

Summary

Python Developer(Odoo) with over 5 years of experience in developing, optimizing, and scaling ERP solutions. Experienced in handling complex data workflows within Odoo, including large-scale data integration, automation, and reporting. Proficient in designing and deploying custom Odoo modules, optimizing system performance, and integrating third-party APIs, all of which require a solid understanding of data flow, transformation, and storage.

In addition to my expertise, I have a strong interest in data engineering and a deep understanding of data structures, data pipelines, and database management. Passionate about leveraging my backend development skills to build scalable data systems, automate data processing, and enable data-driven decision-making.

Eager to transition into data engineering, I am committed to applying my knowledge of databases (PostgreSQL, MySQL), backend development (Python), and API integrations to create robust data pipelines, improve data accessibility, and ensure data integrity.

Skills

- Programming Language** Python, SQL, JavaScript, HTML, CSS, XML
- Frameworks** Odoo (v10-v17), OWL, Django, FastAPI, Flask
- Database** MySQL, PostgreSQL
- Version Control Tools** GitHub, GitLab
- Libraries / API** Pandas, NumPy, PySpark, RESTful APIs
- ERP Modules** Developed and Customised applications using Odoo modules such as Website, E-Commerce, Sales, CRM, Purchase, and Invoicing, along with seamless integration of third-party APIs.

Experience

Senior Odoo Developer – Bista Solution PVT LTD	Feb 2024 - Present
Senior Odoo Developer – Heliconia Solutions Pvt. Ltd	Jun 2023 - Feb 2024
Junior Odoo Developer – Aktiv Software	Jan 2022 - Dec 2022
Software Engineer – Surekha Technologies	Jun 2021 - Jan 2022
Associate Software Engineer – JustCodify	Aug 2019 - May 2021

Responsible

- Designed and implemented custom Odoo modules, including advanced approval workflows, automated notifications, and business-specific logic.
- Diagnosed and resolved complex bugs across multiple Odoo versions; collaborated closely with QA teams to validate enhancements and ensure system stability.
- Actively contributed to the Odoo open-source community by submitting enhancements and bug fixes, reinforcing best practices and system improvements.
- Developed both backend logic and frontend interfaces tailored to client requirements, ensuring seamless user experiences across industries.
- Delivered end-to-end ERP solutions for trading and distribution companies, including module customization, deployment, and user training.
- Customized reporting templates using QWeb, incorporating key business metrics and KPIs for data-driven

decision making.

- Gained deep expertise in XML views, model inheritance, access control, and automation scripting within Odoo environments.
- Led development and support of ERP solutions for retail, services, manufacturing, and HRMS workflows, ensuring scalability and long-term maintainability.
- Built complex PDF reports and dynamic, data-rich dashboards using QWeb and Odoo's reporting framework. In

Projects

MultiLevel Sale Order Approval - CRM, Sales

- Sale orders now require approval from all designated approvers before they can be confirmed.
- Support added for generating recurring invoices from a single sale order.

School Marketplace - CRM, Sales, Purchase, Website

ERP Developed a custom child module of Odoo Marketplace for the Education Sector. Engineered a specialized extension of the Odoo Marketplace tailored to school-related use cases, enhancing core functionality with education-specific workflows and role-based access.

- **School Registration & Onboarding:** Enabled schools to self-register on the platform and onboard their communities by inviting parents to join and engage.
- **Parent Engagement & E-Commerce:** Allowed registered parents to log in and purchase stationery and school-related items directly through a user-friendly marketplace interface.
- **Vendor Management:** Facilitated vendor operations by allowing them to manage product listings and fulfill orders placed by parents and schools.

This custom module introduced distinct user roles (school admin, parent, vendor) and education-focused workflows, expanding the flexibility and applicability of the core Odoo Marketplace to the academic domain.

Textify - Sales, Website, Purchase, Invoicing

I developed a custom Odoo module designed specifically for managing printing designs on cloth.

- **Design Upload & Selection:** Users can upload their own cloth design images or choose from a set of pre-uploaded designs provided by a superuser.
- **Design Preview:** Users can preview their selected or uploaded design before finalising the order.
- **Download Capability:** Uploaded images are accessible for download both from the front-end (website) and back-end (user portal).
- **Superuser Controls:** Superusers can review submitted designs, reject unsuitable uploads, and request re-uploads with comments or example images.

ERP for Online Shop - Sales, Website, Purchase, Invoicing

An ERP Customized for retail business and they are able to manage products inventory from the backend and sell it through the website.

Custom Hats – Sales, Invoicing, CRM, Website, Purchase, MRP: A Complete solution provided for their retail business and manage their inventory, products, accounting things

Education

Master of Computer Application - Computer Science Department Computer Science, Gujarat, India	Aug 2016 - Apr 2019 GPA: 7.10/10
Bachelor of Science – Information Technology Saurashtra University – Gujarat, India	Jun 2011- Apr 2014 GPA: 64.4/10
