

SUMMARY

Data Analyst with 3+ years of experience in SQL, Python, and BI tools, specializing in turning complex datasets into clear insights that drive business outcomes. Skilled in automating pipelines, building dashboards, and supporting data-driven decision-making across finance, operations, and technology teams. Experienced with Snowflake, Redshift, and SAP HANA, with proven ability to collaborate with cross-functional stakeholders and communicate results effectively.

TECHNICAL SKILLS

Data Analysis & Statistics: Exploratory Data Analysis (EDA), A/B Testing, Hypothesis Testing, Regression, Clustering, Cohort Analysis, KPI Development, Data Validation
Programming & Scripting: Python (Pandas, NumPy, Matplotlib, Seaborn, API Integration), SQL (CTEs, Joins, Window Functions, Query Optimization), Excel VBA
Databases & Warehousing: Snowflake, Amazon Redshift, PostgreSQL, MySQL, SQL Server, SAP HANA, Google BigQuery
Business Intelligence & Reporting: Power BI (DAX, Power Query), Tableau, Qlik Sense, Excel Dashboards, Hex
ETL & Data Pipelines: dbt, Alteryx, SQL ETL, SAP BODS, Azure Data Factory, Apache Airflow
Cloud Platforms: AWS (S3, Redshift, Athena, DynamoDB, EC2), Azure (Databricks, Synapse, Data Factory), GCP (BigQuery, Cloud Storage)
ERP & Finance Systems: SAP S/4HANA, JD Edwards, Oracle ERP
Collaboration & Tools: Git, GitHub, Jira, Confluence, Agile Scrum, SDLC

PROFESSIONAL EXPERIENCE

- Data Analyst | Edward Jones, NY, US**

Jul 2025 - Current

 - Automated SQL and Python pipelines integrating APIs, reducing manual processing hours by 35% and improving accuracy of real-time reporting across finance and operations.
 - Built Power BI dashboards tracking KPIs, enabling leadership to spot trends, optimize resources, and increase data-driven decision-making efficiency by 28% organization-wide.
 - Queried and validated high-volume datasets in Snowflake and Redshift, improving data quality and increasing executive-level reporting reliability by 32% across business units.
 - Partnered with cross-functional finance, IT, and operations teams, gathering requirements and delivering tailored solutions that increased stakeholder satisfaction scores by 20%.
- Data Analyst (System Engineer) | Tata Consultancy Services, India**

Jan 2021 - Apr 2023

 - Designed SAP HANA Calculation Views for GL, AP, and AR, reducing reporting delays 25% and increasing financial reporting timeliness for senior management.
 - Automated finance reporting with SAP BODS ETL, reducing generation time 30% and ensuring consistent, error-free delivery of mission-critical financial data.
 - Developed Qlik Sense dashboards visualizing KPIs, enhancing cash flow and expense monitoring, resulting in 18% faster decision-making within finance departments.
 - Optimized SQL workflows processing large transactional datasets, reducing query runtimes 20% and improving scalability of financial reporting infrastructure across multiple regions.
 - Implemented secure role-based access in SAP HANA, ensuring SOX compliance and preventing unauthorized access, strengthening overall corporate data governance.
- Data Analyst-Intern | Cognizant, India, India**

Mar 2020 - Dec 2020

 - Designed SLA monitoring dashboards in Power BI, reducing SLA breaches 18% and improving service reliability for multiple insurance clients.
 - Applied regression and clustering on insurance datasets, improving scheduling accuracy 15% and optimizing workforce allocation efficiency across client-facing service operations.
 - Developed SQL pipelines with API integrations, ensuring validated, consistent data delivery and reducing downstream reporting errors by 20%.
 - Created executive-ready reports and visualizations, simplifying outputs into insights that improved leadership decision-making effectiveness by 25%.
 - Built interactive Excel dashboards using pivot tables, slicers, and charts, enabling self-service analytics and reducing ad-hoc reporting requests 22%.

EDUCATION

Masters in information systems | Pace University, New York, NY, USA

Dec 2024

Bachelors in Computer Science | SR Engineering College, Warangal, India

Apr 2021

CERTIFICATION

Tableau for Data Visualization - LinkedIn Learning | **R for Data Science (Analysis & Visualization)** - LinkedIn Learning
SQL for Data Analysis - LinkedIn Learning | **Python for Data Analysis** - Udemy

PROJECT

- ETL & Data Pipeline Automation (Feb 2023 – May 2023)**

 - Automated ETL workflows using Python, Pandas, and SQL Server for reliable data availability in analytics.
 - Prepared anomaly detection scripts to identify irregular patterns and improve data integrity.
 - Optimized SQL queries and implemented indexing strategies, reducing processing time by 40% for faster reporting.
- Data Modeling for BI (Sep 2023 – May 2023)**

 - Designed scalable star and snowflake schema models to improve query efficiency and Power BI dashboard performance.
 - Established version-controlled schema structures for consistency, traceability, and team collaboration.
 - Implemented reusable BI data models to enable cross-departmental analytics and self-service reporting.
