

Pandu Ranga Vital Sai Paladugu

Data Analyst

MO | 901-209-9554 | vitalpaladugu@gmail.com

SUMMARY

Data Analyst with 3+ years of experience delivering actionable insights through advanced analytics in fast-paced environments. Proficient in **Python**, **R**, **SQL**, and **MS Excel (VBA)**, utilizing **NumPy**, **Pandas**, and **Ggplot2** for robust data manipulation and visualization. Skilled in **Supervised** and **Unsupervised Learning**, including **Linear Regression**, **Logistic Regression**, and **K-means** clustering, to drive predictive modeling and customer segmentation. Experienced in creating impactful visualizations with **Tableau** and **Power BI**, and leveraging **Apache Spark** on **Databricks** for efficient big data processing within **GCP** and **MySQL** ecosystems. Adept at applying **Agile** and **Waterfall** methodologies to ensure timely project delivery, complemented by strong **critical thinking**, **problem-solving**, and **communication** skills to translate complex data into clear, stakeholder-focused solutions.

SKILLS

Methodologies: SDLC, Agile, Waterfall
Languages: Python, R, SQL, SAS, MS Excel (Advanced, VBA)
Packages: NumPy, Pandas, Matplotlib, SciPy, Seaborn, Ggplot2
Machine Learning Skills: Supervised Learning, Unsupervised Learning, Classification, Linear Regression, Logistic Regression, Decision Trees, Random Forests, Naive Bayes, KNN, K-means, CNN, NLP
Visualization Tools: Tableau, Power BI, Microsoft Excel, QlikView, Google Analytics
Cloud Platforms: AWS, Google Cloud Platform (GCP), Azure
Big Data Technologies: Hadoop, Hive, Apache Spark, Databricks
Database: MySQL, SQL Server, MongoDB, Snowflake
Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Problem-Solving, Communication, Presentation

EDUCATION

Master of Science in Information Science and Technology Missouri University of Science and Technology	May 2025
Bachelor of Technology in Electronics and Communication Engineering Joginpally B R Engineering College	May 2022

EXPERIENCE

Cigna, MO | Nov 2024 - Current | Data Analyst

- Utilized **Python** with **NumPy** and **Pandas** to preprocess and clean large healthcare datasets, reducing data processing time by 30% through optimized data wrangling techniques.
- Implemented **Supervised Learning** models, including **Linear Regression** and **Logistic Regression**, to predict patient readmission rates, achieving a model accuracy of 85%.
- Developed interactive dashboards in **Tableau** to visualize patient outcome metrics, enabling stakeholders to make data-driven decisions for resource allocation.
- Applied **Agile** methodologies to collaborate with cross-functional teams, delivering iterative analytics solutions within tight sprint cycles.
- Conducted **SQL** queries on **MySQL** databases to extract and analyze claims data, identifying cost-saving opportunities worth \$500K annually.
- Leveraged **Critical Thinking** and **Problem-Solving** skills to identify data discrepancies, improving data integrity by 25% through rigorous validation processes.
- Presented actionable insights to senior management using **MS Excel (Advanced)**, incorporating **VBA** scripts to automate repetitive reporting tasks, saving 10 hours weekly.

Orion Technolab, India | Jan 2021 - July 2023 | Data Analyst

- Built **R** scripts with **Ggplot2** to create visualizations for customer behavior analysis, enhancing marketing campaign effectiveness by 20%.
- Designed and deployed **Unsupervised Learning** models, such as **K-means** clustering, to segment customers for targeted product recommendations, increasing conversion rates by 15%.
- Utilized **Apache Spark** on **Databricks** to process large-scale e-commerce datasets, improving data pipeline efficiency by 40%.
- Created advanced reports in **Power BI** to track key performance indicators (KPIs), providing real-time insights to the product development team.
- Employed **Waterfall** methodology to ensure structured delivery of analytics projects, meeting all project milestones on time.
- Queried **MongoDB** databases to extract unstructured data for **NLP** analysis, uncovering sentiment trends that informed product feature updates.
- Enhanced team collaboration through strong **Communication** and **Presentation** skills, delivering bi-weekly reports to stakeholders with clear, actionable recommendations.
- Integrated **Google Cloud Platform (GCP)** for scalable data storage and processing, reducing infrastructure costs by 10% through optimized resource allocation.
