

PARTH BHAMBURE

DATA ANALYST

AZ, USA | (609) 997-0358 | parthsbhambure@gmail.com | [LinkedIn](#)

SUMMARY

- **Data Analyst with 3 years of experience** in building ETL pipelines using **Apache Airflow, Informatica** to integrate multi-source datasets, optimizing financial reporting and regulatory compliance workflows across global enterprise environments.
- Developed advanced visual analytics solutions using **Power BI, Tableau, and Excel** with interactive filters, dynamic charts, and geospatial mapping to empower executives and regional managers with actionable insights for operational efficiency.
- Applied statistical and machine learning techniques in **Python (Pandas, NumPy)** and **R** for anomaly detection, probability modeling, and data harmonization, improving predictive accuracy and compliance reporting for high-risk financial activities.
- Optimized data storage, retrieval, and transformation processes using **PostgreSQL, MySQL, Microsoft SQL Server, and Snowflake**, implementing indexing, query optimization, and schema validations to support multi-region, high-volume analytics workloads.
- Enhanced CRM, digital engagement, and portal adoption initiatives by leveraging **Google Analytics, Salesforce**, and integrating behavioral metrics with business intelligence strategies to increase user adoption, client onboarding efficiency, and risk detection rates.

SKILLS

Languages:	Python (Pandas, NumPy, Seaborn, Matplotlib), SQL
Transformation & Modeling:	Data Cleaning, Data Wrangling, Data Modeling, Feature Engineering, Exploratory Data Analysis
Data Visualization & Reporting:	Power BI, Tableau, Jupyter Notebook, Excel Dashboards (Pivot Tables, Macros, VLOOKUP)
ETL & Data Management:	PostgreSQL, Microsoft SQL Server, Snowflake, MySQL, Informatica
Documentation & Methodologies:	Agile, SDLC, UAT, Sprint Planning, QA Documentation, Data Storytelling
Cloud Platforms:	AWS (S3, Glue, Redshift), Azure (Azure Data Lake, Azure Data Factory), GCP, Snowflake
Soft Skills:	Communication, Collaboration, Problem Solving, Stakeholder Engagement, Business Decision Support

WORK EXPERIENCE

McKesson Corporation, AZ, USA | Data Analyst

Aug 2024 – Present

- Automated claims and reimbursement workflows by developing ETL processes in **Apache Airflow**, integrating datasets from **PostgreSQL** and **Microsoft SQL Server**, reducing load execution time by 38 minutes across multi-region analytics pipelines.
- Designed interactive dashboards in **Power BI** with dynamic query parameters and role-based access, enabling pharmacy leaders to drill down into regional denial metrics, identify bottlenecks, and improve turnaround for reimbursement dispute resolutions.
- Applied data transformation logic in **Python (Pandas, NumPy)** for categorical normalization, null imputation, and schema harmonization, delivering high-quality datasets that increased compliance reporting accuracy by **17%** across quarterly audits.
- Utilized **Google Analytics** to capture and analyze user navigation patterns on internal provider portals, integrating findings with formulary adherence metrics to optimize digital engagement strategies and increase portal adoption by 4,300 unique users.
- Implemented anomaly detection models using **BI** calculated fields combined with statistical outlier analysis, generating automated exception reports that reduced claim investigation effort by **21%** while regulatory benchmarks were consistently met.
- Orchestrated **ETL** pipelines on **Azure Data Factory** and **Azure Data Lake**, integrating claims and pharmacy datasets across **SQL Server** and **PostgreSQL** sources, which accelerated cross-regional data refresh cycles by 28% and improved scalability for compliance reporting.
- Ensured **HIPAA compliance** in handling PHI across ETL pipelines, dashboards, and reporting processes by enforcing role-based access, audit controls, and secure data transformations.
- Coordinated sprint deliverables using **JIRA**, creating epics, backlog items, and acceptance criteria to streamline cross-functional collaboration, ensuring data quality enhancements and visualization features were deployed within agreed service delivery timelines.

Accenture, India | Data Analyst

Aug 2021 - Jul 2023

- Engineered financial transaction integration pipelines **Informatica**, applying rule-based transformations and schema validations to consolidate multi-source AML and KYC datasets into **Snowflake**, reducing regulatory reporting preparation time 29 hours monthly.
- Developed **Tableau** dashboards with interactive filters, geospatial mapping, and KPI-driven visualizations to track branch-level credit exposure, enabling risk managers to prioritize investigations and mitigate potential defaults before escalation.
- Created automated reconciliation scripts in **MySQL** with advanced indexing and query optimization, enhancing the accuracy and retrieval speed of quarterly portfolio performance datasets across multi-region banking divisions.
- Leveraged **Salesforce CRM** analytics to align client onboarding activities with transaction monitoring triggers, improving early high-risk account detection rates by **14%** and reducing false positives in compliance investigations.
- Designed financial KPI monitoring dashboards in **Excel (Pivot Tables, Macros, VLOOKUP)**, integrating dynamic charts to empower executives with instant insights into liquidity ratios, loan disbursement volumes, and interest spread variations.
- Developed SQL queries using **JOINS** and **CTEs** to integrate multi-source financial datasets, streamline portfolio risk analysis workflows, and enhance decision-making accuracy by 14% across regulatory reporting cycles.
- Conducted **A/B testing** on digital banking workflows using Python and SQL to evaluate feature performance, identify statistically significant improvements, and optimize transaction monitoring processes, resulting in a 12% increase in operational efficiency.
- Architected **AWS-native** ETL pipelines leveraging **Snowflake, S3, and Glue** for automated ingestion of AML/KYC datasets, enabling scalable processing of 80M+ records monthly, improving regulatory audit readiness, and reducing infrastructure costs by 17%.
- Delivered **data storytelling** presentations that transformed complex transactional metrics into actionable insights, enabling marketing stakeholders to prioritize initiatives that generated measurable increases in campaign rates.

EDUCATION

Master of Science in Management Information Systems | University of Arizona, Arizona, USA

Bachelor of Technology in Computer Engineering | University of Mumbai, Mumbai, India
