

Parth Motibhai Patel

Software Developer

704-218-9385 | parthpatel4673@gmail.com | NC

SUMMARY

Software Developer with 4 years of experience architecting and delivering scalable, high-performance backend systems and microservices. Proficient in Python, Django, and FastAPI, with expertise in designing RESTful APIs, optimizing database operations (PostgreSQL, MySQL, MongoDB), and deploying cloud-native solutions on AWS. Skilled in DevOps practices, including CI/CD pipelines with Jenkins and GitHub Actions, and containerization with Docker and Kubernetes. Adept at Agile and Waterfall methodologies, driving efficient development through collaboration, code quality, and performance optimization. Passionate about leveraging modern frameworks and AI-driven tools to enhance system scalability.

SKILLS

Languages: Python, SQL, JavaScript (ES6+), TypeScript, HTML5/CSS3
Frameworks/Libraries: Django, Flask, FastAPI, SQL Alchemy, PyJWT, aiohttp, React, Node.js, Bootstrap, Pandas
Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, ECS), Docker, Kubernetes, Jenkins, GitHub Actions, GitLab, Terraform
Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
Integration: RESTful APIs, GraphQL, OAuth2, OpenAPI/Swagger, JWT, HTTPS, CSRF, CORS
Testing: pytest, unittest, Mocking, Coverage.py, Postman, Selenium
Monitoring & Logging: Prometheus, Grafana, ELK Stack, Sentry, New Relic
Tools & IDEs: Git, GitHub, PyCharm, VS Code, Postman, JIRA, Confluence, UML
Methodologies: Agile, Scrum, Kanban, SDLC, CI/CD, TDD, REST Architecture
Other: Machine Learning (scikit-learn, TensorFlow basics), Data Structures, Algorithms, Linux

EDUCATION

Master of Science in Computer Science Northern Arizona University	Dec 2024
Bachelor of Engineering in Information Technology Mumbai University, Mumbai, India	May 2022

EXPERIENCE

ServiceNow, NC - Software Developer	June 2024 – Current
- Architected and optimized scalable backend services using Python, Django, and FastAPI, improving REST API response times by 25% through efficient endpoint design. - Designed and implemented complex PostgreSQL database schemas, writing optimized SQL queries to support business logic and reporting, reducing query execution time by 20%. - Leveraged AWS (EC2, S3, Lambda, RDS) for deployment, ensuring 99.9% application uptime and secure data storage. - Automated CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 40% and improving pipeline reliability. - Collaborated with cross-functional Agile teams, achieving 95% adherence to sprint goals and reducing production defects by 15%. - Implemented comprehensive unit and integration tests with pytest, achieving 92% code coverage and enhancing system reliability. - Integrated monitoring tools (Prometheus, Grafana) to track system performance, reducing downtime by proactively addressing bottlenecks.	
Neon IT Systems, India - Software Developer	Jun 2020 – Dec 2022
- Developed modular microservices using Python, Django, and Flask, improving system scalability and enabling seamless integration with front-end applications. - Optimized data persistence with PostgreSQL and MongoDB using SQL Alchemy, reducing query execution time by 20% through indexing and query optimization. - Deployed serverless applications on AWS Lambda, handling high-traffic loads with sub-second latency and 99.8% availability. - Designed system architecture with UML diagrams, ensuring alignment with business requirements and facilitating cross-team collaboration. - Implemented CI/CD pipelines with GitLab CI, streamlining deployments and reducing integration errors by 30%. - Integrated third-party APIs using OAuth2 and JWT, ensuring secure and efficient communication with external services. - Conducted code reviews and adopted Test-Driven Development (TDD), improving code quality and reducing post-release bugs by 25%.
