SKILLS

Java | C++ | Python 3 | C# | Go | Shell Script | Assembly (Intel) | JavaScript (ES6) | TypeScript | HTML | CSS | React.js | AngularJS | Redux | Node.js | Express.js | Spring Boot | Spring MVC | Django | Android SDK | JNI | MySQL | MongoDB | PostgreSQL | Mongoose | NodeMon | Webpack | Mocha | GitHub | Postman | Jasmine | Tableau | Power BI | IntelliJ | VS Code | Docker

EXPERIENCE

Software Engineer | One Community Global, USA

Feb 2025 – Present

- Developed and maintained real-time dashboards in ReactJS to track volunteer activity and project progress, utilizing React Context and hooks for efficient state management, which reduced unnecessary re-renders.
- Optimized RESTful APIs using Node.js and Express.js by organizing routes with Express Router and applying middleware for authentication and error handling, resulting in faster backend response times and smoother data operations across user sessions.
- Served as a member of the hiring committee, conducting candidate interviews, assessing technical and interpersonal skills, and drafting evaluation reports.

Graduate Teaching Assistant | University of North Carolina, Charlotte

Jan 2024 – Dec 2024

- Reviewed and graded MERN-stack project submissions, providing technical feedback, improving students' code quality, and designs.

Software Engineer | Velotio Technologies Pvt Ltd

March 2020 - Nov 2022

- Developed and integrated APIs and Android SDKs for music services like Amazon Music, Spotify, and Apple Music, applying open-source multimedia frameworks: GStreamer and ffmpeg in C++ for media processing and using Java for Android application development.
- Implemented multithreading and inter-process communication using pipes in C++ to enable efficient real-time data transfer and smooth music streaming.
- Created and maintained fully automated CI/CD pipelines for code deployment.

Software Engineer | Deekshaa Infosystems Private Limited

April 2019 - March 2020

- Developed Python-based microservices integrating third-party APIs from Tuya's IoT Cloud platform to build security solutions for offices and ATMs, enabling real-time remote monitoring, access control, and automated alerts.
- Implemented features such as automated alert notifications based on user survey and feedback, and updated technical documentation to ensure accurate and seamless application usage.

ACADEMIC PROJECT

PixelPalooza, MERN Stack

- Developed a full-stack photo-sharing web application using React.js for the frontend interface, implementing client-side routing with react-router-dom and integrating Axios for API communication, enabling users to upload, browse, and interact with photos effortlessly.
- Implemented backend APIs using Node.js and Express.js, implementing JWT (JSON Web Tokens) for secure user authentication, and the bcryptjs library for password hashing, enabling reliable handling of photo uploads, user sessions, likes, and comments.
- Utilized MongoDB using Mongoose for scalable NoSQL data storage and schema management, and managed image files on a local server.

File Handling, C++

- Developed a C++ project implementing file handling operations, including reading, writing, appending, and managing binary and text files using system calls (open(), read(), write(), lseek()) and fstream library.
- Optimized file I/O performance by using asynchronous stream-based processing and efficient buffer management, while ensuring secure data handling through robust error-checking mechanisms.

EDUCATION

Master of Science in Computer Science

University Of North Carolina at Charlotte, NC, USA

Dec 2024

Bachelor's and Master's of Science in Computer Science

Savitribai Phule Pune University, Pune, Maharashtra

Oct 2019
