Professional Summary

Detail-oriented QA Engineer with 3 years of experience spanning both software testing and development. Skilled in manual testing and test automation using Selenium WebDriver, Java, TestNG, and Cucumber—acquired through self-directed learning and hands-on practice. Proficient in functional, UAT, regression, and integration testing of enterprise-level applications. Knowledge of Azure DevOps, API testing with Postman, test case design, defect tracking, and Agile methodologies. My background in software development gives me a strong foundation for scripting, debugging, and technical problem-solving. Actively pursuing QA roles, where I can apply my expertise and continuous improvement mindset to deliver exceptional results.

Professional Experience

ScoreMe Solutions

Gurugram, India

QA Engineer

November 2023 – March 2024

Worked on the GST (Goods and Services Tax) project, which helped businesses stay compliant with GST regulations while making smarter financial decisions. My role involved:

- Testing the web app for accuracy, ensuring invoices were organized, and that everything from customer data to GST filing status was on point.
- Collaborated with developers to identify, log, and verify bug fixes using Jira, improving defect resolution time by 20%.
- Used Postman for API testing and SQL queries to confirm backend data matched what users saw.
- Reporting issues and progress using Jira, making sure the team was aligned on what's next.
- Conducted functional, regression, and integration testing for web application modules.

Worldsoft IT Solution Pvt. Ltd.

Bhopal, India

QA Engineer

September 2021 – October 2023

- Worked on the IHA Application, a platform connecting independent hotels with customers across the globe.
 - Collaborated with cross-functional teams—developers, product managers, and more—to make sure every feature was tested thoroughly before going live.
 - Validated data integrity with SQL, making sure bookings and payments were accurate.
 - Performed smoke, sanity, and regression testing for every release cycle to ensure feature stability.
-

BYJU'S

Math Tutor

Remote (India)

March 2021 – August 2021

- Taught mathematics to K4-K12 students in one-on-one and group settings.
- Adapted communication styles based on individual learning needs, building rapport, and clarity.

AD3I

Software Developer

Hyderabad, India

March 2019 – September 2019

- Supported backend and UI development tasks in Java and HTML.
- Participated in debugging and minor enhancements, contributing to code stability and understanding the developer mindset—an asset in QA Testing.

Education

RGPV University

Bachelor of Engineering (BE) in Computer Science

August 2013 – July 2017

Bhopal, India

Creative Concept

Web Designing

June 2017 – November 2017

Pune, India

Centre for Development of Advanced Computing

PG Diploma in Advanced Computing

August 2018 – February 2019

Hyderabad, India

Skills

-
- **Testing Methodologies:** Manual Testing (Sanity, Smoke, Regression, API Testing, UAT).
 - **Automation Testing:** Selenium WebDriver, TestNG, Cucumber (Java), Tosca (beginner level).
 - **API Testing Tools:** Postman – Testing RESTful APIs including request/response validation and authentication.
 - **Test Management:** Azure DevOps, Jira.
 - **Test Documentation:** Test case design, execution, and maintenance of test artifacts.
 - **Development Process:** Agile/Scrum – Collaboration with cross-functional teams in iterative development cycles.
 - **Database:** SQL – Data validation using SELECT, JOIN, and filters.

Additional Information

-
- Work Authorization: Eligible to work in the U.S. without sponsorship
 - Availability: Immediate
 - Willing to relocate or work remotely
