

## G. PALLAVI

Seattle, WA | +1(475) 342-0779 | [pg281877@gmail.com](mailto:pg281877@gmail.com) | [www.linkedin.com/in/palli0311](https://www.linkedin.com/in/palli0311)

### PROFESSIONAL SUMMARY

I am a highly skilled Data Engineer with over 3 years of experience in designing and implementing scalable data infrastructure using AWS technologies and PySpark. Proven track record in optimizing data processing pipelines, enhancing data accessibility, and ensuring compliance with healthcare regulations. Strong expertise in data warehousing, ETL/ELT processes, and data visualization, with a master's degree in computer science and multiple certifications in data engineering and machine learning.

### EXPERIENCE

#### Data Engineer

##### *Findica Inc, WA- Feb 2024 -Present.*

- Architected and deployed end-to-end data infrastructure using AWS technologies (S3, Redshift, Aurora) to enable scalable data processing and analytics. Elevated data warehouse schemes in Redshift to improve query performance and data accessibility.
- Gathered business requirements and crafted data frameworks that empower critical business functions, ensuring alignment with stakeholder needs. Established data governance frameworks to ensure compliance with healthcare regulations while maintaining data accessibility.
- Transformed complex datasets through advanced integration techniques in a cloud environment, streamlining ELT processes that cut down processing times by over 30% while enhancing overall data accessibility.
- Pioneered a user-friendly dashboard experience in Tableau that enabled real-time access to key performance indicators; facilitated increased decision-making autonomy among sales and marketing personnel across four departments.
- Facilitated workflows with Apache Airflow, reducing manual interventions and cutting pipeline execution times by 40%.

#### Senior Software Engineer

##### *Capgemini Technology & Services Limited, Hyderabad, India - Oct 2021 – July 2022*

- Utilized Python (NumPy, Matplotlib, Pandas) to clean and organize healthcare data. Converted Qlik Sense reports to Power BI, boosting user engagement by 40%. Integrated Amazon S3 data into Power BI for upgraded reporting.
- Employed Excel for data cleaning and segregation using Lookup and Pivot tables. Retrieved and managed data from Apache Impala using SQL (temporary tables, CTEs, joins).
- Streamlined web scraping with Selenium and API integration, reducing manual work by 30 hours weekly.
- Engineered secure and scalable data storage using AWS (S3, Glue) for healthcare data. Applied data governance controls to maintain data integrity, compliance, and security.
- Collaborated with business and tech teams to gather data requirements and design ETL pipelines.

#### Software Engineer

##### *Capgemini Technology & Services Limited, Hyderabad, India - July 2019– Oct 2021*

- Constructed scalable AWS data architectures, centralized data from MySQL, PostgreSQL, and CSV files into an S3 data lake, efficiently managed ETL pipelines with Apache Spark and Hadoop, and enhanced SQL query performance with improved indexes.
- Implemented real-time data ingestion using Apache Kafka and created and simplified testing frameworks for data validation and quality assurance. **Troubleshoot**ed and optimized data processing workflows, ensuring high performance and reliability.
- Led initiatives to streamline data workflows, reducing manual intervention by 40%, and developed comprehensive data models to support enterprise-wide analytics.

### SKILLS

- **Cloud & Data Infrastructure:** AWS (S3, EMR, Redshift, Aurora, Lambda, Kinesis, Glue, IAM, KMS, Step function), Data Architecture Design.
- **Data Warehousing & BI:** Snowflake, Redshift, Data Modeling, Schema Design Business Intelligence.
- **ETL/ELT Tools:** Apache Spark, Airflow, dbt, Informatica, SSIS.
- **Programming Languages:** Python, SQL, Scripting, Scala, Java, R (basic), PHP (basic), HTML, CSS, JavaScript, Gosu, C++, C, Problem Solving.
- **Quantitative Analysis:** Proficient in conducting statistical analysis, predictive modeling, and data visualization using Python, R, SQL, and Tableau. | **Big Data Technologies:** Hadoop, Hive, Spark, EMR.
- **Databases:** MySQL, PostgreSQL, MySQL. | **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn.
- **Tools & Frameworks:** Git, Jira, Agile Methodology.
- **Web Services:** SOAP and REST API

### EDUCATION

##### *University of Bridgeport, Bridgeport, CT- Aug 2022 - Dec 2023*

- Major: Master of Science, Computer Science - CGPA: 3.67.

### PROJECTS

- **Health Insurance Cross-Sell Prediction Project:** Formulated and maintained test suites for to ensure data accuracy and application testing, ensuring high data quality and reliable application performance. Collaborated with DevOps and application development teams to integrate automated testing into CI/CD processes, reducing manual testing efforts by 40% and accelerating deployment cycles.
- **Data Pipeline Optimization for Business Analytics Platform:** Optimized ETL processes and ensured data integrity within the data quality pipeline framework, improving data accuracy and reliability. Launched advanced data transformation techniques, resulting in a 30% reduction in data processing times and enhanced data insights for business analytics.
- **End-to-End Data Integration and Visualization** system by leveraging ETL pipelines, Python, and GitHub Actions; fine-tuned data processing, resulting in a 50% reduction in manual data manipulation tasks, enhancing data insights.

### CERTIFICATIONS

- Databricks Certified **Data Engineer Associate** (Certification Date: August 2024).
- Databricks with **Machine Learning** Certified (Certification Date: October 2024).
- **Data Analysis** with Databricks Certified (Certification Date: November 2024).
- **Agile Software Development**, University of Minnesota (Completion Date: May 2023).
