

PARTHIV GANDHI

DATA SCIENTIST

(443) 333-9495 | parthivbg@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Scientist with 3+ years of experience specializing in machine learning, NLP, and MLOps. Proven expertise in designing and deploying predictive models and generative AI solutions that enhance customer experience, reduce risk, and drive operational efficiency. Skilled in Python, PyTorch, AWS, and end-to-end project lifecycle management from concept to production.

SKILLS

Programming Language/IDEs: Python, R Programming, SQL, Jupyter Notebook, Google Colab

Machine Learning & MLOps: Regression Models, Decision Trees, Random Forests, Naive Bayes, SVM, Cohort Analysis, Hypothesis Testing, MLOps, MLflow, CI/CD for ML, Model Deployment, Model Monitoring

AI & Deep Learning: CNN, ANN, RNN, LSTM, LangChain, Hugging Face Transformers (BERT, GPT), Generative AI, Natural Language Processing (NLP), Large Language Model (LLM), MLOps

Cloud: AWS (S3, Lambda, Glue, Athena, AWS Kinesis, Redshift), Azure (ADLS, Synapse Analytics)

Visualizations: Tableau, Power BI (DAX, Power Query), Looker, Excel

Packages and Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, Keras, OpenCV, NLTK, XGBoost, PyTorch

ETL & Database: Apache Airflow, SSIS, Talend, Snowflake, SQL Server, PostgreSQL, MongoDB

EDUCATION

Master of Science, Information Systems | University of Maryland, Baltimore County, MD

Bachelor of Technology, Information and Communication Technology | Pandit Deendayal Energy University, Gujarat, IN

EXPERIENCE

Data Scientist

The Principal Financial Group, Atlanta, GA

January 2025 – Present

- Engineer NLP models with PyTorch to advance sentiment analysis, boosting accuracy by 30% and enabling data-driven strategies that improve customer experience.
- Design and operationalize predictive credit risk and loan default models using Regression, Decision Trees, Random Forests, Naive Bayes, and SVM, increasing default prediction accuracy and reducing credit losses.
- Orchestrate end-to-end MLOps pipelines with MLflow, CI/CD for ML, AWS (Lambda, Glue, S3, Redshift), shortening model release cycles by 40% while ensuring governance and reproducibility.
- Optimize NLP insights by fine-tuning Hugging Face Transformers (BERT, GPT) and deploying LLM-based QA tools for audit teams, cutting manual review effort by 30% and improving compliance reporting.
- Architect and deploy generative AI solutions, including an internal chatbot built with LangChain + GPT models, halving response time and raising customer satisfaction scores by 12 points.
- Automate risk reporting workflows and monitoring dashboards using Python, SQL, AWS Athena, and Tableau, saving 80+ analyst hours per quarter and reducing SLA breaches by 10%.

Data Scientist

WebCode IT, Hyderabad, India

September 2019 → July 2022

- Created data analysis and predictive modeling initiatives with Python (Scikit-learn, NumPy, Pandas) and Spark (MLlib, PySpark), developing segmentation algorithms that improved lifetime value prediction accuracy by 25%.
- Designed and deployed end-to-end regression models (Linear Regression, Random Forest, Decision Trees) using SQL for data extraction, Python for ETL, and Power BI for visualization, enabling data-driven decision-making.
- Implemented time-series forecasting models (ARIMA, Prophet, Holt-Winters) to predict monthly loan demand and branch-level cash flow, improving forecast accuracy and mitigating shortages.
- Optimized XGBoost models by tuning hyperparameters and automating training pipelines, reducing training time by 30% and improving performance metrics.
- Built and operationalized deep learning pipelines in TensorFlow for classification, regression, and sequence tasks, minimizing manual intervention and accelerating deployments by 15%.
- Streamlined complex SQL Server queries and stored procedures by applying indexing, partitioning, and query tuning, cutting data retrieval time by 35%.

CERTIFICATIONS

AWS Certified Data Engineer - Associate
