Summary

- 1+ years of experience in data analysis and engineering, specializing in healthcare and customer analytics.
- Expertise in Python and SQL for data cleaning, transformation, and extracting actionable business insights.
- Developed interactive Tableau dashboards that improved sales targeting by 25% and reduced customer churn.
- Automated data workflows, reducing redundancy by 40% and saving 30+ hours monthly in manual reporting.
- Implemented cloud-based data solutions (AWS, GCP) to optimize storage and processing efficiency.

Education

Illinois Institute of Technology

Master of Science (MS) in Computer Science (Data Analytics Specialization)

May 2025

Chicago, IL

Technical Skills

Programming Languages: Python(Pandas, NumPy, Matplotlib, Scikit-learn), R

Data Visualization: Tableau, Data scraping, Power BI, Seaborn

Data Management: Snowflake, Data Warehousing (ETL), Excel, VBA, MS access, Data Cleaning & Transformation

Databases: MySQL, PostgreSQL, Snowflake, BigQuery, MongoDB, NOSQL

Cloud Technologies: AWS, Redshift, Lambda, GCP

Work Experience

Junior Data Engineer

Idax Infotech

Jan 2024 – Feb 2025

California, USA

- Built interactive dashboards in Tableau and Power BI to track customer churn, engagement, and acquisition trends and boosted sales by 25%.
- Reduced data redundancy by 40% through Python-based data cleaning and validation processes.
- Analyzed customer behavior and quarterly trends to identify sales drop causes and suggest improvements.

Certifications

- British Airways Machine Learning and Consumer Behavior Forecasting
- Tata Data Visualization: Empowering Business with Effective Insights

Projects

British Airways review analysis

- Scraped and processed 1,000+ British Airways reviews using Python (BeautifulSoup, pandas) for structured sentiment analysis.
- Applied NLP techniques (TextBlob, lemmatization, stopword removal) to classify sentiments and extract insights from customer feedback.
- Identified key themes via LDA topic modeling, including flight experience, customer service, seat comfort, and food quality.
- Visualized results with pie charts and word clouds; delivered insights through a PowerPoint summary slide for stakeholders.
