

Omprakash Reddy Vallapu

Business Data Analyst

(954) 347- 7564 | vallapumprakashreddy@gmail.com | Boca Raton, FL | [LinkedIn](#)

SUMMARY

Experienced Business Data Analyst with 3 years of expertise in transforming complex datasets into actionable insights across healthcare and retail sectors. Skilled in SQL, Python, Power BI, and Tableau, with a strong focus on data cleaning, ETL processes, and KPI development. Proven ability to build interactive dashboards, optimize queries, and deliver real-time reporting solutions. Collaborated with cross-functional teams to align data strategies with business goals and improve operational efficiency. Known for delivering data-driven recommendations that reduce inefficiencies and enhance decision-making. Experienced in Agile environments and tools like JIRA, Confluence, and ServiceNow.

SKILLS

Data Analysis & Reporting: SQL, Microsoft Excel (Pivot Tables, VLOOKUP), Power BI, Tableau, Data Profiling, Power Query, A/B Testing

Data Management: Data Cleaning, Data Transformation, Data Validation, ETL Concepts, Data Governance, Metadata Management

Statistical & Analytical Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), Statistical Analysis, Trend Forecasting, Regression Analysis, Clustering

Database & Query Languages: SQL, Data Warehousing Concepts, Query Optimization, Redshift, Snowflake

Business Intelligence (BI): Power BI, Tableau, Google Analytics, Custom Dashboard Development, KPI Definition, Google Data Studio, Looker, QlikView

Tools & Platforms: JIRA, Confluence, ServiceNow, Google Sheets, Microsoft Office Suite

Domain Expertise: Healthcare Analytics, Retail Analytics, Patient Journey Mapping, Customer Segmentation, Claims Data Analysis, Inventory Analytics

Collaboration & Communication: Cross-functional Team Collaboration, Requirement Gathering, Stakeholder Reporting, Data Storytelling, Sprint Planning Tools, Business Process Mapping.

EXPERIENCE

HCA Healthcare, USA

Business Data Analyst

Jan 2025 – Present

- Spearheaded the analysis of post-discharge patient journeys by gathering cross-departmental datasets, transforming them into unified KPIs for tracking readmissions, satisfaction, and follow-up compliance using SQL, Power BI, and Excel.
- Orchestrated collaboration across clinical, operational, and data teams to define business rules and align KPI definitions, ensuring consistent interpretation of recovery metrics across hospital units.
- Engineered robust data validation pipelines using Python and Excel to detect survey and EHR anomalies, significantly improving data integrity for downstream dashboard reporting and insights generation.
- Constructed dynamic dashboards in Power BI and conducted comparative tool evaluations using Tableau to enhance real-time visibility into recovery patterns, geographic trends, and outcome gaps.
- Delivered critical insights to clinical leadership through storytelling dashboards, recommending targeted interventions that supported reduced readmission rates and improved follow-up engagement.
- Streamlined stakeholder feedback loops by integrating ServiceNow and documenting all metric changes and definitions within JIRA and Confluence, enhancing transparency and version control.

Experion Technologies, India

Business Data Analyst

Jan 2021 to Jul 2023

- Synthesized customer interaction data and hospital appointment logs using SQL and Python to uncover purchase patterns and patient flow inefficiencies across both retail and healthcare domains.
- Constructed interactive dashboards using Power BI and Tableau to visualize key performance indicators such as customer retention, wait times, and departmental efficiency for business leaders.
- Standardized product IDs and appointment durations by developing cleaning scripts in Python and aligning inconsistent data entries, improving reporting accuracy and system reliability.
- Collaborated with cross-functional teams to define business logic for metrics like loyal customer segmentation and no-show rate thresholds, ensuring consistent measurement and reporting.
- Modeled seasonal product demand and clinical appointment trends in Excel to support inventory planning and healthcare resource allocation during high-volume periods.
- Delivered performance insights through monthly stakeholder reviews, using data-backed storytelling to recommend actionable improvements in both store operations and hospital scheduling.
- Optimized JIRA workflows and feedback loops, managing change requests for dashboard enhancements and aligning analytics delivery with evolving user requirements.

EDUCATION

Masters in Computer Science

Apr 2025

Florida Atlantic University, USA

B. Tech in Computer Science and Engineering

Jun 2022

Jawaharlal Nehru Technological University, Hyderabad, India
