DataCamp Associate Data Analyst Track (SQL)

June 2025

Experience

Research Analyst, Argent Capital Management, St. Louis, MO

June 2021 – April 2025

- Reported to four portfolio managers for five investment portfolios totaling \$3.6B of assets under management to generate superior investment returns to clients.
- Provided extensive research and analysis for over 26 publicly traded portfolio holdings across a variety of industries.
 - Including auto insurance, P&C insurance, manufacturing & distribution, oil and gas, auto salvaging, auto dealerships, marketplace, waste, less-than-truckload carrier, retailer, telecom, media/streaming, regional gaming, and building material industries.
 - Companies ranged from the size of > \$1B to < \$1T.
- Conducted financial statement analysis during quarterly earnings to track financial health and performance of target companies.
 - Analyzed margins, cash flows, balance sheet leverage, liquidity and returns on equity of the businesses.
- Visualized data trends for financial data to convey clear messaging of proposals to portfolio managers.
- Conducted statistical data analysis on business KPI's against time series and competitor metrics.
- Developed scenario analysis models for mergers and acquisitions conducted by portfolio companies.
- Conducted comprehensive research reports on investment opportunities' competitive, financial, managerial qualities.
- Effectively communicated proposals to portfolio managers and senior analysts while defending thesis points.
- Collaborated with team of senior analysts to create templates for reports and to share knowledge across studied industries.
- Introduced the team to new expert networks and investment-specific AI products.
- Utilized pivot tables to identify trends of bottom performing decisions using historical performance data.
- Cross-checked financial data pulled from source and cleaned data discrepancies prior to analysis.
- Analyzed reports and provided feedback to analyst position candidates for internal hiring process.
- Coached new hire on analyst team to transfer responsibilities and teach new concepts and skills for job.
- Completed ad-hoc projects using data provider plug-in formulas in Excel to quickly collect data.

Performance Analyst, Cardinal Investment Advisors, St. Louis, MO

January 2021 – May 2021

- Worked with investment consultants on three different clients' portfolios to collect and present manager investment performance and macroeconomic data to clients.
- Created PowerPoint presentations with slide master showing portfolio performance and characteristics.
- Evaluated growth stock index returns excluding performance of large names.
- Assisted in updating benchmark and portfolio data in internal database.

Research Analyst Intern, Argent Capital Management, St. Louis, MO

May 2019 – August 2019

- Examined securities through research of company catalysts that drive value.
- Identified investment ideas based on portfolio managers' desire for stability.
- Utilized accounting adjustment software to determine capital allocation effectiveness of firms.
- Generated comprehensive reports of new ideas for investment.
