES6+), TypeScript, SQL, NoSQL, C++, R, Shell Scripting, Scala

Frameworks & Libraries : Spring Boot, Flask, Django, React, Angular, Node.js, Express.js, NestJS, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, Hugging Face Transformers, spaCy

Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, ECS, Lambda, Jenkins, GitHub Actions, Azure DevOps, MLflow

Databases : PostgreSQL, MySQL, MongoDB, Cassandra, DynamoDB, Aurora, Redis, Elasticsearch

Data & AI : Neural Networks, NLP Pipelines, MLOps, Apache Spark, Power BI, Tableau, FastAPI

Core Expertise: Distributed Systems, RESTful APIs, Microservices, CI/CD Pipelines, Agile Development

EXPERIENCE

Software Engineer

TechStar Group

Aug 2024 - Present

Lewisville, TX

- Architected and deployed Spring Boot microservices on AWS Lambda & Kubernetes, cutting release cycles by 70% through automated CI/CD (Jenkins, GitHub Actions).
- Developed backend APIs for cross-domain apps (healthcare, finance), boosting response time 60% with Redis caching, JVM tuning, and optimized DB queries.
- Designed high-throughput pipelines with Kafka + Avro serialization for real-time event processing, enabling scalable data workflows across 10K+ MAU.
- Built cloud-native permission management services using AWS CDK and Lambda, reducing manual access provisioning by 40%.
- Partnered with distributed teams across US/India, leading Agile sprints and proactively resolving production issues to sustain 99.9% uptime.

Full Stack Developer

Cognizant

Feb 2021 - Jan 2023

Hyderabad, India

- Refactored monolithic apps into Spring microservices, reducing service dependencies by 25% and accelerating feature delivery.
- Developed and secured RESTful APIs with Spring Security (JWT, OAuth2), ensuring compliance across enterprise-scale systems.
- Optimized MongoDB queries (indexing + aggregation), achieving 40% faster query performance on high-volume transactions.
- Migrated 200+ IBM MQ queues to latest version, improving throughput 23%, while automating 25+ build/deployment processes (saving 98% manual effort).
- Built Angular & React frontends with Redux/Context API, delivering reusable UI components and dynamic validation flows.
- Built and integrated GraphQL services to modernize legacy data access patterns, improving developer efficiency.

Junior Software Developer

Elsevier

Jan 2020 - Jan 2021

Bengaluru, India

- Designed and delivered 20+ reusable React/TypeScript components, reducing UI defects 30% and improving mobile usability 40% via lazy loading/responsive design.
- Integrated React apps with Java Spring Boot services, cutting integration errors by 20% and streamlining end-to-end API flows.
- Built Excel ingestion/export features and vendor workflow restrictions with SQL/DB2 APIs, enhancing product usability and compliance.
- Actively contributed to Agile sprints and code reviews, improving release cadence by 20% and reducing defects by 15%.

OTHER EXPERIENCE

AI/ML Research Engineer (Apprenticeship)

University of Texas at Arlington

Arlington, TX

Jan 2024 - May 2024

- Designed end-to-end ML workflows for lab incident analytics, reducing resolution time by 45%.
- Built NLP pipelines with Hugging Face Transformers to parse logs and classify incidents (>88% accuracy).
- Deployed deep learning models (BERT, BiLSTM) via FastAPI & Docker on AWS/GCP with MLflow for MLOps.
- Built Tableau & Power BI dashboards to deliver actionable insights from large datasets.

EDUCATION

The University of Texas at Arlington

Master of Science (MS) in Computer Science and Data Science

Arlington, TX
