Education

University Of Southern California

January 2024 - December 2025

Masters of Computer Science (GPA: 3.56/4)

Coursework: Analysis of Algorithms(Data Structures and Algorithm), Web and Mobile Development, Machine Learning for Data Science(ML), Information Retrieval and Web Search Engines, Software Engineering, Database Systems

Indus University

July 2019 – May 2023

Bachelors of Technology in Computer Science and Engineering (GPA: 3.98/4)

Skills

Languages: Java, HTML, CSS, Swift, SwiftUI, JavaScript, Python , C++(basic), C#(basic), Kotlin, TypeScript

Framework : J2EE, Spring, Spring Boot, Hibernate, MVC, React, NodeJS, Angular, Flask, MERN Stack, Linux, ExpressJS, IIS Architecture

Databases: MySQL, SQL Server,MongoDB, NoSQL

Tools: Eclipse, IntelliJ, SQLyog, MySql Workbench, VSCode, Postman, Xcode, Git, Github(Version Control) , BitBucket , GitLabs ,Visual Studio, Excel, Google Cloud Platform, Amazon Web Services, Slack, Jira, Streamlit, Android Studio

Professional Experience

Software Developer:Frontend

June 2025 – Present

Keck School Of Medicine(USC)

USA

- Crafted internal web modules for the Accounting and Finance department at Keck School of Medicine using **JavaScript**, **C#**, and **T-SQL**, operating within a Microsoft **IIS architecture** to streamline department-specific workflows
- Troubleshoot critical bugs, expanded existing features, and liaised with departmental stakeholders to tailor functionality to evolving financial reporting and operational needs

Full stack Engineer Intern

May 2025 – Present

Ascend Cargo Systems

USA

- Built a scalable appointment coordination system with Java, Spring Boot, and MySQL, automating logistics workflows between carriers and buyers to replace manual processes and enhance operational efficiency
- Refined backend stability by restructuring database schemas, ensuring transactional integrity, and resolving 15+ critical Jira issues; collaborated with the CEO on technical demos that helped convert 2 enterprise clients

Software Development Intern

December 2022 – December 2023

Softvan PVT. LTD

India

- Contributed to the design of **microservices architecture** across 5 projects, leveraging **REST APIs** and **Python** to achieve 30% reduction in deployment time while enhancing system scalability, fault tolerance for seamless operations
- Deployed 4 advanced analytics dashboards using **Angular**, **TypeScript**, and **Highcharts**, boosting data accessibility by 25% and delivering real-time insights that deepened client decision-making efficiency by 40%
- Collaborated across cross-functional teams to enhance web responsiveness and optimize load times using **AJAX** and **JavaScript**, achieving a 10% boost in project efficiency and significantly improving user experience
- Enhanced website functionality by leveraging **Java**, **JSON**, **XML**, and **JavaScript** to boost code efficiency, ensure cross-platform compatibility, and deliver robust end-user performance

Software Engineering Consultant

October 2021 – October 2022

Sac Industries

India

- Designed a **custom software** system for a box manufacturing company using microservices to automate processes and complex calculations, resulting in a 30% productivity boost and streamlined workflows
- Pioneered a secure multi-tier architecture using **Java**, **Spring Boot MVC**, **MySQL**, and **JavaScript**, streamlining tasks by 50% and significantly enhancing operational efficiency and the user experience
- Implemented advanced access control with CEO-level permissions using **Spring Security**, securing sensitive login data and enhancing privacy for over 10 authorized users, achieving a reduction of unauthorized access incidents

Academic Projects

Stock APP | Swift,SwiftUI,MongoDB,NodeJS,React,Bootstrap,MERN Stack

May 2024

- **Full-Stack Reactive Web Applications:** Programmed scalable web applications using **React** for the frontend and **Node.js** for the backend, with **MongoDB** as a serverless database for efficient data management.
- **Seamless iOS Stock Trading App:** Created 10+ interactive UI components in **Swift** and integrated 15+ API endpoints using **Node.js** to enable real-time trading functionality.

CodeLens.AI| FastAPI, Langchain, Firestore, GithubLab, Python

- Pioneered an AI-driven GitHub repo analysis SaaS, reducing manual code review time by 70% using Agile practices
- Generated final reports highlighting security risks and inefficiencies, refining code quality and improving overall development workflows
