Summary

- Skilled Business Analyst with 3+ years of experience in CRM, ERP, and e-commerce systems. Proficient in BRD/FRD creation, gap analysis, SQL, Python, Power BI, JIRA, and SAP. Strong in Agile/Waterfall methods, stakeholder communication, and process mapping. Known for problem-solving, teamwork, and delivering data-driven solutions.

Education

Master's in Project Management

St. Francis College, 179 Livingston Street, Brooklyn

Jan 2023 - Aug 2024

Bachelor of Petroleum Technology

Aditya Engineering College, Surampalem, East Godavari

Jul 2017 – Jul 2021

Skills

- Project & Agile Management: JIRA, Confluence, MS Project, Azure, Agile (Scrum, Kanban), Waterfall, SDLC, Time Management, Task Prioritization
- Business Analysis & Design: MS Visio, IBM Rational Rose, Figma, Lucidchart, Draw.io, BRD, FRD, SRS, Process Flows, RTM, User Stories, Use Case Narratives, GAP Analysis, Root Cause Analysis (RCA), Cost-Benefit Analysis, SWOT Analysis, Business Process Modeling, Workflow Diagrams, Process Improvement (BPMN)
- Data Analysis & Reporting: Power BI, SQL, Python, Excel, Data Visualization
- Enterprise Platforms: Oracle, Salesforce, Shopify
- Quality Assurance & Testing: HP Quality Center, Test Director, Continuum (SQDB), User Acceptance Testing (UAT)
- Communication & Collaboration: Microsoft Teams, Slack, Zoom, Verbal & Written Communication, Active Listening, Stakeholder Management, Collaboration, Empathy, Negotiation
- Analytical & Problem-Solving: Critical Thinking, Problem-Solving, Root Cause Analysis, Analytical Thinking
- Technical Concepts: Understanding APIs, System Upgrades, Data Pipelines
- General Software: Microsoft Word, PowerPoint
- Adaptability: Adjust quickly to new tools, processes, or stakeholder needs

Certificate

- AWS Certified Solutions Architect – Associate | AA-C03
- Microsoft Power BI | PL-300
- Microsoft Certified – Azure Fundamentals | AZ-900

Experience

Sitezeus, USA

Aug 2024 - Current

Business Analyst

- Led requirement gathering for Tech/IT software and system upgrades, eliciting, analyzing, and documenting business and system requirements (BRD, FRD, user stories) impacting scope, cost, and risk; reduced ambiguity by 30% through clear specifications and innovative documentation methods.
- Developed flow diagrams for the Business process of the company, UI Wireframes, and Mockups using Microsoft Visio.
- Detailed user stories from the Product and Sprint Backlogs with a clear understanding of Burndown charts to support agile tracking.
- Executed requirement gathering, modeling, system design, testing, validation, workflows, and data management with high efficiency.
- Facilitated stakeholder interviews and SME workshops, using strong communication and collaboration skills to validate 90% of business rules, GUI expectations, and statistical insights using JIRA and Microsoft Excel.
- Designed wireframes and created process models using MS Visio and IBM Rational Rose; utilized user interface principles and business process mapping for cross-functional clarity.
- Conducted gap analysis and created 15+ use cases; used Power BI and Python to deliver data-driven insights, boosting reporting accuracy by 25%.
- Contributed to Agile ceremonies and collaborated with technical teams, showcasing adaptability, leadership, and collaboration to drive project momentum and align with business goals.
- Designed Tableau dashboards and ran SQL queries, leveraging analytical thinking and attention to detail to deliver actionable insights through Excel and data visualization tools.

CitiusTech, India

Jul 2020 - Dec 2022

Business Analyst

- Facilitated JAD sessions and reduced requirement ambiguities by 20% through collaborative and innovative stakeholder engagement; addressed critical business needs via clear specification documentation.

- Created Power BI reports to monitor key supply chain metrics; performed quantitative analysis to speed up procurement decision-making using data modeling and query techniques.
- Conducted Root Cause Analysis and automated processes using Python; implemented batch processes that improved service desk response by 25%.
- Migrated documents from shared drives to SharePoint and managed code reviews, breaks, and merges using Git, ensuring version control and collaboration efficiency.
- Assisted in drafting ETL requirement documents for data extraction, analysis, and loading, and developed presentations to communicate process changes to stakeholders clearly
- Built data validation scripts and enhanced reporting processes through programming and Excel, reducing manual errors and increasing efficiency.
- Managed Agile sprints in Jira, ensuring on-time delivery and aligning project goals with business growth and IT development priorities.
- Executed test plans and UAT scripts using HP Quality Center; enhanced product quality and reduced post-deployment issues by applying structured QA and information technology principles.

Project:

IT Service Management (ITSM) Process Improvement

- Focused on streamlining incident, request, and change management workflows, leveraging tools like ServiceNow to enhance efficiency and reduce resolution times within IT service operations.
