pakshal.bhandari@gmail.com | LinkedIn: pakshal-bhandari | GitHub: pakshalbhandari | (260)418-1339 | Pleasanton, CA

Skills

Python, Django Rest Framework, FastAPI, SQL, PostgreSQL, Azure (Functions, Monitor, Key Vault), AWS (Athena, S3, Lambda), Docker, Kubernetes, Git, CI/CD, Redis, Kafka, Celery, Jenkins, Terraform, Bicep, Prometheus, Grafana, Vault, Microservices, Load Balancing, Caching, Data Pipelines, ETL, Snowflake

Experience

AI Engineer Intern, Quicken – Menlo Park, CA Jun 2025 – Present

- Designed a dual-agent NL2SQL system using Google ADK and FastMCP, reducing query creation time from 15 minutes to under 30 seconds.
- Built secure, high-availability NL2SQL pipeline on AWS Athena with 92% accuracy for financial queries.
- Developed semantic retrieval pipelines with vector DBs, increasing query relevance by 25%.
- Optimized LLM inference, reducing latency by 40% while maintaining reliability.

Software Engineer Intern, Quicken – Menlo Park, CA May 2024 – Aug 2024

- Engineered Athena-backed data pipelines to process millions of transactions, reducing query execution time by 20% and improving backend reliability.
- Built Azure QuickSight dashboards with Athena integration to streamline financial reporting, boosting operational efficiency by 15%.
- Automated revenue reconciliation workflows across App Store and Google Play, achieving 100% accuracy and eliminating manual reconciliation steps.
- Enhanced backend observability and error tracking, reducing incident resolution time by 25%.

Software Engineer, Betsol – Bangalore, India Jan 2022 – Jul 2023

- Scaled REST APIs within a microservices architecture for Zmanda's enterprise backup platform, handling 10K+ daily requests with high availability.
- Implemented Docker and Jenkins CI/CD pipelines, reducing release cycles by 35% and improving deployment reliability.
- Integrated HashiCorp Vault for secure secrets management, ensuring compliance and enhancing system security.
- Designed client-side deduplication and replication strategies with Restic, improving performance and lowering storage costs.

Associate Software Engineer, Betsol – Bangalore, India Aug 2020 – Dec 2021

- Migrated 1M+ Salesforce records to HubSpot with Flask APIs and Celery, achieving zero downtime during migration.
- Automated cross-platform data sync between CRM systems, improving operational accuracy and reducing manual intervention by 40%.
- Performed data analysis to identify reliability gaps and inform system improvements.

Software Intern, Betsol – Bangalore, India Jan 2020 – Mar 2020

- Built asynchronous REST APIs with Redis and Celery, improving scalability and throughput for data processing.
- Secured data at the chunk level using SHA-256 encryption and dynamic salting, cutting license-related incidents by 60%.
- Developed Snowflake integration pipelines for advanced analytics.

Education

Purdue University – M.S. in Computer Science Aug 2023 – May 2025

Visvesvaraya Technological University – B.S. in Computer Science Aug 2016 – Aug 2020
