

Pallavi Ramineni

Data Analyst

Jersey City , NJ | [LinkedIn](#) | 551 371 5754 | pallaviramineni25@gmail.com

Data Analyst with 3+ years of experience in **data analysis, reporting, and visualization** across financial services and technology. Proficient in **SQL, Python, R, Tableau, Power BI**, and skilled in **machine learning, predictive modeling, and applied mathematics** to uncover trends and drive insights. Adept at **data cleaning, ETL processes, and dashboard development**, with a proven ability to translate complex data into **business strategies** that improve efficiency, reporting accuracy, and decision-making.

WORK EXPERIENCE

JPMorgan Chase

Data Analyst

Jan 2025 – Present

- Designed and developed **interactive Tableau dashboards from scratch**, enabling investment accounting teams to track key financial metrics with improved accuracy and faster reporting.
- Partner with **process owners and business users** to gather requirements and translate them into actionable reporting solutions, ensuring alignment with investment accounting needs.
- Administer Tableau Server by creating **users, user groups, projects, roles, and permissions**, ensuring secure and efficient data access.
- Utilized **SQL (T-SQL) optimization and indexing techniques** to improve query performance and reduce reporting runtime by 40%.
- Built automated processes in **Tableau Prep** for data cleansing and transformation, ensuring accuracy, continuity, and consistency of large investment datasets.
- Conducted **data audits and integrity checks**, resolving inconsistencies and improving data reliability for decision-making.
- Collaborated with cross-functional developers, organized project meetings, and provided guidance on selecting appropriate tools and approaches, improving overall team efficiency.
- Validated Tableau dashboards by reconciling against investment accounting platform data to ensure 100% accuracy of reporting outputs.
- Streamlined reporting processes for **investment accounting data**, reducing manual effort and optimizing workflows.

Hexaware Technologies

Data Analyst

Aug 2020 - Jul 2023

- Partnered with business stakeholders to gather requirements and translate them into technical specifications, ensuring accurate **coding and data mapping (SQL, ETL)** for enterprise projects.
- Conducted in-depth **data analysis (SQL, Excel, Tableau)** to support system enhancements and communicated findings to operating and development teams, reducing requirement gaps by 20%.
- Collaborated with upstream data providers and downstream application teams to resolve **data integration and workflow** issues, improving data accuracy and system reliability.
- Delivered analysis results through **dashboards and presentations (Tableau, Power BI, Excel)**, enabling leadership to make informed business and technical decisions.
- Performed **impact analysis** on upstream data changes and user requests, minimizing risks and avoiding project delays.
- Developed and executed **User Acceptance Testing (UAT) scripts**, coordinating with end users to validate system functionality and ensure smooth deployments.

EDUCATION

Saint Peter's University

USA

Master of Science - Data Science

Sep 2023 – May 2025

Sreenivasa institute of technology and management studies

India

Bachelor of Engineering: Computer science engineering

May 2018 – Jun 2022

SKILLS & INTERESTS

Data Analysis & Visualization: SQL, Tableau, Power BI, Excel (Pivot Tables, VLOOKUP, Macros), Python (Pandas, NumPy, Matplotlib, Scikit-learn), R

Database & ETL Tools: Oracle SQL, MS SQL Server, PostgreSQL, MySQL, Tableau Prep, Alteryx, SSIS

Machine Learning & Statistics: Regression Analysis, Classification, Clustering, Predictive Modeling, Time Series Forecasting, Feature Engineering, Model Evaluation, Hypothesis Testing

Mathematics & Quantitative Methods: Linear Algebra, Probability, Statistics, Calculus, Optimization, Statistical Inference, Data Modeling

Project & Reporting: Dashboard Development, Data Modeling, KPI Tracking, Data Validation, Data Quality Assurance, Forecasting, Ad-hoc Reporting

Methodologies & Techniques: Data Cleansing, Data Mapping, Impact Analysis, UAT (User Acceptance Testing), Requirements Gathering, Root Cause Analysis, Process Improvement

Collaboration & Tools: JIRA, Confluence, MS Excel, MS PowerPoint, MS Project, SharePoint, Git

PROJECTS

Stock Market Forecasting Dashboard (Python, NLP, Power BI)

- Analyzed historical stock trends and social media sentiment using NLP, identifying key patterns influencing stock performance.
- Built a Power BI dashboard for traders to visualize sentiment shifts in real time, improving decision-making efficiency.
- Reduced prediction error by 18%, enabling more accurate investment strategies.

F1 Data Engineering Pipeline – (Azure, Databricks, Delta Lake, Data Factory, Power BI)

- Analyzed historical stock trends and social media sentiment using NLP, identifying key patterns influencing stock performance.
- Built a Power BI dashboard for traders to visualize sentiment shifts in real time, improving decision-making efficiency.
- Reduced prediction error by 18%, enabling more accurate investment strategies.

CERTIFICATION

- **Certified in Big Data Analytics course**
- **Certified in Python for Data Science and Machine Learning course**
- **Certified in Generative AI for beginners**
- **Certified in Prompt Engineering in ChatGPT**
- **Certified from Accenture on Artificial Intelligence**
- **Certified from Coursera on project management**
